At various times, Pharmacological Reviews has addressed such subjects as biochemical and cellular pharmacology, drug metabolism and disposition, renal pharmacology, neuropharmacology, behavioral pharmacology, clinical pharmacology, and toxicology. Designed specifically as a medium through which those interested in these topics can communicate directly, Pharmacological Reviews serves the entire pharmacological community and is vital reading for physiologists, pharmacologists, and biological chemists.

The Journal of Pharmacology and Experimental Therapeutics

A Publication of the American Society for Pharmacology and Experimental Therapeutics, Inc.

Editor: Eva King Killam, PhD
School of Medicine, University of California, Davis
Founded by John J. Abel in 1909.

This is one of the most prestigious journals in scientific research. Publishing original research articles on all aspects of the interactions of chemical and biological systems, The Journal of Pharmacology and Experimental Therapeutics is extremely useful for the academic or clinical pharmacist. In addition, it has broad relevance for pharmaceutical research laboratories and anesthesiologists. Readers will find full coverage of autonomic, behavioral, cardiovascular, cellular, clinical, developmental, gastrointestinal, immuno-, neuro-, pulmonary, and renal pharmacology. Other areas include analgesia, drug abuse, drug metabolism and distribution, chemotherapy, and toxicology. Each issue of this monthly periodical averages over 200 pages and presents the best in research being published in pharmacology and therapeutics.
Tap into the broadest international coverage of the most rapidly growing branch of biological science

The Journal of Neuroscience
the Official Journal of the Society for Neuroscience

You need The Journal of Neuroscience NOW, because there's no better way to keep up with crucial advances that affect your work.

You need its interdisciplinary coverage, its scouting of findings in all areas of neuroscience. You'll appreciate the way it mirrors the objectives of the North American Society for Neuroscience, as well as the Societies in Europe and Japan. And the way it keeps you absolutely up-to-date, no matter where significant breakthroughs occur.

Here's a sampling of recent* articles:
- Morphology and Synaptic Connections of Ultrafine Primary Axons in Lamina I of the Spinal Dorsal Horn: Candidates for the Terminal Axonal Arbors of Primary Neurons with Unmyelinated (C) Axons
- In Vitro Resetting of the Circadian Clock in the Aplysia Eye
- Rohon-Beard Neurons Arise from a Substitute Ancestral Cell after Removal of the Cell from Which They Normally Arise in the 16-Cell Frog Embryo
- Postnatal Development of Dopaminergic Neurons in the Rabbit Retina
- Brain Peptidase with a Unique Neuronal Localization: The Histochemochemical Distribution of Dipeptidyl—aminopeptidase II
- Developmental Stage-specific Changes in Lectin Binding to Mouse Cerebellar Cells In Vitro
- The Laminar Origin and Distribution of the Crossed Tectoreticular Pathways

Encourage your library to subscribe, and start using this first-rate journal. The institutional fee for a year's subscription is $230.00. Once your department or institution subscribes, you can subscribe for the discount individual rate of $60.00.

2 PULSE DIGITAL STIMULATOR

GRASS MODEL S11 SPECIFICATIONS

QUARTZ TIMED DIGITAL PARAMETERS ARE COMPUTER PROGRAMMABLE

TRAIN INTERVAL
- SINGLE
- REPEAT - 1 MS to 100 SEC

TRAIN DURATION
- 1 MS to 10 SEC

PULSE INTERVAL
- SINGLE
- REPEAT - 100 μS to 100 SEC

PULSE DURATION (S₁, S₂)
- 10 μS to 10 SEC

PULSE DELAY
- 10 μS to 10 SEC

OUTPUTS (Two)
- S₁: .01 to 150V (+)
- S₂: .01 to 150V (+)
- Independent Amplitudes
- Biphasic with two SIUs

FUNCTIONS
- S₁ Off-On
- S₂ Off-On
- Delay - S₁ + S₂ simultaneously
- S₁ - Delay - S₂
- S₁ - Delay - S₁

ISOLATION UNITS (Optional)
- SIU5 - Radio Frequency Isolation
- SIU6 - D.C. Optical Isolation
- SIU7 - A.C. for human stimulus optical capacity coupled.

