

The Journal of PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS

*A Publication of The American Society
for Pharmacology and Experimental Therapeutics*

Founded by John J. Abel 1909

EDITOR

Eva King Killam

ASSISTANT EDITOR

Mannfred A. Hollinger

EDITORS FOR SPECIFIC FIELDS

Analgesia and Drug Abuse

Autonomic Pharmacology

Robert R. Ruffolo, Jr.
Robert E. Stitzel

Behavioral Pharmacology

John A. Harvey

Cardiovascular Pharmacology

Leslie E. Bailey
Henry R. Besch, Jr.
Theodore M. Brody
Sue Piper Duckles

Cell Pharmacology

Toshio Narahashi
George B. Weiss

Chemotherapy

H. George Mandel

Developmental Pharmacology

Bernard L. Mirkin

Drug Metabolism and Disposition

Edward Bresnick
Jordan L. Holtzman

Endocrine Pharmacology

Paula H. Stern

Gastrointestinal Pharmacology

Thomas F. Burks

Immunopharmacology

Sydney Spector

Neuropharmacology

Edmund G. Anderson
S. J. Enna
Charles O. Rutledge

Prostaglandins and Leukotrienes

John C. McGiff

Pulmonary Pharmacology

Mannfred A. Hollinger

Renal Pharmacology

William O. Berndt

Toxicology

Curtis D. Klaassen

New Insights Into Drug Discovery

Medicinal Research Reviews

Editor: George deStevens, Drew University

This review journal embraces all aspects of research addressing the study of disease states and the consequent development of therapeutic agents. It features developments in specific areas of medicinal research, including a total review of the history leading up to the introduction of a new pharmaceutical.

Recent Articles

Synthetic Analogs for the Study of GABA as a Neurotransmitter,
G. Johnston and R. Allan

6-Ketomorphinans and Their Analgetic Properties,
A. Brossi and H. Schmidhammer

The Role of Toxicology in Drug Research and Development, V.M. Traina
Analgetics, H.H. Ong

One Carbon Metabolism, P.B. Rowe and G.P. Lewis

Current Trends in New Drug Research in China, C. Shen

On Chiral Drug Actions, M. Simonyi

Prostacyclin Analogs, H. Vorbruggen

International Patent Protection for Pharmaceuticals, B.A. Yorke

Praziquantel, P. Andrews, R. Pohlke, J. Seubert and H. Thomas

Neuropharmacology of Degenerative Diseases Associated with Aging,
J. Growdon

Cardiovascular Research Scientist

Join our broad, multi-disciplinary research effort toward novel cardioactive drugs.

Wyeth Laboratories, one of the world's most respected pharmaceutical companies, is firmly committed to extensive research in pharmacologic treatment of cardiac arrhythmias and ischemic heart disease. Join the top-caliber cardiovascular team we're building at our corporate R&D facility in suburban Philadelphia.

Your investigations in cardiac electrophysiology, development of chronic arrhythmia models, infarct-sizing and/or experimental coronary thrombosis will be directed at the development of novel cardioactive agents. We look to you to assist in the training of other researchers, to stay abreast of current trends through meeting attendance and to promote innovation by publishing scientific findings.

Thorough knowledge of the above investigational areas must be coupled with a PhD in Pharmacology or a closely related area and some allied post-doctoral experience.

Your expertise should be in large animal models of arrhythmias and cardiac ischemia; in novel drug treatments of

arrhythmia or salvage of ischemic myocardium; and/or in cellular microelectrode techniques and whole animal experimentation. All experience must be backed by a strong record of prior and current publications.

Explore the advantages of research at Wyeth from excellent salary and benefits to the distinctive environment of our 20-acre Corporate campus at Radnor on Philadelphia's Main Line. Direct your CV and salary requirements to: **Position #WD5084GA** Wyeth Laboratories, Inc., P.O. Box 8299, Philadelphia, PA 19101.

An Equal Opportunity Employer. M/F/H/V responses encouraged.

Wyeth Laboratories, Inc.

Now in a new edition
**The Biochemical Basis of
Neuropharmacology**

Fifth Edition

JACK R. COOPER, *Yale University School of Medicine*; FLOYD E. BLOOM, *Scripps Clinic and Research Foundations*; and ROBERT H. ROTH, *Yale University School of Medicine*

Completely updated and featuring two new chapters on molecular neurobiology and neuromodulation, this volume continues to provide the most lucid available account of neurotransmitters and their relation to drug action. *From reviews of previous editions: "The best of its kind."—Journal of Neurochemistry. "Clear and concise.... Presented in a vital and lively style."—Annals of Internal Medicine*

May 1986 368 pp.; 68 illus. 504036-8 paper \$14.95
504035-X cloth \$24.95

NEW!

The Antimicrobial Drugs

WILLIAM B. PRATT and ROBERT FEKETY, *both of the University of Michigan Medical School*

No other book provides such a thorough discussion of how the body handles antibiotics—their mechanisms of action, pharmacology, toxicity, and bacterial sensitivities—or such detailed, up-to-date coverage of topics such as interferon, third generation cephalosporins, and antiviral agents.

1986 501 pp.; 79 illus. 503561-5 paper \$27.95
503560-7 cloth \$45.00

Textbook of Adverse Drug Reactions

Third Edition

Edited by D.M. DAVIES, *Editor, Adverse Drug Reaction Bulletin*

Carefully revised throughout, this authoritative reference remains the most lucid, well-documented analysis of adverse reactions to drugs available. The third edition features an entirely new chapter on drug-induced sexual dysfunction and infertility and a new appendix on "Adverse Effects of Drug Excipients."

