MOLECULAR PHARMACOLOGY

Editor: William A. Catterall, PhD, University of Washington, Seattle, Washington

Is your special interest receptors and neurotransmitters... drug metabolism... antibiotic and anticancer drug actions... or other areas related to the molecular basis of drug action? If so, you should be subscribing to MOLECULAR PHARMACOLOGY.

The editor's and editorial board's high standards ensure that the papers you read in MOLECULAR PHARMACOLOGY are on the cutting edge of research on drug action and selective toxicity at the molecular level. Original applications of biochemistry, biophysics, genetics, and molecular biology are juxtaposed with innovative pharmacologic research to elucidate basic problems in pharmacology and toxicology, including such areas as molecular mechanisms involved in drug receptor-effector coupling, xenobiotic metabolism, and antibiotic and anticancer drug action. Start your subscription today to ensure access to the most newsworthy papers in your field.

THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS
Editor: Eva King Killam, PhD
JPET is respected the world over as one of the leading research journals in the field of pharmacology. Readers find broad coverage of all aspects of the interactions of chemicals with biological systems, including autonomic, behavioral, cardiovascular, cellular, clinical, developmental, gastrointestinal, immunological, neuroendocrine, and renal pharmacology, as well as analgesics, drug abuse, metabolism and disposition, chemotherapy, and toxicology. Monthly

MOLECULAR PHARMACOLOGY

DRUG METABOLISM AND DISPOSITION
The Biological Fate of Chemicals
Editor: Vincent G. Zannoni, PhD
DRUG METABOLISM AND DISPOSITION publishes in vitro and in vivo experimental results that bring readers significant and original information on xenobiotic metabolism and disposition, including metabolism of all pharmacologic agents or drugs and environmental chemicals, reactants, and preservatives. The areas covered are: pharmacokinetics, pharmacodynamics, and mechanisms; genetic, nutritional, or hormonal factors affecting the biological fate of chemicals; toxicological consequences of xenobiotic metabolism. Bimonthly

PHARMACOLOGICAL REVIEWS
Editor: James A. Bain, PhD
PHARMACOLOGICAL REVIEWS is a showcase for important reviews articles in your field, featuring longer papers on topics of high current interest. The areas covered in review papers have included biochemical and cellular pharmacology, drug metabolism and disposition, renal pharmacology, neuropharmacology and developmental pharmacology, clinical pharmacology and toxicology. No library serving the pharmacologic community should be without a subscription. Quarterly
