The durations of action of thiopental and pentobarbital. A. Goldstein, L. Aronow. .......................... 1

Some pharmacologic actions of beta-phenylisopropylhydrazine (PIH). L. G. Eltherington, A. Horita. ................................ 7

Biochemical and pharmacological effects of the monoamine oxidase inhibitors, iproniazid, 1-phenyl-2-hydrazinopropane (JB 516) and 1-phenyl-3-hydrazinobutane (JB 835). S. Spector, P. A. Shore, B. B. Brodie. ............................................. 15

Disappearance of various drugs from the cerebrospinal fluid. S. E. Mayer, R. P. Maickel, B. B. Brodie. ........................................... 30

Pharmacological comparison of muscarine and muscarone with their dehydro derivatives. L. Gyermek, K. R. Unna. .............................. 37

Steric configuration and the activity at the mammalian neuromuscular junction of cyclic aminoalcohol derivatives. F. G. Standaert, S. L. Friess. .............................................. 44

Pharmacology of a series of new 2-substituted pyridine derivatives with emphasis on their analgesic and interneuronal blocking properties. T. B. O'Dell, L. R. Wilson, M. D. Napoli, H. D. White, J. H. Mirsky. ............................................. 45

Chlorpromazine tolerance and physical dependence. E. M. Boyd. --- 55

A comparison of three anticonvulsant testing methods. C. L. Mitchell, H. H. Keasling. .................................................. 79

Isolation of triethyllead ion from liver after inhalation of tetraethyllead. C. D. Stevens, C. J. Feldhake, R. A. Kehoe. .......................... 90

Influence of acetylsalicylic acid and salicylamide on the coagulation of blood. A. J. Quick, L. Clesceri. ........................................ 95

Methods for combining the results of two biological assays. M. C. Sheps, E. A. Moore. .................................................. 99

Studies on drug resistance in mammalian cells. II. 6-mercaptopyrurine resistance in mouse fibroblasts. S. Tomizawa, L. Aronow. -107

Active transport of some pyrimidines across the rat intestinal epithelium. L. S. Schanker, D. J. Tocco. ........................................ 115

The pharmacological activities of benzthiazide (3-benzylthio- methyl-6-chloro-7-sulfamyl-1,2,4-benzothiazidine-1,1-dioxide), a nonmercurial diuretic. S. Y. P'an, A. Scriabine, D. E. McKersie, W. M. McLamore. ........................................... 122
### Register of Articles

**128:2 Feb 60**

- **8274** Pharmacological consequences of the selective release of peripheral norepinephrine by syrosingopine (SU 3118). F. B. H. Orlans, K. P. Finger, B. B. Brodie. 131
- **8275** Differential potentiation of norepinephrine and epinephrine by cardiovascular and CNS-active agents. R. A. Maxwell, H. Sylwestrowicz, A. J. Plummer, H. Povalski, P. Schneider. 140
- **8277** The actions of ambonestyl (N(2-diethylaminoethyl)-isonicotinamide) and quinidine on isolated rabbit atria. E. R. Smith, B. B. Clark. 154
- **8278** The effect of pyridoxal and other compounds on the mechanical activity and the sodium and potassium content of isolated rabbit atria. R. R. Levine, E. R. Smith, B. B. Clark. 159
- **8279** Studies on the action of cortisol acetate on isolated cardiac tissue. R. D. Tanz. 168
- **8280** Amino-methylchromones, brain stem stimulants and pentobarbital antagonists. I. Setnikar, W. Murmann, M. J. Magistretti, P. Da Re. 176
- **8281** The usefulness of clinical signs for the comparison of intravenous anesthetics in dogs. E. W. Maynert. 182
- **8282** Acute tolerance to intravenous anesthetics in dogs. E. W. Maynert, G. I. Klingman. 192
- **8283** Relation of thyroid function to acute and chronic effects of amphetamine in the rat. J. Tormey, L. Lasagna. 201
- **8284** Increase in the plasma insulin activity following the continuous infusion of mesoxalate into the pancreatic circulation in dogs. S. Ohashi, S. Takeuchi, Y. Kobayashi. 210

**128:3 Mar 60**

- **8285** Potentiation of duration of the vasodilator effect of bradykinin by sympatholytic drugs and by reserpine. M. Rocha E Silva, A. P. Corrado, A. O. Ramos. 217
- **8286** Enhancement of inhibitory and excitatory effects of catecholamines. A. P. Roszkowski, G. B. Koelle. 227
- **8287** The effect of gamma-amino-N-butyric acid and some related compounds on the cardiovascular system of anesthetized dogs. H. C. Stanton, F. H. Woodhouse. 233
- **8288** Sensitization to ventricular fibrillation. I. Sensitization by a substituted propiophenone, U-0882. J. I. Moore, H. H. Swain. 243
- **8289** Sensitization to ventricular fibrillation. II. Sensitization by amarine and congeners of U-0882. J. I. Moore, H. H. Swain. 253
- **8290** Cardiac activity of a series of synthetic steroid bases. C. R. Swaine, D. R. Waud. 259
- **8291** The effects of atropine on the electroencephalogram and behavior in man. A. M. Ostfeld, X. Machne, K. R. Unna. 265
- **8292** The effect of guanidine on neuromuscular transmission. M. Otsuka, M. Endo. 273

NOTICE
to Subscribers and Readers

Attention is directed to the current method (ACC) of using entry numbers opposite the unit terms and names comprising the Subject and Author sections of the Journal index. These entry numbers coincide with the appropriate accession numbers listed serially at the left of the titles in the Register of Articles. Their purpose is to condense and unify the three parts of the index, and to expedite its use.

The possibility has been considered that additional copies of the indexes for this and future volumes, bound separately, might be of value to libraries and to other subscribers and readers for use in reference work. Such a separate distribution would be justified only if the sale of a significant number of copies could be assured. It is suggested that anyone interested in such separate additional indexes write a letter to the Publisher who can then determine the feasibility of separate distribution.
