CONTENTS

In Vivo Studies on Spinal Opiate Receptor Systems Mediating Antinociception. II. Pharmacological Profiles Suggesting a Differential Association of Mu, Delta and Kappa Receptors with Visceral Chemical and Cutaneous Thermal Stimuli in the Rat. Claudia Schmauss and Tony L. Yaksh .................................................. 1

Pulmonary Fate of [3H]Bleomycin A₃ in Mice. John S. Lazo and Esther T. Pham .................................................. 13

Morphine-Morphine Glucuronide Pools in the Rat Liver: Effects of Triton X-100. Edward F. Sweeney, Carol Fuhrman-Lane and James M. Fujimoto .................................................. 19

Differential Effects of Intravenous Vs. Intracoronary Nifedipine on Myocardial Segment Function in Ischemic Canine Hearts. Kathryn A. Lamping and Garrett J. Gross .................................................. 28

Relaxation of Intrapulmonary Artery and Vein by Nitrogen Oxide-Containing Vasodilators and Cyclic GMP. James C. Edwards, Louis J. Ignarro, Albert H. Hyman and Philip J. Kadowitz .................................................. 33

Reinstatement of Responding Maintained by Cocaine or Thiamylal. William Slikker, Jr., Mauricette J. Brocco and Keith F. Killam, Jr. .................................................. 43

Serotonin Formation in Nonblood-Perfused Rat Kidneys. Charles T. Stier, Jr., George McKendall and Harold D. Itakowitz .................................................. 53

Renal Transport of Netilmicin in the Rat. Enrique Pastoriza-Munoz, Daniel Timmerman and George J. Kaloyanides .................................................. 65

Interaction of Bicyclo-Octane Analogs of Amantadine with Ionic Channels of the Nicotinic Acetylcholine Receptor and Electrically Excitable Membrane. Jordan E. Warnick, Mohammed A. Maleque and Edson X. Albuquerque .................................................. 73

Discriminant Effects of Behaviorally Active and Inactive Analogs of Phencyclidine on Membrane Electrical Excitability. Luis G. Aguayo, Harel Weinstein, Saul Masyani, Stanley D. Glick, Jordan E. Warnick and Edson X. Albuquerque .................................................. 80

Opioid Receptor Selectivity of Dynorphin Gene Products. Iain F. James, Walter Fischli and Avram Goldstein .................................................. 88

Differential Effects of Hallucinogenic Drugs on the Activity of Serotonin-Containing Neurons in the Nucleus Centralis Superior and Nucleus Raphe Pallidus in Freely Moving Cats. Michael E. Trulson, Donald W. Preussler and Violet M. Trulson .................................................. 94

Novel Inhibitors of γ-Aminobutyric Acid (GABA) Uptake: Anticonvulsant Actions in Rats and Mice. Libby M. Younger, Philip J. Fowler, Peter Zarevics and Paulette E. Setler .................................................. 109

Immunoglobulin G- and Immunoglobulin E-Mediated Airway Smooth Muscle Contraction in the Guinea Pig. Jean F. Regal .................................................. 116

Effects of Primidone, Phenytoin and Phenytylmalonamide in the Stimulated Frog Neuromuscular Junction. Paul A. Talbot and Marc T. Alderdice .................................................. 121

SK&F 88046: A Unique Pharmacologic Antagonist of Bronchoconstriction Induced by Leukotriene D₄, Thromboxane and Prostaglandins F₂α and D₂ in Vitro. Barry M. Weichman, Martin A. Wasserman and John G. Gleason .................................................. 128

Differential Actions of Serotonin Antagonists on Two Behavioral Models of Serotonin Receptor Activation in the Rat. Irwin Lucki, Mitchell S. Nobler and Alan Frazer .................................................. 133

Influence of Renal Lipoxygenase Activity on the Renal Vascular Response to Arachidonic Acid. Larry P. Feigen .................................................. 140

Structure-Activity Relationship Studies of Phencyclidine Derivatives in Rats. Edward J. Cone, Roy L. McQuinn and Harlan E. Shannon .................................................. 147

Contents Continued on iv
Selective Activation by LY-14185 and Apomorphine of Presynaptic Dopamine Receptors in the Rat Kidney and Influence of Stimulation Parameters in the Action of Dopamine. Mustafa F. Lokhandwala and Marie L. Steenberg .......................... 161
Mechanisms Involved in the Hyperglycemic Response Induced by Clonidine and Other Alpha-2 Adrenoceptor Agonists. Nicholas W. DiTullio, Lenora Cieslinski, William D. Matthews and Barbara Storer .......................... 168
Relationship between Renal Clearance, Protein Binding and Urine Flow for Digitoxin, a Compound of Low Clearance in the Isolated Perfused Rat Kidney. Stephen Hall and Malcolm Rowland .......................... 174
Effect of Encainide and Its Two Major Metabolites on Cardiac Conduction. Peter E. Dresel ................................................................. 180
Mechanisms Behind the Biphasic Contractile Response to Potassium Depolarization in Isolated Rat Cerebral Arteries. Edward D. Högestätt and Karl-Erik Andersson ................................................................. 187
Interaction of Substance P with the Respiratory Control System in the Rat. Jan Hedner, Thomas Hedner, Per Wessberg and Jan Jonason ................................................................. 196
Role of Microsomal and Cytosolic Glutathione S-Transferases in the Conjugation of Hexachloro-1:3-Butadiene and Its Possible Relevance to Toxicity. C. Roland Wolf, Pamela N. Berry, John A. Nash, Trevor Green and Edward A. Lock .......................... 202
Heterogeneity of Presynaptic Muscarinic Receptors Regulating Neurotransmitter Release in the Rat Brain. Maurizio Raiteri, Riccardo Leardi and Mario Marchi ................................................................. 209
Effects of Prostaglandin E1 on Canine Nasal Vascular and Airway Resistances. Mary Agnes K. Y. Lung and James C. C. Wang ................................................................. 215
Effects of Diltiazem on the Calcium Paradox in Isolated Rat Hearts. H. Meno, H. Kanaide and M. Nakamura ................................................................. 220
Permeability to Various Cations of the Voltage-Dependent Sodium Channel of Rat Single Heart Cells. Norio Akaike, Atsuko Yatani, Katahide Nishi, Yasuo Oyama and Shunsuke Kuraoka ................................................................. 225
Electroconvulsive Shock Treatments Enhance Responsiveness of Forebrain Neurons to Serotonin. Claude de Montigny ................................................................. 230
Arachidonic Acid-Induced Platelet Aggregation is Mediated by a Thromboxane A2/Prostaglandin H2 Receptor Interaction. L. V. Parise, D. L. Venton and G. C. LeBreton ................................................................. 240
Effects of Diltiazem on Transmembrane Potential and Current of Right Ventricular Papillary Muscle of Ferrets. Shozo Kanaya and Bertram G. Katzung ................................................................. 245
Erratum .................................................................................................................. 255
