CONTENTS

Prostaglandin H Synthase-Catalyzed Activation of Benzidine: A Model to Assess Pharmacologic Intervention of the Initiation of Chemical Carcinogenesis. Terry V. Zenser, Michael B. Mattammal, Ronald W. Wise, John R. Rice and Bernard B. Davis ................................................. 545

Multiple Sites of Action of Ethanol on Adenylate Cyclase. Richard A. Rabin and Perry B. Molinoff ......................... 551

Blockade of the Behavioral Effects of Lysergic Acid Diethylamide, 2,5-Dimethoxy-4-Methylamphetamine, Quipazine and Lisuride by 5-Hydroxytryptamine Antagonists. David J. Mokler, Randall L. Commissaris, Margaret R. Warner and Richard H. Rech .......... 557

Interaction of a Radiolabeled Agonist with Cardiac Muscarinic Cholinergic Receptors. T. Kendall Harden, Rick B. Meeker and Michael W. Martin ................................................. 570

Antiarrhythmic Effects of Ethmozin in Cardiac Purkinje Fibers: Suppression of Automaticity and Abolition of Triggering. Kenneth H. Dangman and Brian F. Hoffman ............. 578

Psychopharmacological Effects of Melatonin in Mouse and Rat. David Sugden ......................................................... 587

Comparison of Dopamine Receptor Sites Labeled by [3H]-Sulpride and [3H]Spirperone in Striatum. Nancy R. Zahniser and Margarita L. Dubocovich .......................................................... 592

Dissociation of Effects of Xanthine Analogues on Renal Prostaglandins and Renal Excretory Function in the Awake Rat. Philip G. Baer, Eyerie L. Armstrong and Lauren M. Cagen ................................................................. 600

Binding Properties of Alpha-1 Adrenergic Receptors in Rat Cerebral Cortex: Similarity to Smooth Muscle. Kenneth P. Minneman ................................................................. 605

Analysis of Vasoconstrictor Responses to Potassium Depolarization and Norepinephrine and Their Antagonism by Differing Classes of Vasodilators in the Perfused Rat Hindquarters. Edmund J. Sybertz, Gary Vander Vliet and Thomas Baum ......................................................... 621

Use of γ-Aminobutyric Acid (GABA)-Transaminase Inhibitors and a GABA Uptake Inhibitor to Investigate the Influence of GABA Neurons on Dopamine-Containing Amacrine Cells of the Rat Retina. Melissa A. Proll and William M. Morgan ......................................................... 627

In Situ Methotrexate Polyglutamate Formation in Rat Tissues. Glenn R. Krakower and Barton A. Kamen ......................... 633

Effect of Morphine on Acquisition of the Classically Conditioned Nictitating Membrane Response of the Rabbit. C. W. Schindler, I. Gormezano and J. A. Harvey ................. 639

Disposition in the Dog and the Rat of 2,6-Diamino-9-(2-Hydroxyethoxymethyl)Purine (A134U), a Potential Prodrug of Acyclovir. Steven S. Good, Harvey C. Krasny, Gertrude B. Elion and Paulo de Miranda ......................... 644

Metabolites of an Antipsychotic Chiral Pyrroloisoquinoline and Their Effect on Prolactin Secretion in the Rat. S. J. Kolins, T. H. Williams, T. F. Mowles, B. Burghardt, V. Toome and M. A. Schwartz ......................................................... 652

Sex Differences in the Excretion of Glucuronide Conjugates: The Role of Intrarenal Glucuronidation. Glenn F. Rush, John F. Newton and Jerry B. Hook ......................................................... 658

Characterization of Susceptibility to Audiogenic Seizures in Ethanol-Dependent Rats after Microinjection of γ-Aminobutyric Acid (GABA) Agonists into the Inferior Colliculus, Substantia Nigra or Medial Septum. Gerald D. Frye, Thomas J. McCown and George R. Breese ......................................................... 663

Effects of Piconadol and Its Agonist and Antagonist Isomers on Schedule-Controlled Behavior. J. David Leander and Dennis M. Zimmerman ......................................................... 671

Central Alpha Receptors and Their role in Digoxin Cardiotoxicity. L. M. Plunkett and R. L. Tackett ......................... 683

Effect of Ethanol and Metabolic Substrates on the Oxidation of Aminopyrine, Formaldehyde and Formate by Isolated Hepatocytes. Elisa Dicker and Arthur I. Cederbaum .......... 687

Contents Continued on It
Functional Antagonism in Canine Tracheal Smooth Muscle: Inhibition by Methacholine of the Mechanical and Biochemical Responses to Isoproterenol. Theodore J. Torphy, Gilbert A. Rinard, Martha G. Rietow and Steven E. Mayer .......................................................... 694

Effect of Adrenergic Stimulation and Blockade on Ventricular Defibrillation in the Rat. Arjun D. Sharma, Menashe B. Waxman and Felix I. Huerta ........................................................................ 716

Discriminative Stimulus Effects of Dextromorphan in Pigeons. Seymour Herling, Robert E. Solomon and James H. Woods .......................................................... 723

Reduced Clofibrate Acid Clearance in Renal Dysfunction is Due to a Futile Cycle. P. J. Meffin, D. M. Zilm and J. R. Veenendaal .................................................................................. 732

A Renal Mechanism for the Clofibrate Acid-Probenecid Interaction. P. J. Meffin, D. M. Zilm and J. R. Veenendaal .......................................................... 739

Neurotensin Analogs [D-Tyr11] and [D-Phe11] Neurotensin Resist Degradation by Brain Peptidases in Vitro and in Vivo. Frédéric Checler, Jean-Pierre Vincent and Patrick Kitabgi .......................................................... 743

Regulation of Serotonin Release from Rabbit Intestinal Enterochromaffin Cells. Erik J. Forsberg and Richard J. Miller .................................................................................. 755

The Methylenedioxyindenes, a Novel Class of "Intracellular Calcium Antagonists": Effects on Contractility and on Processes Involved in Regulating Intracellular Calcium Homeostasis. Ronald E. Weishaar, Mary Quade, Janet A. Schenden and Harvey R. Kaplan .......................................................... 767

Multiple Actions of Phenytoin on Mouse Spinal Cord Neurons in Cell Culture. Michael J. McLean and Robert L. Macdonald ........................................................................ 779

Effect of Thromboxane Synthetase Inhibitor UK37,248 (Dazoxiben) upon Platelet Aggregation, Coronary Artery Thrombosis and Vascular Reactivity. William A. Schumacher and Benedict R. Lucchesi ........................................................................ 790

Index, Volume 227, October–December, 1983 .......................................................... 797
