INDEX TO VOLUME XV

Abel, John J., and Nagagama, T. On the presence of histamine in extracts of the posterior lobe of the pituitary gland and on preliminary experiments with the pressor constituent. .................................................. 347
Aconitine, morphine, cocaine, quinine .................................................. 173
Action of gum acacia on the circulation, The ........................................... 29
Adrenaline, pilocarpine and atropine, A note on the action of, upon the tonus waves in the terrapin heart .......................................................... 23
Albumoses, decomposition products of, On histamine and a histamine-like substance as .......................................................... 401
American Society for Pharmacology and Experimental Therapeutics, Scientific proceedings of the .................................................. 233
Anesthetic properties of phenyl methyl carbinol, The local ................................ 129
Anesthetics, general, A study of the anurias occurring in normal animals during the use of the .................................................. 249
Antimony compounds, The trypanocidal action of ...................................... 453
Antipsyretics on the acuity of hearing, The effect of some ................................ 149
Anurias, A study of the, occurring in normal animals during the use of the general anesthetics .................................................. 249
Apparatus, A non-clotting blood pressure .................................................. 75
Arsenic compounds, The trypanocidal action of ........................................... 475
Arsphenamine, Further pharmacologic studies on ........................................... 279
Atropine, adrenaline and pilocarpine, A note on the action of, upon the tonus waves in the terrapin heart .................................................. 23
—— on chloroform hyperglycemia, Effect of .................................................. 135
Auricles, excised terrapin, The antagonistic actions of epinephrin and potassium chloride on the tonus and tonus waves of the .................................................. 271

Barbour, Henry G., and Maurer, Lloyd L. Tyramine as a morphine antag-
onist ........................................................................................................... 305
Bayliss, W. M. The action of gum acacia on the circulation ................................ 29
Bicek, J., Kucera, F. J., Hanson, W., and Hirschfelder, Arthur D. The effect of high temperature upon the action and toxicity of digitalis .................................................. 427
Bladder, Action on the .................................................................................. 189
Blood pressure apparatus, A non-clotting .................................................... 75
—— pressure in the unanesthetized dog, An indirect method for the determination of .................................................. 443
—— pressure tracings in man, Continuous ..................................................... 433
—— volume and blood volume methods ....................................................... 381
—— volume methods, Blood volume and ...................................................... 331
Bush, A. D. Drug perfusion of the medulla of the turtle. II. Aconitine, morphine, cocaine, quinine .................................................. 173
—— Perfusion of the medulla of the turtle. III. Epinephrin ................................ 297

THE JOUR. OF PHARM. AND EXPER. THERAP., VOL. XV, NO. 5
INDEX

Carbinols, other phenyl, The local anesthetic actions of saligenin and... 261
Cat's uterus, The reaction of the, to strophanthus and calcium.......... 181
Calcium, The reaction of the cat's uterus to strophanthus and... 181
Chemotherapy, Quantitative studies in........................................ 453, 475
Chloral, The action of, on the pupil............................................. 415
Chloroform hyperglycemia, Effect of atropine on............................. 135
Circulation, The action of gum acacia on the................................... 29
Clotting efficiency of thromboplastic agents, Comments on the........ 167
Cocaine, aconitine, morphine, quinine........................................ 173
Connet, Helene, and Salant, William. The influence of heavy metals on the isolated frog heart..................................................... 217
Continuous blood pressure tracings in man..................................... 433
Crawford, Albert C. A pressor compound from the pituitary gland.... 81
Cushny, A. R. On optical isomers. V. The tropeines......................... 105
Cyanogen chloride, The mechanism of the toxic action of.................. 301
Decomposition products of albumoses, On histamine and a histamine-like substance as................................................................. 401
Dichlorethylsulphide, An apparatus for the exposure of skin or mucous membrane to the vapor of toxic substances, with observations on... 95
- (mustard gas), The minimum concentration of, effective for the eyes of man.............................................................. 77
Epinephrin and potassium chloride, The antagonistic actions of, on the tonus and tonus waves of the excised terrapin auricles........ 271
Eyster, J. A. E., and Mauer, Mary E. An apparatus for the exposure of skin or mucous membrane to the vapor of toxic substances, with observations on dichlorethylsulphide........................................ 95
Edmunds, Charles W. The point of attack of certain drugs on the periphery. II. Action on the retractor penis muscle of the dog.... 201
- and Roth, George B. The point of attack of certain drugs acting on the periphery. I. Action on the bladder............... 189
Epinephrin................................................................. 297
Epinephrin and potassium chloride, The antagonistic actions of, on the tonus and tonus waves of the excised terrapin auricles........ 271
Eyster, J. A. E., and Mauer, Mary E. An apparatus for the exposure of skin or mucous membrane to the vapor of toxic substances, with observations on dichlorethylsulphide........................................ 95
Fenger, Frederic. Comments on the clotting efficiency of thromboplastic agents................................................................. 167
Frog heart, isolated, The influence of heavy metals on the............ 217
Fumes of iodine, The physiological action of................................ 1
INDEX

