</table>
Some factors affecting glucuronide formation in vitro. J. K. Inscoe, J. Axelrod. 128
Barbiturate metabolism as affected by certain agents acting on the liver. J. M. Fujimoto, K. B. Pearce, G. L. Plaa. 139
The pharmacologic effects of heroin in relationship to its rate of biotransformation. E. L. Way, J. W. Kemp, J. M. Young, D. R. Grassetti. 144
Behavioral determination of time and dose parameters of monoamine oxidase inhibitors. G. A. Heise, E. Boff. 155
Human pharmacology and addiction liability of norcodeine. H. F. Fraser, H. Isbell, G. D. Van Horn. 172
Some effects on the central nervous system of gamma-aminobutyric acid (GABA) and certain related amino acids administered systemically and intracerebrally to mice. O. D. Gulati, H. C. Stanton. 178
The action of analgetic agents on positive afterpotentials of frog sciatic nerve. W. A. Krivoy. 186
The mechanism of isoproterenol vasomotor reversal by phenylephrine. D. T. Walz, G. D. Maengwyn-Davies. 208
The adrenal cortical suppressant effect of two triazine analogs in the guinea pig. P. J. Costa, D. D. Bonycastle. 214
Effect of phenothiazine derivatives on dextran-induced edema. L. Kato, B. Gozzy. 231

Effect of trans-2-phenylcyclopropylamine upon norepinephrine concentration and monoamine oxidase activity of rat brain. H. Green, R. W. Erickson. 237
Intracellular distribution of norepinephrine in rat brain. I. Effect of reserpine and the monoamine oxidase inhibitors, trans-2-phenylcyclopropylamine and 1-isonicotiny1-2-isopropyl hydrazine. H. Green, J. L. Sawyer. 243
Evidence that tranquilizing action of reserpine is associated with change in brain serotonin and not in brain norepinephrine. Effects of reserpine, raunescine, benzoquinolizines, dimethylaminobenzoyl methylreserpate, and stress. B. B. Brodie, K. F. Finger, F. B. Orlans, G. P. Quinn, F. Sulser. 250

J. Czicman.------------------------------------------ 462
8381 Effects of various drugs on the isolation-induced fighting be-
Niemegeers.------------------------------------------ 471

NOTICE

to Subscribers and Readers

Attention is directed to the current method (ACC) of using entry numbers
opposite the unit terms and names comprising the Subject and Author sec-
tions of the Journal index. These entry numbers coincide with the appro-
priate accession numbers listed serially at the left of the titles in the
Register of Articles. Their purpose is to condense and unify the three
parts of the index, and to expedite its use.

For details of the ACC indexing system please see: This Journal,
Vol. 122:2, Jan., Vol. 122: N1-2, April, 1958; and Vol. 127: AI 1-2, December,
1959.

The possibility has been considered that additional copies of the index,
bound separately, might be of value to libraries and to other subscribers
and readers for use in reference work. Such a separate distribution would
be justified only if the sale of a significant number of copies could be
assured. It is suggested that anyone interested in such separate indexes
write a letter to the Publisher who can then determine the feasibility
of separate distribution.
