PHARMACOLOGICAL REVIEWS
A Publication of the American Society for Pharmacology and Experimental Therapeutics, Inc.

Editor: James A. Bain, Ph.D., Emory University

Pharmacological Reviews is a showcase journal for ideas that would otherwise be buried in the mass of pharmacological literature. Important review papers on the current status of a given topic are allotted plenty of space (from 10 to 40 pages) to exhaustively cover that topic. A fine balance is achieved in these articles, which are written in a clear, simple and concise fashion so as to be intelligible to non-specialists, yet are precise and detailed enough to be of great interest to experts in the field.

At various times, Pharmacological Reviews has addressed such subjects as biochemical and cellular pharmacology, drug metabolism and disposition, renal pharmacology, neuropharmacology, behavioral pharmacology, clinical pharmacology, and toxicology. Designed specifically as a medium through which those interested in these topics can communicate directly, Pharmacological Reviews serves the entire pharmacological community and is vital reading for physiologists, pharmacologists, and biological chemists.

THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS
A Publication of the American Society for Pharmacology and Experimental Therapeutics, Inc.

Editor: Eva King Killam, PhD, School of Medicine, University of California, Davis
Founded by John J. Abel in 1909.

this is one of the most prestigious journals in scientific research. Publishing original research articles on all aspects of the interactions of chemical and biological systems, The Journal of Pharmacology and Experimental Therapeutics is extremely useful for the academic or clinical pharmacologist. In addition, it has broad relevance for pharmaceutical research laboratories and anesthesiologists. Readers will find full coverage of autonomic, behavioral, cardiovascular, cellular, clinical, developmental, gastrointestinal, immunno-, neuro-, pulmonary, and renal pharmacology. Other areas include analgesia, drug abuse, drug metabolism and distribution, chemotherapy, and toxicology. Each issue of this monthly periodical averages over 200 pages and presents the best in research being published in pharmacology and therapeutics.

Please enter my new subscription to the journals checked below.
(Orders outside the U.S. must be prepaid.)

Pharmacological Reviews (quarterly)
- Personal: $35.00/yr.
- Institutional: $55.00/yr.
- In-training: $25.00/yr.
- Foreign: add $5.00/yr.

The Journal of Pharmacology and Experimental Therapeutics (monthly)
- Personal: $140.00/yr.
- Institutional: $185.00/yr.
- Foreign: add $25.00/yr.

(In-training rates apply to residents, fellows, interns, and students. When requesting this rate, which is limited to three years, please give training status and name of institution.)

Members of the American Society for Pharmacology and Experimental Therapeutics should order subscriptions to the official society journals through the American Society for Pharmacology and Experimental Therapeutics, 9650 Rockville Pike, Bethesda, MD 20014

THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS (ISSN 0022-3565) is published monthly by The American Society for Pharmacology and Experimental Therapeutics, 428 E. Preston Street, Baltimore, MD 21202. Annual dues includes $60.00 for journal subscription. Second class postage paid at Baltimore, MD and at additional mailing offices. POSTMASTER: Send address changes (Form 3579) to Williams & Wilkins, 428 E. Preston St., Baltimore, MD 21202. Indexed by Current Contents and Index Medicus. Subscription rates $140.00 ($165.00 foreign); institutions $220.00 ($245 foreign) single copy $16.00 ($19.00 foreign). Copyright © 1963 by The American Society for Pharmacology and Experimental Therapeutics.
Notice to Prospective Authors Wishing to Submit Manuscripts to

JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS

The expenses associated with the review of manuscripts submitted to those ASPET-sponsored journals that are devoted to publishing original research articles have escalated dramatically in recent years because of ever-increasing costs of postage, supplies, and other office expenses, and the growing number of manuscripts submitted for publication. In order to continue to offer authors the opportunity to publish their original research in our critically reviewed, well-edited, and widely respected journals, it has become necessary for ASPET to follow the example of several other scientific societies which have instituted a uniform manuscript handling fee for each of its journals that publishes original research reports. Therefore, all manuscripts received in the editorial office on or after July 1, 1983, must be accompanied by a check of $30.00 (in U.S. funds payable to ASPET) or by a validated purchase order from the authors' institution. The review process for submitted manuscripts will be delayed until the manuscript handling fee or purchase order is received in the appropriate Editor's office. We regret the necessity of instituting a manuscript handling fee. The Board of Publications Trustees has concluded, however, that this charge represents the fairest and most appropriate manner to defray the costs related to the review of submitted manuscripts.

---

**O$_2$-consumption CO$_2$-production Respiration Rate**

Simultaneously measured in 1 to 8 animal cages

---

**RATS!!! CARDIAC OUTPUT BY THERMODILUTION**

"CARDIOMAX-II-R" is the only computer which can measure cardiac output of rats (also guinea pigs, rabbits, dogs, chickens, horses and humans). For rats, it uses unique Columbus Instruments thermodilution micropipettes 1.3 mm in size!

It also measures systolic, diastolic and mean blood pressures and heart rate up to 1000 beats per minute. Stroke volume is also automatically computed.

**Why Measure Cardiac Output of Rats?**

Development of salt-sensitive and salt-resistant strains of rats provided inexpensive models for studying hypertension. Dynamics of rat circulatory system is similar to dogs or humans. Studies on rats cost only a fraction of studies using dogs.

**Automatic Measurements Without Supervision**

All parameters (cardiac output, stroke volume, three blood pressures, blood temperature, heart rate, time of day) can automatically be measured periodically and printed when using "Cardiomax-II-R" with Columbus Instruments Automatic Injector and Printer.