Gland, pituitary, A pressor compound from the ........................................ 81
—, pituitary, On the presence of histamine in extracts of the posterior lobe of the, and on preliminary experiments with the pressor constituent .................................................. 347
Greenberg, J., Macht, D. I., and Isaacs, S. The effect of some antipyretics on the acuity of hearing ................................................................. 149
Gruber, Charles M. A note on the action of pilocarpine, atropine, and adrenaline upon the tonus waves in the terrapin heart .......................... 23
— IV. The antagonistic actions of epinephrin and potassium chloride on the tonus and tonus waves in the excised terrapin auricles .... 271
Gum acacia, The action of, on the circulation ............................................. 29

Hanson, W., Hirschfelder, Arthur D., Bicek, J., and Kucera, F. J. The effect of high temperature upon the action and toxicity of digitalis .... 427
Hearing, The effect of some antipyretics on the acuity of ...................................... 149
Heart, isolated frog, The influence of heavy metals on the ................................ 217
—, terrapin, A note on the action of pilocarpine, atropine and adrenaline upon the tonus waves in the ................................................... 23
High temperature, The effect of, upon the action and toxicity of digitalis .......... 427
Hirschfelder, A. D., Lundholm, A., and Norrgard, H. The local anesthetic actions of saligenin and other phenyl carbinols .................................. 261
—, Bicek, J., Kucera, F. J., and Hanson, W. The effect of high temperature upon the action and toxicity of digitalis ........................................ 427
Histamine, On, and a histamine-like substance as decomposition products of albumoses ................................................................. 401
—, On the presence of, in extracts of the posterior lobe of the pituitary gland and on preliminary experiments with the pressor constituent ... 347
Histamine-like substance as decomposition products of albumoses, On histamine and a ................................................................. 401
Hjort, Axel M., and Kaufmann, Charles E. The local anesthetic properties of phenyl methyl carbinol ................................................. 129
Human skin, Iodine absorption from the ........................................................ 169
Hyatt, E. G., McGuigan, Hugh, and Rettig, F. A. The action of chloral on the pupil ................................................................. 415
Hyperglycemia, chloroform, Effect of atropine on ........................................ 135

Indirect method, An, for the determination of blood pressure in the unanesthesia dog ................................................................. 443
Iodine absorption from the human skin ...................................................... 169
—, fumes of, The physiological action of .................................................. 1
Isaacs, S., Macht, D. I., and Greenberg, J. The effect of some antipyretics on the acuity of hearing ...................................................... 149
Isomera, On optical ................................................................. 105

