STEDMAN'S/24

No other medical dictionary has ever compared with STEDMAN'S... and no other STEDMAN's can be compared with number 24!

Look at these features and compare them to the working dictionary you own now!

• Nearly 100,000 terms with 8,152 new entries and 25,735 revised entries.
• Careful elimination of obsolete, superfluous terms.
• Complete updating of all terms through the end of 1980 by a board of 38 distinguished consultants.
• 518 illustrations, including 93 new and revised drawings and a 24 color-plate Anatomic Atlas.
• "...The best cross-indexing system yet devised." (from a review of the 23rd Edition in ASM NEWS)
• Sturdy hardcover binding and thumb indexed.

1981/1,704 pages/518 illustrations (including 24 color plates)/$33.50

Send me __ copies of the NEW STEDMAN'S/24 (#7915-8) at $33.50 each.

- Payment enclosed (W/P/W pays shipping)
- Bill me (I pay shipping)
- VISA - MasterCard

Resident of CA, VA and MD please add state sales tax. Price slightly higher outside the U.S. Price subject to change without notice. Please pay in U.S. dollars.

**Manual Of Clinical Pharmacology**
Edited by David Robertson, MD, and Craig R. Smith, MD

It is well known that a core armamentarium of several dozen key drugs will suffice for the vast majority of clinical situations. This handy new manual gives you the most thorough understanding possible of the drugs commonly used in clinical practice, and supplies an annotated bibliography on these drugs as a point of access to the more detailed pharmacological literature. The discussion sections are not intended to be complete reviews. They are provided to quickly identify drugs which are practical, difficult, or new. You have to have some knowledge of all of the thousands of drugs on the market . . . but you should have a very thorough understanding of the few dozen drugs that are most frequently used. This little book highlights those areas that are truly most important to you.

1981/about 368 pages/$17.00 (softcover)/7300-1

**Practical Clinical Psychopharmacology Second Edition**
William S. Appleton, MD and John M. Davis, MD

"The authors, who possess impeccable credentials, have put together a handbook that is reliable, responsible, judicious, careful, and practical."
— from a review of the First Edition in *Modern Medicine*

The authors call their book "a practical guide based on solid science." You will find it to be an indispensable manual of the latest clinical applications of psychopharmacology.

This new Second Edition distills the essential information from more than 15,000 published articles. It succinctly covers the diverse aspects of psychopharmacology and deals with the major categories of useful pharmacotherapeutic agents.

**Practical Clinical Psychopharmacology** will provide you with all the latest information so you can prescribe psychotropic drugs rationally and counter side-effects efficiently.

1980/173 pages/illustrated/$15.95/0238-4

ORDER TODAY

YES, please send me these selections on 20-day FREE approval:
☐ Robertson *Manual of Clinical Pharmacology* (7300-1) $17.00 (U.S. price)
☐ Appleton *Practical Clinical Psychopharmacology* (0238-4) $15.95 (U.S. price)

I've checked the payment option below:
☐ Payment enclosed. I save all postage and handling with full refund still guaranteed.
☐ Bill me.

Bill my VISA ☐ MasterCard ☐

Residents of CA, VA, MD, please add sales tax. Prices subject to change without notice. Prices slightly higher outside the U.S. Please pay in U.S. dollars.

TO ORDER TOLL FREE, CALL US TODAY at 1-800-638-0672 from 9 AM to 4 PM. From Maryland phones, call 528-4221 collect.

Applications are invited for the position of Chairperson of the Department of Pharmacology, University of Washington, School of Medicine. Applicants should have extensive research and teaching experience relative to pharmacology, and should have demonstrated leadership ability appropriate to heading up a strong department. Applications, including a complete curriculum vitae and the names of three persons who may be contacted for references, should be sent no later than January the 15th, 1983, to:

Dr. John C. Sherris
Department of Pharmacology Search Committee
Department of Microbiology & Immunology SC-42
University of Washington
Seattle, WA 98195

The University of Washington is an affirmative action/equal opportunity employer.

Cardiac Output by Thermodilution

"CARDIOMAX" model II-R is the only computer which can measure cardiac output of rats (and also guinea pigs, rabbits, dogs, chickens, humans and horses). For rats, it uses unique Columbus Instruments thermodilution microprobes 1/3 mm in size!

It also measures systolic, diastolic and mean blood pressures and heart rate up to 1000 beats/minute. Stroke volumes is also automatically computed.

Why Measure Cardiac Output of Rats?
Development of salt sensitive and salt resistant strains of rats provided inexpensive models for studying hypertension. Dynamics of rat circulatory system is similar to dogs or humans. Studies on rats cost only a fraction of studies using dogs.

Automatic Measurements Without Supervision
All parameters (cardiac output, stroke volume, three blood pressures, blood temperature, heart rate, time of day) can automatically be measured periodically and printed when using "CARDIOMAX-II-R" with Columbus Instruments Automatic Injector and Printer.

With so many journals available, it is difficult to know if you are really making the best use of the information available. You undoubtedly need to be selective, so you go for the best, and in pharmacology that means the *British Journal of Pharmacology*.

It is one of the five most cited journals in the field and one of the most respected. A vital source of information for physiologists, immunologists, molecular biologists and biochemists as well as pharmacologists.
