

INDEX TO VOLUME XIX

Acetone, Pharmacological studies on.....	293
Adrenalin hyperglycemia, A note on, in man.....	215
—, Perfusion of the medulla of the terrapin (<i>Pseudomys troosti</i>) with....	131
Adrenals, The action of drugs on the output of epinephrin from the.....	59
—, The influence of morphine on normal cats and on cats deprived of the greater part of the, with special reference to body temperature, pulse and respiratory frequency and blood sugar content.....	97
—, The influence of muscular exercise on normal cats compared with cats deprived of the greater part of the; with special reference to body temperature, pulse and respiratory frequency.....	87
Agglutination, Biological reactions of arsphenamine. III. Its immediate toxicity as contrasted with its late ill effects, and the rôle of, in the production of the former.....	393
Albino rat, Changes with advancing age in the resistance of the, to arsenic....	331
— rat, The relative toxicity of germanium and arsenic for the.....	337
— rats, Studies of chronic intoxications on, VI. Lead carbonate.....	375
Animal calorimetry. The influence of morphine upon heat production in the dog.....	359
Arsenic, Changes with advancing age in the resistance of the albino rat to....	331
—, The relative toxicity of germanium and, for the albino rat.....	337
Arsphenamine, Biological reactions of.....	187, 199, 393
—, The hemolytic properties of, and fifteen allied compounds.....	343
—, The mechanism of its agglutinative action on red blood cells in vitro....	187
—, The protective action of hydrophilic colloids on the agglutination of red blood cells by.....	199
Biological reactions of arsphenamine.....	187, 199
Blood concentration, The influence of purgatives upon.....	135
—, concentration, The influence upon, of Vaughan's crude soluble poison...	179
— concentration, The relation of, to peptone shock.....	163
— sugar content, The influence of morphine on normal cats and on cats deprived of the greater part of the adrenals with special reference to body temperature, pulse and respiratory frequency and.....	97
Body temperature, The influence of morphine on normal cats and on cats deprived of the greater part of the adrenals with special reference to, pulse and respiratory frequency and blood sugar content.....	97
— temperature, The influence of muscular exercise on normal cats compared with cats deprived of the greater part of the adrenals, with special reference to, pulse and respiratory frequency.....	87
Calorimetry, Animal. The influence of morphine upon heat production in the dog.....	359

- Cats, normal, The influence of morphine on, and on cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and respiratory frequency and blood sugar content. 97
- , normal, The influence of muscular exercise on, compared with cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and respiratory frequency. 87
- Chanutin, Alfred, and Lusk, Graham. Animal calorimetry. The influence of morphine upon heat production in the dog. 359
- Circulation, The action of diphtheria toxin upon the. 1
- time, The determination of the, in rabbits and dogs and its relation to the reaction time of the respiration to sodium cyanide. 221
- Colloids, hydrophilic, The protective action of, on the agglutination of red blood cells by arsphenamine. 199
- Contents, blood sugar, The influence of morphine on normal cats and on cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and respiratory frequency and. 97
- Cyanide, sodium, The action of respiratory stimulants upon the respiration when depressed by increased intracranial pressure with special reference to. 13
- , sodium, The determination of the circulation time in rabbits and dogs and its relation to the reaction time of the respiration to. 221
- Diphtheria toxin, The action of, upon the circulation. 1
- Dog, The influence of morphine upon heat production in the. 359
- Dogs, The determination of the circulation time in rabbits and, and its relation to the reaction time of the respiration to sodium cyanide. 221
- Douglas, Ethel, and Oliver, Jean. Biological reaction of arsphenamine. I. The mechanism of its agglutinative action on red blood cells. 187
- Drugs, The action of, on the output of epinephrin from the adrenals. VIII. Morphine 59
- Epinephrin, The action of drugs on the output of, from the adrenals. VIII. Morphine. 59
- Errico, Louis, and Underhill, Frank P. The influence of purgatives upon blood concentration. 135
- Exercise, muscular, The influence of, on normal cats compared with cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and respiratory frequency. 87
- Frequency, respiratory, The influence of morphine on normal cats and on cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and, and blood sugar content. 97
- , respiratory, The influence of muscular exercise on normal cats compared with cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and. 87
- Germanium, The relative toxicity of, and arsenic for the albino rat 337
- Goldberg, Morris, and Gunn, J. W. C. The action of salicylates on the uterus. 207

