Newsworthy and timely articles in your field

MOLECULAR PHARMACOLOGY

Editor: Joel G. Hardman, PhD, Vanderbilt University, Nashville, Tennessee

Is your special interest receptors and neurotransmitters... drug metabolism... antibiotic and anticancer drug actions... or other areas related to the molecular basis of drug action? If so, you should be subscribing to MOLECULAR PHARMACOLOGY.

The editor's and editorial board's high standards ensure that the papers you read in MOLECULAR PHARMACOLOGY are on the cutting edge of research on drug action and selective toxicity at the molecular level. Original applications of biochemistry, biophysics, genetics, and molecular biology are juxtaposed with innovative pharmacologic research to elucidate basic problems in pharmacology and toxicology, including such areas as molecular mechanisms involved in drug receptor-effector coupling, xenobiotic metabolism, and antibiotic and anticancer drug action. Start your subscription today to ensure access to the most newsworthy papers in your field.

PHARMACOLOGICAL REVIEWS

Editor: James A. Bain, PhD, Emory University, Atlanta, Georgia

PHARMACOLOGICAL REVIEWS is a showcase for important review articles in your field, featuring longer papers on topics of high current interest. Recent major reviews have included:
- Substance P, by Bengt Pernow
- Pharmacology of Mesocortical Dopamine Neurons, by Michael J. Bannon and Robert H. Roth
- Agonist Induced Desensitization of the Beta-Adrenergic Receptor Linked Adenylate Cyclase, by T. Kendall Harden
- Pharmacology of Opioids by William K. Martin

The areas covered in review papers published by PHARMACOLOGICAL REVIEWS have included:
- biochemical and cellular pharmacology
- neuropharmacology
- behavioral pharmacology
- clinical pharmacology
- renal pharmacology
- toxicology

PHARMACOLOGICAL REVIEWS continues to publish the important, longer papers of interest to pharmacologists, physiologists, toxicologists, and biological chemists. No library serving the pharmacologic community should be without a subscription.

An important resource for everyone involved in research on the metabolism of drugs and chemicals

DRUG METABOLISM AND DISPOSITION

The Biological Fate of Chemicals

Editor: Vincent G. Zannoni, PhD, University of Michigan, Ann Arbor, Michigan

DRUG METABOLISM AND DISPOSITION publishes in vitro and in vivo experimental results that bring readers significant and original information on xenobiotic metabolism and disposition, including metabolism of all pharmacologic agents or drugs and environmental chemicals, reactants, and preservatives. All papers are referred to ensure a high standard of publication. The areas covered are:

- pharmacokinetics
- pharmacodynamics
- genetic, nutritional, and hormonal factors affecting the biological fate of chemicals
- toxicological consequences of xenobiotic metabolism

This journal should be a standard reference in all pharmacology and toxicology departments. It is also a valuable resource for all medicinal chemists involved in designing drugs and all biochemists involved with drug metabolism.