Kaufmann, Charles E., and Hjort, Axel M. The local anesthetic properties of phenyl methyl carbinol ................................................. 129
Koch, F. C., Schroeder, W. F., Weiland, A. H., and Luckhardt, A. B. The physiological action of the fumes of iodine .................................. 1
Kolls, A. C. An indirect method for the determination of blood pressure in the unanesthetized dog. ........................................... 443
—— Continuous blood pressure tracings in man: An apparatus .......... 433
Kucera, F. J., Hanson, W., Hirschfelder, Arthur D., and Bicek, J. The effect of high temperature upon the action and toxicity of digitalis 427

Lamson, Paul Dudley. A non-clotting blood pressure apparatus ........ 75
—— and Nagayama, Takeyoshi. Blood volume and blood volume methods. 331
Luckhardt, A. B., Koch, F. C., Schroeder, W. F., and Weiland, A. H. The physiological action of the fumes of iodine .................................. 1
Lundholm, A., Norrgard, H., and Hirschfelder, A. D. The local anesthetic actions of saligenin and other phenyl carbinols .................. 261

MacNider, William de B. A study of the anurias occurring in normal animals during the use of the general anesthetics ..................... 249
McGuigan, Hugh, Rettig, F. A., and Hyatt, E. G. The action of chloral on the pupil ....................................................... 415
Macht, D. I., Greenberg, J., and Isaacs, S. The effect of some antipyretics on the acuity of hearing ............................................. 149
Man, Continuous blood pressure tracing in .................................. 433
Maurer, Lloyd L., and Barbour, Henry G. Tyramine as a morphine antagonist ................................................................. 305
Maver, Mary E., and Eyster, J. A. E. An apparatus for the exposure of skin or mucous membrane to the vapor of toxic substances, with observations on dichlorethylsulphide .................................. 95
Medulla of the turtle, Drug perfusion of the .................................. 173
—— of the turtle, Perfusion of the ............................................. 297
Morphine, aconitine, cocaine, quinine ........................................ 173
—— antagonist, Tyramine as a .................................................. 305
Mucous membrane, An apparatus for the exposure of skin or, to the vapor of toxic substances, with observations on dichlorethylsulphide .................................. 95

Nagayama, T. On histamine and a histamine-like substance as decomposition products of albumoses ...................................... 401
—— and Abel, John J. On the presence of histamine in extracts of the posterior lobe of the pituitary gland and on the preliminary experiments with the pressor constituent ............................................. 331

Non-clotting blood pressure apparatus, A ..................................... 75
Norrgard, H., Hirschfelder, A. D., and Lundholm, A. The local anesthetic actions of saligenin and other phenyl carbinols .................. 261

Optical isomers, On ............................................................... 105
Penis muscle, the retractor, Action on, of the dog .......................... 201
Perfusion of the medulla of the turtle ......................................... 297
Periphery, The point of attack of certain drugs acting on the .......... 189, 201
INDEX