- Grabfield, G. P. The hemolytic properties of arsphenamine and fifteen allied compounds..... 343
- Gunn, J. W. C., and Goldberg, Morris. The action of salicylates on the uterus..... 207
- Hammett, F. S., Muller, J. H., and Nowrey, J. E., Jr. The relative toxicity of germanium and arsenic for the albino rat..... 337
- and Nowrey, J. E., Jr. Changes with advancing age in the resistance of the albino rat to arsenic.....
- Hatcher, Robert A., and Weiss, Soma. Studies on strychnin..... 419
- Heat production, The influence of morphine upon, in the dog..... 359
- Heinekamp, W. J. R. Perfusion of the medulla of the terrapin (*Pseudomys troosti*) with adrenalin..... 131
- The action of potassium salts on the medulla as shown by perfusion of the medulla of the terrapin (*Pseudomys troosti*) with potassium salts.. 239
- Hemolytic properties of arsphenamine, The, and fifteen allied compounds.... 343
- Hjoit, Axel M., and Underhill, Frank P. Studies on the physiological action of some protein derivatives. IV. The toxicity of Vaughan's crude soluble poison..... 145
- Hydrophilic colloids, The protective action of, on the agglutination of red blood cells by arsphenamine..... 199
- Hyperglycemia, adrenalin, A note on, in man..... 215
- Intracranial pressure, The action of respiratory stimulants upon the respiration when depressed by increased, with special reference to sodium cyanide..... 13
- Kleitman, Nathaniel, and Salant, William. Pharmacological studies on acetone..... 293
- and Salant, William. Some observations on the action of mercury..... 315
- and Salant, William. The toxicity of skatol..... 307
- Lead carbonate, Studies of chronic intoxications on albino rats. VI..... 375
- Liver function test, An improved method for using phenoltetrachlorophthalein as a..... 385
- Loevenhart, A. S., Malone, J. Y., and Martin, H. G. Studies on stimulation of the respiration: The action of respiratory stimulants upon the respiration when depressed by increased intracranial pressure with special reference to sodium cyanide..... 13
- , Schlomovitz, B. H., and Seybold, E. G. The determination of the circulation time in rabbits and dogs and its relation to the reaction time of the respiration to sodium cyanide..... 221
- Lusk, Graham, and Chanutin, Alfred. Animal calorimetry. The influence of morphine upon heat production in the dog..... 359
- Man, A note on adrenalin hyperglycemia in 215
- Malone, J. Y., Loevenhart, A. S., and Martin, H. G. Studies on stimulation of the respiration: The action of respiratory stimulants upon the respiration when depressed by increased intracranial pressure with special reference to sodium cyanide..... 13

- Martin, H. G., Loevenhart, A. S., and Malone, J. Y. Studies on stimulation of the respiration: The action of respiratory stimulants upon the respiration when depressed by increased intracranial pressure with special reference to sodium cyanide..... 13
- Medulla of the terrapin (*Pseudomys troosti*), Perfusion of the, with adrenalin..... 131
- , The action of potassium salts on the, as shown by perfusion of the medulla of the terrapin (*Pseudomys troosti*) with potassium salts.... 239
- Mercury, Some observations on the action of..... 315
- Morphine..... 59
- , The influence of, on normal cats and on cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and respiratory frequency and blood sugar content..... 97
- , The influence of, upon heat production in the dog..... 359
- Muller, J. H., Hammett, F. S., and Nowrey, J. E., Jr. The relative toxicity of germanium and arsenic for the albino rat..... 337
- Muscular exercise, The influence of, on normal cats compared with cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and respiratory frequency..... 87
- Nervous system, Functional evidence of the phylogeny of the, as shown by the behavior and resistance of the developing rat to strychnine.... 273
- Normal cats, The influence of morphine on, and on cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and respiratory frequency and blood sugar content..... 97
- cats, The influence of muscular exercise on, compared with cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and respiratory frequency..... 87
- Nowrey, J. E., Jr., and Hammett, F. S. Changes with advancing age in the resistance of the albino rat to arsenic..... 331
- , Hammett, F. S., and Muller, J. H. The relative toxicity of germanium and arsenic for the albino rat..... 337
- Oliver, Jean, and Douglas, Ethel. Biological reactions of arsphenamine. I. The mechanism of its agglutinative action on red blood cells in vitro... 187
- , and Yamada, So Sabro. Biological reactions of arsphenamine. II. The protective action of hydrophilic colloids on the agglutination of red blood cells by arsphenamine..... 199
- , and Yamada, So Sabro. Biological reactions of arsphenamine. III. Its immediate toxicity as contrasted with its late ill effects, and the rôle of agglutination in the production of the former..... 393
- Peptone shock, The relation of blood concentration to..... 163
- Pharmacological studies on acetone..... 293
- Phenoltetrachlorphthalein, an improved method for using, as a liver function test..... 385
- Phylogeny of the nervous system, Functional evidence of the, as shown by the behavior and resistance of the developing rat to strychnine..... 273