1985 814 pp.; 26 illus. 261479-7 \$95.00

Medicinal Chemistry

A Biochemical Approach

THOMAS NOGRADY, *Concordia University, Montreal*

"A welcome and refreshing approach to the presentation of medicinal chemistry."—*Journal of Pharmaceutical Sciences*. "Succinct, readable.... Offer(s) an enlightened perspective of medicinal chemistry organized by mechanisms of action."—*Drug Intelligence and Clinical Pharmacy*

1985 449 pp.; 163 illus. 503400-7 paper \$27.95
503399-X cloth \$47.50

Free Radicals in Biology and Medicine

BARRY HALLIWELL, *King's College, London*, and JOHN M.C. GUTTERIDGE, *National Institute for Biological Standards and Control, London*

"A good starting point for anyone wishing to get a clear introduction to current aspects of free radical research in biology and medicine. It should, therefore, be of wide appeal."—*Nature*

1985 346 pp.; 90 illus. 854137-6 \$45.00

Now available from Oxford
Principles of Medical Pharmacology

Fourth Edition

Edited by HAROLD KALANT, WALTER H.E. ROSCHLAU, and EDWARD M. SELLERS, *all of the University of Toronto*

Well-balanced, easy to read, illustrated with effective and engaging diagrams, this popular text offers systematic coverage of the whole field of basic medical pharmacology, with new material on drug-induced carcinogenesis and teratogenesis, adverse drug reactions, and perinatal, geriatric and behavioral pharmacology.

1985 954 pp.; 414 figs.; 168 tables 520515-4 \$39.50

**Oxford Textbook of Clinical
Pharmacology and Drug Therapy**

D.G. GRAHAME-SMITH and J.K. ARONSON, *both of the University of Oxford*

This stimulating text combines readable, up-to-date explanations of the principles of clinical pharmacology—backed by numerous clinical examples—with concise, informative coverage of their application in the treatment and management of disease.

1985 843 pp.; 93 illus. 261172-0 paper \$26.95
261492-4 cloth \$42.50

Interferons

Their Impact in Biology and Medicine

Edited by JOYCE TAYLOR-PAPADIMITRIOU, *Imperial Cancer Research Fund, London*

This timely volume surveys the recent research on interferons and emphasizes its relevance to biology and medicine. The contributors, all eminent researchers from Europe and North America, consider a broad range of topics, from the analysis of the interferon genes to the effect of interferons on both infectious and malignant diseases.

1985 148 pp.; 6 illus. 261481-9 paper \$16.95
261536-X cloth \$35.00

X-ray Crystallography and Drug Action

Edited by A.S. HORN, *University of Groningen, Netherlands*, and C.J. DeRANTER, *Catholic University of Leuven, Belgium*

"The overall strength of the discussions of structure-activity relationships in proteins, enzymes, and their complexes with smaller molecules makes this book a worthwhile addition to the personal library of most pharmaceutical chemists."—*Journal of Pharmaceutical Sciences*

1984 514 pp.; illus. 855185-1 \$59.00

Principles of Pediatric Pharmacology

GEORGE M. MAXWELL, *University of Adelaide, Australia*

"Clearly written and very much to the point. It will be very useful to all physicians and pharmacologists concerned with the treatment of the young."—*Comparative Biochemistry and Physiology*

1984 400 pp. 520447-6 \$37.50

OXFORD UNIVERSITY PRESS

200 MADISON AVENUE, NEW YORK, N.Y. 10016

Goodman and Gilman's The Pharmacological Basis of Therapeutics *Seventh Edition*

Editors: ALFRED GOODMAN GILMAN, MD, PhD, *Southwestern Medical School, University of Texas Health Science Center at Dallas*; LOUIS S. GOODMAN, MA, MD, DSc(Hon), *University of Utah College of Medicine*; THEODORE W. RALL, PhD, DMed(Hon), *University of Virginia School of Medicine*; and FERID MURAD, MD, PhD, *Stanford University School of Medicine*

The new seventh edition retains the same clarity of writing, thoughtful organization, and authority that have made "Goodman and Gilman" the one indispensable reference in pharmacology, toxicology, and therapeutics.

The revision of the text has been extensive. This is a reflection not only of the dozens of new therapeutic agents that have become available to the clinician during the past five years but also of the tremendous advances in both basic pharmacology and the application of that knowledge to medical practice.

August 1985 1839 pages illustrated 0-02-344710-9 \$65.00

Important Books for Pharmacologists

New! Casarett and Doull's Toxicology

The Basic Science of Poisons, *Third Edition*

Editors: CURTIS D. KLAASSEN, PhD, *University of Kansas School of Medicine*; MARY O. AMDUR, PhD, *Massachusetts Institute of Technology*; and JOHN DOULL, MD, PhD, *University of Kansas School of Medicine*

This multiauthor volume deals with the total aspects of modern toxicology. Unit I is concerned with general principles of the subject and includes chapters on origin and scope of toxicology; principles of toxicology; distribution, excretion, and absorption of toxicants; biotransformation of toxicants; chemical carcinogens; genetic toxicology; and teratogens. Unit II deals with the toxicology of various organ systems—blood, immune system, liver, kidney, respiratory system, central nervous system, cardiovascular system, skin, reproductive system, and eye. Unit III is concerned with toxic agents, including pesticides, metals, solvents and vapors, radiation and radioactive materials, animal toxins, and plant toxins. Unit IV discusses environmental toxicology, including food, air, water, and soil. Unit V is concerned with applications of toxicology—namely, analytical toxicology, clinical toxicology, occupational toxicology, and regulatory toxicology.

May 1986 800 pages illustrated 0-02-364650-0 \$49.95
