NOTICE

to Subscribers and Readers

Attention is directed to the current method (ACC) of using entry numbers
opposite the unit terms and names comprising the Subject and Author
sections of the Journal index. These entry numbers coincide with the
appropriate accession numbers listed serially at the left of the titles
in the Register of Articles. Their purpose is to condense and unify the
three parts of the index, and to expedite its use.

For details of the ACC indexing system please see: This Journal, "Index

The possibility has been considered that additional copies of the
indexes for this and future volumes, bound separately, might be of value
to libraries and to other subscribers and readers for use in reference
work. Such a separate distribution would be justified only if the sale of
a significant number of copies could be assured. It is suggested that
anyone interested in such separate additional indexes write a letter to the
Publisher who can then determine the feasibility of separate distribution.