SYNC IN
- To Pulse Delay
- To Train Duration

SYNC OUT
- Train
- Pulse
- Delay

MONITORS
- S₁ and S₂ LED's
- S₁ + S₂ BNC Out

PHYSICAL SIZE
- 19" W x 5.25" H x 8.5" D
- Weight 19 lbs.
Contents Continued from iii

Inhibition of Acid Secretion in Isolated Canine Parietal Cells by Prostaglandins. Marcia L. Skoglund, Alan S. Nies and John G. Gerber .................................................. 371

Regional Renal and Splanchnic Blood Flows during Nicotine Infusion: Effects of Alpha and of Combined Alpha and Beta Adrenergic Blockade. H. Fred Downey, George J. Crystal and Fouad A. Bashour .................................................. 375

Specific Inhibition of Calcium Channels by Calcium Ions in Smooth Muscle. Leon Hurwitz, Linda J. Mcguffie, Peggy M. Smith and Sally A. Little .................................................. 382

Apomorphine-Induced Aggression in Rats Chronically Treated with Oral Clonidine: Modulation by Central Serotoninergic Mechanisms. Richard A. Hahn, Martin D. Hynes and Ray W. Fuller .................................................. 389

Relationship of Tissue Nonprotein Sulfhydryls to the Acute Toxic Effects of 1,2-Dibromo-3-Chloropropane. William M. Kluwe, Arnold Greenwell and Frank Harrington .................................................. 399

Alteration in Sensitivity to Isoproterenol and Acetylcholine in the Rat Heart after Repeated Administration of Isoproterenol. Yasuyuki Nomura, Hiroko Kajiyama and Tomio Segawa .................................................. 411

The Renin-Angiotensin System in Aminoglycoside-Induced Acute Renal Failure. Friedrich C. Luft, George R. Aronoff, Andrew P. Evan, Bret A. Connors, Myron H. Weinberger and Stuart A. Kleit .................................................. 433

Effects of Encainide and Metabolites (MJ14030 and MJ9444) on Canine Cardiac Purkinje and Ventricular Fibers. Victor Elharrar and Douglas P. Zipes .................................................. 440

Erratum ................................................................................................................................. 447

Manual Of Clinical Pharmacology
Edited by David Robertson, MD, and Craig R. Smith, MD

It is well known that a core armamentarium of several dozen key drugs will suffice for the vast majority of clinical situations. This handy new manual gives you the most thorough understanding possible of the drugs commonly used in clinical practice, and supplies an annotated bibliography on these drugs as a point of access to the more detailed pharmacological literature. The discussion sections are not intended to be complete reviews. They are provided to quickly identify drugs which are practical, difficult, or new. You have to have some knowledge of all of the thousands of drugs on the market . . . but you should have a very thorough understanding of the few dozen drugs that are most frequently used. This little book highlights those areas that are truly most important to you.

1981/about 368 pages/$17.00 (softcover)/7300-1

Practical Clinical Psychopharmacology Second Edition
William S. Appleton, MD and John M. Davis, MD

"The authors, who possess impeccable credentials, have put together a handbook that is reliable, responsible, judicious, careful, and practical."
— from a review of the First Edition in Modern Medicine

The authors call their book "a practical guide based on solid science." You will find it to be an indispensable manual of the latest clinical applications of psychopharmacology.

This new Second Edition distills the essential information from more than 15,000 published articles. It succinctly covers the diverse aspects of psychopharmacology and deals with the major categories of useful pharmacotherapeutic agents. Practical Clinical Psychopharmacology will provide you with all the latest information so you can prescribe psychotropic drugsrationally and counter side-effects efficiently.