Physiological action of some protein derivatives, Studies on the.....	145, 163, 179
Potassium salts, The action of, on the medulla as shown by perfusion of the medulla of the terrapin (<i>Pseudomys troosti</i>) with potassium salts.....	239
Pressure, intracranial, The action of respiratory stimulants upon the respiration when depressed by increased, with special reference to sodium cyanide.....	13
Proceedings, Scientific, of the American Society for Pharmacology and Experimental Therapeutics.....	247
Observations on the physiology of vomiting. Robert Hatcher and Soma Weiss.....	247
Influence of various factors on the excretion and decomposition of hexamethylenamine. P. J. Hanzlik and Floyd De Eds.....	247
Experimental plumbism: Therapeutic efficiency of some agents, and comparative toxicity of certain metals. P. J. Hanzlik, Mary McIntyre, and Elizabeth Presheo.....	248
Urinary excretion of salicyl after the administration of salicylates and salicyl esters. P. J. Hanzlik, Floyd DeEds, and Elizabeth Presheo..	248
A comparison of the antiseptic action of various aromatic ethoxy and hydroxy compounds upon the pneumococcus and the gonococcus. A. D. Hirschfelder and L. J. Pankow.....	248
Contribution to the ch-mico-pharmacodynamic relationship of atropine and homatropine. David I. Macht.....	251
Experimental inquiry into the narcotic properties of some polyhydric alcohols. D. I. Macht and Gin Ching Ting.....	252
Studies in the toxicity of aliphatic alcohols. J. C. Munch and E. W. Schwartze.....	252
Further studies on the action of mercury. William Salant and Nathaniel Kleitman.....	253
The pharmacology of citrates. William Salant and Nathaniel Kleitman..	254
The effects of sodium fluoride upon the calcium balance and the calcium content of the blood. Guy W. Clark.....	254
On the causation of experimental anaphylactic hemorrhages in the stomach. John Auer.....	255
Effect of caffeine on intestinal movements. O. H. Plant and C. Reynolds. 26	
Experiments with aconitine and barium on the isolated heart. William Salant and Nathaniel Kleitman.....	257
Summary of results from the treatment of human trypanosomiasis with tryparsamide. Louise Pearce and Wade H. Brown.....	257
Rate of excretion of arsenicals. A factor governing toxicity and parasitocidal action. Carl Voegtlin and J. W. Thompson.....	258
Effect of ligation of the ureters, or bile duct upon the toxicity and trypanocidal action of arsenicals. Carl Voegtlin, Helen A. Dyer, and Dorothy W. Miller.....	258
The significance of the marked variations in the toxicity of undissolved arsenious oxide. Erich W. Schwartze.....	258
Experiments dealing with certain effects of quinidine sulphate on the dog's heart. Alfred E. Cohn and Robert L. Levy.....	259
Observations on the action of cinchopen in human subjects with normal nucleic acid metabolism. G. P. Grabfield and J. H. Pratt.....	261

