THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS (ISSN 0022-3565) is published monthly by The American Society for Pharmacology and Experimental Therapeutics, 428 E. Preston Street, Baltimore, MD 21202. Annual dues includes $60.00 for journal subscription. Second class postage paid at Baltimore, MD and at additional mailing offices. Postmaster send address changes (Form 3579) to Williams & Wilkins, 428 E. Preston St., Baltimore, MD 21202. Indexed by Current Contents and Index Medicus. Subscription rates $120.00 ($140.00 foreign); institutions $185.00 ($185 foreign) single copy $14.00 ($16.00 foreign). Copyright © 1982 by The American Society for Pharmacology and Experimental Therapeutics
"CARDIOMAX" model II-R is the only computer which can measure cardiac output of rats (and also guinea pigs, rabbits, dogs, chickens, humans and horses). For rats, it uses unique Columbus Instruments thermodilution microprobes 1/3 mm in size.

It also measures systolic, diastolic and mean blood pressures and heart rate up to 1000 beats/minute. Stroke volumes is also automatically computed.

Why Measure Cardiac Output of Rats?
Development of salt sensitive and salt resistive strains of rats provided inexpensive models for studying hypertension. Dynamics of rat circulatory system is similar to dogs or humans. Studies on rats cost only a fraction of studies using dogs.

Automatic Measurements Without Supervision
All parameters (cardiac output, stroke volume, three blood pressures, blood temperature, heart rate, time of day) can automatically be measured periodically and printed when using "CARDIOMAX-II-R" with Columbus Instruments Automatic Injector and Printer.

Manual Of Clinical Pharmacology

Edited by David Robertson, MD, and Craig R. Smith, MD

It is well known that a core armamentarium of several dozen key drugs will suffice for the vast majority of clinical situations. This handy new manual gives you the most thorough understanding possible of the drugs commonly used in clinical practice, and supplies an annotated bibliography on these drugs as a point of access to the more detailed pharmacological literature. The discussion sections are not intended to be complete reviews. They are provided to quickly identify drugs which are practical, difficult, or new. You have to have some knowledge of all of the thousands of drugs on the market... but you should have a very thorough understanding of the few dozen drugs that are most frequently used. This little book highlights those areas that are truly most important to you.

1981/about 368 pages/$17.00 (softcover)/7300-1

Practical Clinical Psychopharmacology

Second Edition

William S. Appleton, MD and John M. Davis, MD

"The authors, who possess impeccable credentials, have put together a handbook that is reliable, responsible, judicious, careful, and practical."

—from a review of the First Edition in Modern Medicine

The authors call their book "a practical guide based on solid science." You will find it to be an indispensable manual of the latest clinical applications of psychopharmacology.

This new Second Edition distills the essential information from more than 15,000 published articles. It succinctly covers the diverse aspects of psychopharmacology and deals with the major categories of useful pharmacotherapeutic agents. Practical Clinical Psychopharmacology will provide you with all the latest information so you can prescribe psychotropic drugs rationally and counter side-effects efficiently.

1980/173 pages/illustrated/$15.95/0238-4
NEW offer from the oldest and largest truly international book club.

"A Better Way to Buy Books."
The Academic Book Club has expanded the idea of a traditional book club into a completely new and unique concept.

SAVE 20–40% ON ANY BOOK IN PRINT!

Save up to 80% on selected titles.

- NO GIMMICKS
- NO HIDDEN CHARGES
- AND NO HARD SELL

Just Low, Low Prices Every Day of the Year;
Unlimited Choice of Books;
And Fast, Efficient, Personal Service on Every Order.

Asia: 78, First Cross Street, Colombo II, Sri Lanka
Africa: P.O. Box 159, Ilaro, Ogun State, Nigeria

Dear ABC,
Please tell me, without any obligation on my part, how I can order for myself and for my friends anywhere in the world any book in print, from any publisher, from any country, in almost any language.
Tell me in addition how I can save 20–40% on these books joining the ACADEMIC BOOK CLUB and paying a membership fee as low as 1.8c daily ($6.50 annually).
I understand that one of the features of the club is that I am not now, nor will I ever be, under any obligation whatsoever to buy any particular book or quantity of books from Academic Book Club.

Tap into the broadest international coverage of the most rapidly growing branch of biological science

The Journal of Neuroscience
the Official Journal of the Society for Neuroscience

You need The Journal of Neuroscience NOW, because there's no better way to keep up with crucial advances that affect YOUR work.

You need its interdisciplinary coverage, its scouting of findings in all areas of neuroscience. You'll appreciate the way it mirrors the objectives of the North American Society for Neuroscience, as well as the Societies in Europe and Japan. And the way it keeps you absolutely up-to-date, no matter where significant breakthroughs occur.

Here's a sampling of recent* articles:

- Morphology and Synaptic Connections of Ultrafine Primary Axons in Lamina I of the Spinal Dorsal Horn: Candidates for the Terminal Axonal Arbors of Primary Neurons with Unmyelinated (C) Axons
- In Vitro Resetting of the Circadian Clock in the Aplysia Eye
- Rohon-Beard Neurons Arise from a Substitute Ancestral Cell after Removal of the Cell from Which They Normally Arise in the 16-Cell Frog Embryo
- Postnatal Development of Dopaminergic Neurons in the Rabbit Retina
- Brain Peptidase with a Unique Neuronal Localization: The Histochmical Distribution of Dipeptidyl — aminopeptidase II
- Developmental Stage-specific Changes in Lectin Binding to Mouse Cerebellar Cells In Vitro
- The Laminar Origin and Distribution of the Crossed Tectoreticular Pathways
