CONTENTS

Number 1, August, 1910

 I. The Action of Drugs on the Salivary Secretion. By V. E. Henderson II. Thyreotropic Iodine Compounds. By Reid Hunt and Atherton Seidell III. On Insufflation of the Lungs with Hydrogen; with Carbon Dioxide; and 	1 15
with Air. By C. C. Guthrie, F. V. Guthrie and A. H. Ryan IV. The Influence of Intravenous Injections of Sparteine and Adrenalin on	4 9
the Heart of the Dog. By A. Strickler and Moyer S. Fleisher V. In Regard to the Detoxification of Benzoic Acid by Optical Isomers of	55
Leucin. By A. H. Koelker and Samuel Amberg	59 73
VI. On the Toxicology of the Tutu Flant. By William W. Ford	10
Number 2, October, 1910	
VII. On the Action of Magnesium Sulphate. By S. A. Matthews and Clyde	
Brooks VIII. On the Efficacy of Antimony-Thioglycollic Acid Compounds in the Treatment of Experimental Trypanosomiasis. By L. G. Rowntree and	87
John J. Abel	101
 IX. Further Observations on the Immunisation of animals to the Poisons in Fungi. By William W. Ford	
Number 3, December, 1910	
XI. In Memoriam. Christian Archibald HerterXII. Tetanic Convulsions in Frogs Produced by Acid Fuchsin, and their Relation to the Problem of Inhibition in the Central Nervous System.	165
By Henry G. Barbour and John J. Abel. XIII. The Toxicity of Martius Yellow and some Other Aniline Dyes and the Entrance of Dyes into Cells. By A. P. Mathews and Elizabeth Long-	
XIV. Physiological Studies in Anaphylaxis:	201
· · · · · · · · · · · · · · · · · · ·	221
XV. The Action of Ether on an Anaerobic Animal Tissue. By Albert P. Mathews	231
XVI. Pharmacological Studies on the Phosphatids: I. Methods for the Study of Their Combinations with Drugs and Other Substances. By W. Koch.	
oubstances. By W. Roch	

CONTENTS

XVII. II. The Relation of the Phosphatids to the Sodium and Potassium of the Neuron. By W. Koch and F. H. Pike	245
XVIII. III. The Relation of the Phosphatids to Overton and Meyer's Theory of Narcosis. By W. Koch and F. C. McLean XIX. IV. The Relation of Brain Phosphatids to Tissue Metabolites.	249
By W. Koch and A. W. Williams	
Action of Strychnin. By W. Koch and H. T. Mostrom	
Number 4, March, 1911	
 XXI. Some Observations on the Physiological Action of Sodium Chloride. By Don R. Joseph and S. J. Meltzer. XXII. The Distribution of Haemolysins, Agglutinins and Poisons in Fungi, Especially the Amanitas, the Entolomas, the Lactarius and the Inocybes. 	271
By William W. Ford	285
and Hugh McGuigan XXIV. The Control of Strychnine Poisoning by Means of Intratracheal Insufflation and Ether. A Preliminary Communication. By T. S.	
Githerns and S. J. Meltzer	
munication. By D. R. Joseph and S. J. Meltzer	
and Mouse. By W. H. Schultz and H. E. Jordan	
Hunt	
Number 5, May, 1911	
XXVIII. An Experimental Study of Camphoric Acid. By George B. Roth XXIX. On the Influence of Various Salts upon Tetany following Parathyroidectomy. By Carl Voegtlin and W. G. MacCallum	
XXX. The Rôle of the Portal Circulation of the Liver in Bile Formation and Jaundice. By C. Voegtlin and B. M. Bernheim	
XXXI. Note Concerning the Laxative Properties of the Tribasic Salts of Phenolphthalic Acid. By L. G. Rountree	
Number 6, July, 1911	
XXXII. Studies on the Circulation in Man: IV. The Influence of Oxygen Inhalation on the Circulation in a Case of Cyanosis. By G. N. Stewart	

CONTENTS V

XXXIII. Further Data Relating to the Use of Certain Antimonial Compounds in the Treatment of Experimental Trypanosomiasis. By L. G.	
Rowntree and John J. Abel.	501
XXXIV. The Liver in its Relation to Anaphylactic Shock. By Carl	
Voegtlin and B. M. Bernheim	507
XXXV. A Study of the Antiseptic and the Pharmacologic Properties of Meta-	
Cresol Acetate. By Isidor Greenwald	513
XXXVI. On the Action of Senecio Alkaloids and the Causation of the	
Hepatic Cirrhosis of Cattle (Pictou, Molteno, or Winton disease). By	
Arthur R. Cushny	531
XXXVII. On the Properties of Several Species of the Polyporaceae and	
of a New Variety of Clitocybe, Clitocybe Dealbata Sudorifica, Peck.	
By William W. Ford and Joseph L. Sherrick	549
XXXVIII. Further Study of the Relation of the Adrenals to Pancreatic	
Activity. By Charles Wallis Edmunds	559

ILLUSTRATIONS

Blood-pressure curve after MgSO ₄ (Fig. 1)	89 89
Respiratory tracing of dog showing effect of perfusion of head with MgSO ₄ (Fig. 3)	90
Successive myocardiograms showing heart stand-still from MgSO ₄ (Fig. 4)	90
Treatment of donkey with sodium antimony-thioglycollate (Chart 1)	143
Small intestine from a nonsensitized guinea-pig and from a guinea-pig ren-	
dered tolerant to horse serum (Fig. 1)	226
Successive portions of a tracing from the fore segment of Limulus heart (Fig. 1)	233
	234
Showing recovery in air, but not in hydrogen (Fig. 3)	235
Diagram of anaphylactic lung (ventral view) of guinea-pig showing the levels	
of stenosis (black) in the bronchial tree (Fig. 1)	379
Photomicrograph of section of anaphylactic lung at approximately the level	
x-y, fig. 1 (Fig. 2)	380
Photomicrograph of cross section of secondary bronchus of the normal lung	
, , , , , , , , , , , , , , , , , , ,	381
Photomicrograph of oblique cross section (mucosa broken below) of bronchus	
of normal lung at about the level x-y, fig. 1. (Fig. 4)	381
Camera lucida outline sketch of bronchiole and arteriole at points of division	905
(Fig. 5)	385
Photomicrograph of preparation (unstained toto mount) illustrated in fig. 5	205
(Fig. 6)	385
Camera lucida drawing of oblique longitudinal section of arteriole (Fig. 7).	
Transverse section of arteriole of normal lung through muscle segment (Fig. 8) Effect of sodium camphorate solution, isotonic with the blood, in a cat of	380
medium size (Fig. 1)	415
Adrenalin on the blood pressure and volume of the pancreas (Tracing I)	564
Effect of secretin injection upon pancreatic volume and blood pressure (Trac-	304
ing II)	566
Effect of pituitary extract (primary injection) upon blood pressure and pan-	900
creatic volume and rate of secretion (Tracing III)	567
Effect of pituitary extract (secondary injection) upon blood pressure, pancre-	901
atic volume and rate of secretion (Tracing IV)	568
Barium chloride upon blood pressure, pancreatic volume and rate of secretion	
(Tracing V)	571