- Metabolism in chloroform poisoning. Frank P. Underhill and Robert Kapsinow..... 262
- A quantitative study of the toxicity of phenol derivatives for strongyloid larvae. W. H. Schultz..... 262
- The effect of certain drugs upon faradic sensibility. Worth Hale and G. P. Grabfield..... 262
- The toxicology of hydrogen sulphide. Howard W. Haggard..... 262
- Observations on the pharmacological action of quinidine. J. V. Lawrence, Alfred Friedlander and D. E. Jackson..... 263
- Clinical observations on quinidine. R. W. Scott..... 264
- A note on the action of silver salvarsan. D. E. Jackson and J. V. Lawrence..... 265
- The influence of veratrine and epinephrine on skeletal muscle. Theophile K. Kruse..... 266
- A study of oil of chenopodium and its components. A. E. Livingston.... 266
- Certain aspects of the part played by the liver in the regulation of the blood volume. Paul D. Lamson..... 267
- A proposed method of chemically assaying active principles of the digitalis groups. Arthur Knudson and Melvin Dresbach..... 268
- The action of certain drugs on respiration. Carl F. Schmidt and W. B. Harer..... 269
- The mechanism of cocaine fever. H. G. Barbour and M. D. Moise..... 270
- The physiological assay of pituitary extracts. * Erwin E. Nelson..... 270
- The action of pilocarpine upon sympathetic nerve endings. C. W. Edmunds..... 271
- Notes on the action of atropine. V. E. Henderson..... 271
- Quantitative studies of the colloidal properties of arsphenamine and allied products. G. W. Raiziss..... 271
- Penetration of kations into living cells. M. M. Brooks..... 272
- Prostate gland, Feeding experiments on tadpoles: and other substances... 353
- Protein derivatives, Studies on the physiological action of some.... 145, 163, 179
- (*Pseudomys troosti*), The action of potassium salts on the medulla as shown by perfusion of the medulla of the terrapin, with potassium salts... 239
- Pulse, The influence of morphine on normal cats and on cats deprived of the greater part of the adrenals, with special reference to body temperature, and respiratory frequency and blood sugar content..... 97
- , The influence of muscular exercise on normal cats compared with cats deprived of the greater part of the adrenals, with special reference to body temperature, and respiratory frequency..... 87
- Purgatives, The influence of, upon blood concentration..... 135
- Rabbits, The determination of the circulation time in, and dogs and its relation to the reaction time of the respiration to sodium cyanide..... 221
- Rat, albino, changes with advancing age in the resistance of the, to arsenic... 331
- , albino, The relative toxicity of germanium and arsenic for the..... 337
- , albino, Studies of chronic intoxications on. VI. Lead carbonate..... 375
- , Functional evidence of the phylogeny of the nervous system as shown by the behavior and resistance of the developing, to strychnine..... 273

- Rat, Observations upon the resistance of the, to consecutive injections of strychnine..... 49
- Reaction time, The determination of the circulation time in rabbits and dogs and its relation to the, of the respiration to sodium cyanide..... 221
- Red blood cells in vitro, the mechanism of its (arsphenamine) agglutinative action on..... 187
- blood cells, the agglutination of, by arsphenamine, The protective action of hydrophilic colloids on..... 199
- Resistance of the rat, Observations upon the, to consecutive injections of strychnine..... 49
- Respiration, Studies on stimulation of the, the action of respiratory stimulants upon the respiration when depressed by the increased intracranial pressure with special reference to sodium cyanide..... 13
- , The action of respiratory stimulants upon the, when depressed by increased intracranial pressure with special reference to sodium cyanide.. 13
- , The determination of the circulation time in rabbits and dogs and its relation to the reaction time of the, to sodium cyanide..... 221
- Respiratory frequency, The influence of morphine on normal cats and on cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and, and blood sugar content..... 97
- frequency, The influence of muscular exercise on normal cats compared with cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and..... 87
- stimulants, The action of, upon the respiration when depressed by increased intracranial pressure with special reference to sodium cyanide.. 13
- Ringer, Michael, and Underhill, Frank P. Studies on the physiological action of some protein derivatives. V. The relation of blood concentration to peptone shock..... 163
- , and Underhill, Frank P. Studies on the physiological action of some protein derivatives. VI. The influence upon blood concentration of Vaughan's crude soluble poison..... 179
- Rogoff, J. M., and Rosenberg, Wm. Feeding experiments on tadpoles: prostate gland and other substances..... 353
- , and Stewart, G. N. The action of drugs on the output of epinephrin from the adrenals. VIII. Morphine..... 59
- , and Stewart, G. N. The influence of morphine on normal cats and on cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and respiratory frequency and blood sugar content..... 97
- , and Stewart, G. N. The influence of muscular exercise on normal cats compared with cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and respiratory frequency... 87
- Rosenberg, Wm., and Rogoff, J. M. Feeding experiments on tadpoles: prostate gland and other substances..... 353
- Rosenthal, S. M. An improved method for using phenoltetrachlorphthalein as a liver function test..... 385
- Rypins, Harold, and Ulrich, Henry L. A note on adrenalin hyperglycemia in man..... 215