Pharmacologic studies, Further, on arsphenamine .................................. 279
Phenyl carbinols, other, The local anesthetic actions of saligenin and ...... 261
—— methyl carbinol, The local anesthetic properties of ................................ 129
Physiological action of the fumes of iodine, The ........................................ 1
Pilocarpine, atropine and adrenaline, A note on the action of, upon the
tonus waves in the terrapin heart .............................................................. 23
Pituitary gland, A pressor compound from the ............................................. 81
—— gland, On the presence of histamine in extracts of the posterior lobe
of the, and on preliminary experiments with the pressor constituent ............ 347
Potassium chloride, The antagonistic actions of epinephrin and, on the
tonus and tonus waves of the excised terrapin auricles ................................ 271
Pressor compound from the pituitary gland, A ............................................ 81
—— constituent, on preliminary experiments with the, On the presence of
histamine in the posterior lobe of the pituitary gland and ................................ 347
Proceedings, Scientific, of the American Society for Pharmacology and Ex-
perimental Therapeutics ................................................................. 233
Quantitative studies in chemotherapy. Carl Voegtlín and Homer W.
Smith ........................................................................................................ 233
Foreign protein therapy. Clyde Brooks ...................................................... 234
The point of attack of certain drugs acting on the periphery. Charles W.
Edmunds .................................................................................................. 234
The effect of acids and of alkalies on renal function and pathology. Wm.
de B. MacNider ........................................................................................ 234
Observations on the toxicity of acetone administered intravenously.
Benj. H. Scholomovitz and E. G. Seybold .............................................. 234
Comparative toxicity of thymol and carvacrol. A. E. Livingston ............ 234
The comparative toxicity and physiological activity of cadmium and
zinc. C. L. Alsberg and E. W. Schwartze ............................................. 235
The toxicity of strychnine for genus Mus, together with a note on its
possible biological and neurological significance. E. W. Schwartze. 235
Experiments on the toxicity of picric acid on the frog, and on the rabbit.
E. D. Brown, Jacob Ahfs and Merrill Howard ........................................ 235
Further observations on the pharmacology of chelidonine. P. J. Hanzlik 236
The local anesthetic action of saligenin and other phenyl carbinols.
Arthur D. Hirschfelder, Arthur Lundholm and Henry Norrgard ........... 237
The effect of high temperatures upon the action and toxicity of digitalis.
Arthur D. Hirschfelder, J. Bicek and F. J. Kucera .................................. 238
Experimental drug addiction. M. L. Bonar and Torald Sollmann ........... 238
Further observations on ether hyperglycemia in the absence of the ad-
renals. G. N. Stewart and J. M. Rogoff ................................................. 238
The cumulative action of the digitalis principles. Preliminary com-
munication. Thomas S. Githens ........................................................... 239
A simplified method for the estimation of morphine together with data
on the distribution of the alkaloid in acute poisoning. Sergius
Morgulis and V. E. Levine ................................................................. 240
Observations upon the intraperitoneal injection of fixed oil as a vehicle
for administering fat soluble substances. E. W. Schwartze .................. 240
On the toxicologic action of ureids of N-phenylglycine-p-arsonic acid with special reference to the b-methyl ureid. Louise Pearce and Wade H. Brown .............................................. 240

On the therapeutic action of ureids of N-phenylglycine-p-arsonic acid in trypanosome and spirochete infections. Louise Pearce and Wade H. Brown .............................................. 242

Concerning the presence of spirocheticidal action in a group of drugs which possess no trypanocidal action in vivo. Wade H. Brown and Louise Pearce .............................................. 243

A pharmacodynamic analysis of Straub's morphine reaction. David I. Macht .............................................. 243

A study of local anesthetics in respect to their antiseptic properties. D. I. Macht and Y. Satani .............................................. 244

The influence of heavy metals on the isolated heart. William Salant and H. Connet .............................................. 245

Studies in anaphylaxis concerning the mechanism of the anaphylaxis reaction. Maurice I. Smith .............................................. 245

The pharmacologic chemistry of digitalis. Thomas S. Githens .............................................. 245

Anaphylactoid phenomena. Paul J. Hanzlik and Howard T. Karsner .............................................. 246

The determination of the circulation time in animals and man. S. Loevenhart, Benj. H. Scholomovitz and E. G. Seybold .............................................. 246

Hemagglutination in vitro by agents which produce anaphylactoid symptoms. Howard T. Karsner and Paul J. Hanzlik .............................................. 247

The pharmacological action of subdural injection of trikresol serum. A. E. Livingston .............................................. 247

Pupil, The action of chloral on the.............................................. 415

Quantitative studies in chemotherapy .............................................. 453, 475

Quinine, aconitine, morphine, cocaine .............................................. 173

Ransom, Fred. The reaction of the cat's uterus to strophanthus and calcium .............................................. 181

Reed, C. I. The mechanism of the toxic action of cyanogen chloride .............................................. 301

—— The minimum concentration of dichloethlysulphide (mustard gas) effective for the eyes of man .............................................. 77
