An important resource for everyone involved in research on the metabolism of drugs and chemicals

**DRUG METABOLISM AND DISPOSITION**

The Biological Fate of Chemicals

Editor: Vincent G. Zannoni, PhD, University of Michigan, Ann Arbor, Michigan

*DRUG METABOLISM AND DISPOSITION* publishes *in vitro* and *in vivo* experimental results that bring readers significant and original information on xenobiotic metabolism and disposition, including metabolism of all pharmacologic agents or drugs and environmental chemicals, reactants, and preservatives. All papers are referred to ensure a high standard of publication. The areas covered are:

- pharmacokinetics
- pharmacodynamics
- genetic, nutritional, and hormonal factors affecting the biological fate of chemicals
- toxicological consequences of xenobiotic metabolism

This journal should be a standard reference in all pharmacology and toxicology departments. It is also a valuable resource for all medicinal chemists involved in designing drugs and all biochemists involved with drug metabolism.

Quarterly journal devoted entirely to in-depth review articles

PHARMACOLOGICAL REVIEWS

Editor: James A. Bain, PhD, Emory University, Atlanta, Georgia

PHARMACOLOGICAL REVIEWS is a showcase for important review articles in your field, featuring longer papers on topics of high current interest. Recent major reviews have included:
- Substance P, by Bengt Pernow
- Pharmacology of Mesocortical Dopamine Neurons, by Michael J. Bannon and Robert H. Roth
- Agonist-Induced Desensitization of the Beta-Adrenergic Receptor-Linked Adenylate Cyclase, by T. Kendall Harden
- Pharmacology of Opioids by William R. Martin

The areas covered in review papers published by PHARMACOLOGICAL REVIEWS have included:
- biochemistry and cellular pharmacology
- drug metabolism and disposition
- renal pharmacology
- neuropharmacology
- behavioral pharmacology
- clinical pharmacology
- toxicology

PHARMACOLOGICAL REVIEWS continues to publish the important, longer papers of interest to pharmacologists, physiologists, toxicologists, and biological chemists. No library serving the pharmacologic community should be without a subscription.

BOARD OF PUBLICATIONS TRUSTEES

EXECUTIVE OFFICER OF THE SOCIETY

Kay A. Croker

THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS (ISSN 0022-3565) is published monthly by The American Society for Pharmacology and Experimental Therapeutics, 428 E. Preston Street, Baltimore, MD 21202. Second class postage paid at Baltimore, MD and at additional mailing offices. POSTMASTER: Send address changes (Form 3579) to Williams & Wilkins, 428 E. Preston St., Baltimore, MD 21202. Indexed by Current Contents and Index Medicus. Subscription rates $140.00 ($170.00 foreign); institutions $220.00 ($250 foreign) single copy $16.00 ($19.00 foreign). Copyright © 1985 by The American Society for Pharmacology and Experimental Therapeutics.
Now in a new edition—
"The first comprehensive textbook on adverse drug effects"

Textbook of Adverse Drug Reactions Third Edition
Edited by D.M. DAVIES, Shotley Bridge Hospital, U.K.

The first and still the most authoritative reference source in the field, the Textbook has been thoroughly revised and updated, several new contributors have been recruited, and an entirely new chapter on drug-induced sexual dysfunction and infertility has been added. From reviews of the second edition: "Clear, direct, and readable...Of great and unique usefulness."—Clinical Pharmacy. "Authoritative...Recommended for individuals requiring the most up-to-date information on adverse drug reactions."—Journal of Pharmaceutical Sciences

1985 700 pp.; 26 illus. 261479-7 $6750

Gaddum's Pharmacology Ninth Edition
Edited by A.S.V. BURGEN, University of Cambridge, and J.F.M. MITCHELL, University of Bristol

The latest edition of this popular survey features rewritten and expanded sections on drug receptors, drugs acting on the central nervous system, peptides, local hormones, and the cardiovascular system. "Well written...clear and understandable."—American Journal of Pharmaceutical Education, on the eighth edition.

1985 300 pp.; 137 illus. 261423-1 paper $1795

Free Radicals in Biology and Medicine
BARRY HALLIWELL, King's College, London, and JOHN M.C. GUTTERIDGE, National Institute for Biological Standards and Control, London

The first book to cover the essential recent research on free radicals, this helpful introduction explains what free radicals are, how they are generated, and how they can react in plant, animal, and human processes. Up-to-date information is provided on many specialized aspects of oxygen radical research.

1985 280 pp.; 90 illus. 854137-6 $35.00

Interferons Their Impact in Biology and Medicine
Edited by JOYCE TAYLOR-PAPADIMITRIOU, Imperial Cancer Research Fund, London

This timely volume surveys the recent research on interferons and emphasizes its relevance to biology and medicine. The contributors, all eminent researchers from Europe and North America, consider a broad range of topics, from the analysis of interferon genes to the effect of interferons on both infectious and malignant diseases.

1985 200 pp.; 6 illus. 261536-X cloth $32.50 261481-9 paper $16.95

Principles of Pediatric Pharmacology
GEORGE MAXWELL, University of Adelaide, Australia

The first comprehensive treatment of this subject by a single author, Principles of Pediatric Pharmacology covers the general principles of drug action and disposition, pharmacokinetics and pharmacodynamics, and the particular pharmacology of the fetus, the newborn, and children under the age of twelve.

1984 407 pp. 520447-6 $37.50

The Antimicrobial Drugs
WILLIAM B. PRATT and ROBERT FEKETY, both of the University of Michigan

This superb text is a reworking and expansion of Pratt’s Chemotherapy of Infection (OUP, 1977), with the assistance of an eminent clinician as co-author. A comprehensive survey of the drugs used to treat bacterial, fungal, viral, and parasitic infections, this edition provides concise but extensively referenced reviews of mechanisms, resistance, microbial susceptibility, pharmacology, side effects, and therapeutic indications for each drug. Numerous charts and tables with microbial sensitivities, pharmacokinetic data, and appropriate regimens of therapy make the book an up-to-date and easily accessible source of information for clinical pharmacologists.

1985 640 pp.; 85 illus. 503561-5 paper $24.95

Oxford Textbook of Clinical Pharmacology and Drug Therapy
D.G. GRAHAME-SMITH and J.K. ARONSON, both of the University of Oxford

This stimulating text combines readable, up-to-date explanations of the principles of clinical pharmacology—backed by numerous examples—with concise, informative coverage of their application in the treatment of disease. "Very good text. Blends good discussion of general principles with broad coverage of specific treatment regimens. Very readable."—Curt R. Freed, Associate Professor of Clinical Pharmacology, University of Colorado Medical Center

1985 843 pp.; 93 illus. 261492-4 cloth $42.50

Medicinal Chemistry A Biochemical Approach
THOMAS NOGRADY, Concordia University

This balanced, up-to-date text incorporates the most recent findings of biochemical pharmacology and the latest insights into the interactions of drugs with their receptors. Stressing the molecular action of drugs, the text is organized by targets of drug action and covers all the drug groups and their therapeutic applications.

1985 449 pp.; 163 illus. 503400-7 paper $27.95

X-Ray Crystallography and Drug Action
Edited by A.S. HORN, University of Groningen, Netherlands, and C.J. DeRANTER, University of Leuven, Belgium

Leading specialists—including molecular pharmacologists, biochemists, and medicinal chemists—review the uses and results of X-ray crystallography in the study of the molecular basis of drug action. "A worthwhile addition to the personal library of most pharmaceutical chemists."—Journal of Pharmaceutical Sciences

1984 514 pp.; 143 illus. 855185-1 $59.00