Salant, William, and Kleitman, Nathaniel. Pharmacological studies on acetone.....	293
—, and Kleitman, Nathaniel. Some observations on the action of mercury.....	315
— and Kleitman, Nathaniel. The toxicity of skatol.....	307
Salicylates, The action of, on the uterus.....	207
Salts, potassium, The action of, on the medulla as shown by perfusion of the medulla of the terrapin (<i>Pseudomys troosti</i>) with potassium salts.....	239
Schlomovitz, B. H., Loevenhart, A. S., and Seybold, E. G. The determination of the circulation time in rabbits and dogs and its relation to the reaction time of the respiration to sodium cyanide.....	221
Schwartz, Erich W. Functional evidence of the phylogeny of the nervous system as shown by the behavior and resistance of the developing rat to strychnine.....	273
— Observations upon the resistance of the rat to consecutive injections of strychnine.....	49
Seybold, E. G., Loevenhart, A. S., and Schlomovitz, B. H. The determination of the circulation time in rabbits and dogs and its relation to the reaction time of the respiration to sodium cyanide.....	221
Skatol, The toxicity of.....	307
Sodium cyanide, The action of respiratory stimulants upon the respiration when depressed by increased intracranial pressure with special reference to.....	13
—, cyanide, The determination of the circulation time in rabbits and dogs and its relation to the reaction time of the respiration to.....	221
Sollmann, Torald. Studies of chronic intoxications on albino rats. VI. Lead carbonate.....	375
Stewart, G. N., and Rogoff, J. M. The action of drugs on the output of epinephrin from the adrenals. VIII. Morphine.....	59
—, and Rogoff, J. M. The influence of morphine on normal cats and on cats deprived of the greater part of the adrenals, with special reference to body temperature, pulse and respiratory frequency and blood sugar content.....	97
—, and Rogoff, J. M. The influence of muscular exercise on normal cats compared with cats deprived of the greater part of the adrenals with special reference to body temperature, pulse and respiratory frequency..	87
Stimulants, respiratory, The action of, upon the respiration when depressed by increased intracranial pressure with special reference to sodium cyanide.....	13
Strychnin, Studies on.....	419
Strychnine, Functional evidence of the phylogeny of the nervous system as shown by the behavior and resistance of the developing rat to.....	273
—, Observations upon the resistance of the rat to consecutive injections of.....	49
Tadpoles, Feeding experiments on: prostate gland and other substances.....	353
Temperature, body, The influence of morphine on normal cats and on cats deprived of the greater part of the adrenals with special reference to, pulse and respiratory frequency and blood sugar content.....	97

- Temperature, body, The influence of muscular exercise on normal cats compared with cats deprived of the greater part of the adrenals, with special reference to, pulse and respiratory frequency..... 87
- Terrapin (*Pseudomys troosti*), Perfusion of the medulla of the, with adrenalin..... 131
- (*Pseudomys troosti*) The action of potassium salts on the medulla as shown by perfusion of the medulla of the, with potassium salts..... 239
- Toxicity, Biological reactions of arsphenamine. III. Its immediate, as contrasted with its late ill effects, and the rôle of agglutination in the production of the former..... 393
- , The, of skatol..... 307
- , The, of Vaughan's crude soluble poison..... 145
- , The relative, of germanium and arsenic for the albino rat..... 337
- Toxin, diphtheria, The action of, upon the circulation..... 1
- Ulrich, Henry L., and Rypens, Harold. A note on adrenalin hyperglycemia in man..... 215
- Underhill, Frank P., and Errico, Louis. The influence of purgatives upon blood concentration..... 13
- , and Hjort, Axel M. Studies on the physiological action of some protein derivatives. IV. The toxicity of Vaughan's crude soluble poison.... 5
- , and Ringer, Michael. Studies on the physiological action of some protein derivatives. V. The relation of blood concentration to peptone shock..... 163
- , and Ringer, Michael. Studies on the physiological action of some protein derivatives. VI. The influence upon blood concentration of Vaughan's crude soluble poison..... 179
- Uterus, The action of salicylates on the..... 207
- Vaughan's crude soluble poison, The influence upon blood concentration of... 179
- crude soluble poison, The toxicity of..... 145
- Weiss, Soma, and Hatcher, Robert A. Studies on strychnin..... 419
- Yabe, S. The action of diphtheria toxin upon the circulation..... 1
- Yamada, So Sabro, and Oliver, Jean. Biological reactions of arsphenamine. II. The protective action of hydrophilic colloids on the agglutination of red blood cells by arsphenamine..... 1, 99
- , and Oliver, Jean. Biological reactions of arsphenamine. III. Its immediate toxicity as contrasted with its late ill effects, and the rôle of agglutination in the production of the former..... 393
