INDEX

Volume 260, January–March, 1992

A23187, -induced contractions, pharmacological evaluation, lung parenchymal strips (guinea pigs), 714
Ableitner, A., see Aiyesta, F. J., 168
Acetaminophen, alteration of hepatobiliary clearance, long-term diabetes (rats), 1337
Acetic acid, -induced colitis, acceleration of colonic mucosal repair, misoprostol (rats), 313
N-Acetyl-L-asparyl-L-glutamate, inhibition of catabolism, N-acetylated L-glutamate analogs, 1093
Acetylcholine
-ω-conotoxin-sensitive calcium channel, autonomic neurotransmission, airways (guinea pigs), 98
- induced changes, cromakalim, cytosolic calcium and tension in tracheal (swine), 261
- pharmacological properties, potassium currents, tracheal smooth muscle (swine), 1038
Acetylcholinesterase, cardiorespiratory effects of HP 736, anesthetized dog, conscious goat, 1268
6-Acetylmorphine, heroin and morphine effects, threshold for rewarding, aversive brain stimulation (rats), 562
Acquired immunodeficiency syndrome, 3'-azido-3'-deoxythymidine effect, organic ion transport, renal brush border membrane vesicles (rats), 128
Actin, botulinum C3 toxin and steroid production, adrenal Y-1 cells, 569
Action potentials, firing frequency, MK-801, central neurons (mice), 376
ADCl, see 5-Aminocarbonyl-10,11-dihydro-5H-dibenzo[a,d]cycloheptene-5,10-imine
Adenosine
A1 agonists, vasorelaxant activity, coronary artery (pigs), 437
-low level NMDA receptor activation, purinergic inhibitory threshold, neurotransmission in cortex (rats), 1278
renal vascular action, role, endothelium-derived relaxing factor (dogs), 1262
Adenosine triphosphate
endothelium-dependent neural relaxation, pulmonary artery (guinea pigs), 541
-postjunctional release, stimulation of muscarinic receptors, ileal longitudinal muscles (guinea pigs), 1309
-purinergic relaxation, hyperpolarization, coronary artery (guinea pigs, rabbits), 592
-sensitiv potassium channel blockade by 5-hydroxydecanoate, ventricular myocytes (guinea pigs), 702
diazoxide and glyburide, hypertrophied ventricular myocytes (rattus), 254
Adenylate cyclase, inhibition, neuromodulatory effects, atrial natriuretic peptides, 689
Adenyl cyclase
differential coupling, somatostatin receptors, brain (rats), 841
opioid inhibition, inhibition of protein phosphorylation, brain membranes (rats), 1416
Adrenal gland
botulinum C3 toxin and steroid production, adrenal Y-1 cells, 569
hemoprotein-dependent steroidogenesis, inhibition by tin-protoporphyrin (rats), 909
Adrenal medulla, coronary blood flow, release, nitric oxide (rats), 627
Adrenoceptors
alpha
calcium utilization, resistance arteries (humans), 637
endothelin-1 effects on venous tone, sympathetic nervous system (rats), 45
alpha-1, subtype-selective aklylation, pressor response (rats), 709
alpha-2, influence of age, control of nor-epinephrine release (rats), 722
alpha-1A and alpha-2C, prostaglandin synthesis, sorta smooth muscle cells (rabbits), 849
alpha-2D, nonadrenergic idoxan-bind- ing sites, RINm5F cells, 417
beta-3, noradrenergic innervation, ileum (guinea pigs), 192
electrophysiological effects of ethanol, noradrenergic circuitry (rats), 867
pre- and postsynaptic, release of endoge- nous noradrenaline, vascullary peri- fused stomach (rats), 728
Aging, control ofnorepinephrine release, tail artery (rats), 722
Ahlers, S. T., Weissman, B. A. and Barrett, J. E.: Antagonism studies with BMI-7378 and NAN-190: Effects on 5-hydroxy-2-(di-n-propylamino)tetralin-induced increases in punished re- sponding of pigeons, 474
Ahmad, S., Wang, L. and Ward, P. E.: Di- pepidyl(aminopeptidase IV and aminopeptidase M metabolize circulating substance P in vivo, 1257
Airways
autonomic neurotransmission, ω-cono- toxin-sensitive calcium channel (guinea pigs), 98
cholinergic neurotransmission, sensory nerve depletion (guinea pigs), 1073
Aiyar, N., see Edwards, R. M., 175, 933
Akane, A., see Matsubara, K., 974
Albino-Teixeira, A., see Soares-De-Silva, P., 902
Albumin, microvascular, thromboxane A2, lung (guinea pigs), 892
Alcohol
-increased urinary morphine, L-3,4- dihydroxyphenylalanine therapy, Parkinson's disease (humans), 974
sensitivity in selected lines of rats, genetic covariation, 579
Ali, S. F., see Bowyer, J. F., 817
Ali, S. F., see Paule, M. G., 210
Alkylating agents, irreversible affinity li- gand, phencyclidine recognition site, NMDA-type glutamate receptors (cattle), 21
Allen, O. T., see Ogletree, M. L., 789
Allen, J., see Benavides, J., 896
Allen, R. R., see Paule, M. G., 210
Alpha-2 agonists, suppression of motor and autonomic responses, low- and high- intensity thermal stimuli (rats), 795
Altieri, R. J., Diamond, L. and Thompson, D. C.: Omega-conotoxin-sensitive calcium channels modulate autono- mic neurotransmission in guinea pig airways, 98
Amastatin, metabolism of circulating sub- stance P, dipeptidy(aminopeptidase IV, aminopeptidase M (rats), 1257
Amloride, quinacrine and, inhibition of ni- trendipine binding, cardiac mem- branes (rats), 1366
5-Aminocarbonyl-10,11-dihydro-5H-di- benzo[a,d]cycloheptene-5,10-i mine, comparison with structural analogs, ethanol withdrawal seizures (mice), 1017
2-Aminofluorene, adduct levels and acety- lator status, urinary bladder (ham- sters), 865
α-Amino-3-hydroxy-5-methylisoxazole-4- propionate
antagonist 2,3-dihydroxy-6-nitro-7-sulfa- moyl-benzo(quinolarine, relief of spasticity, anxiolytic/anticonvulsant actions (rats, mice), 742
kainate receptor antagonists, hyperventili- tion response, nucleus accumbens and ventral pallidum (rats), 1145
Aminopeptidase M, dipeptidy(aminopeptidase IV and, metabol- olism of circulating substance P (rats), 1257
Aminiiotic fluid, cocaine and metabolite con- centrations, maternal administration (guinea pigs), 587
Amphetamine
behavioral disinhibition and depression, risperidone, oaciperone and halo- peridol (rats), 160
-induced slowing of dopaminergic neu- rons, 5-HT; receptor antagonists ventricular myocytes (rattus), 872
Amphotericin B, acute and subacute neph-
Anticoagulation, vitamin K cycle inhibition, steady-state 5-warfarin conditions (rats), 1081

Anticonvulsants
effects of fluoxetine, brain serotonin, microdialysis in genetically epileptic prairie rats, 553
relief of spasticity, 2,3-dihydroxy-6-nitro-7-sulfamoyl-benzo(\(\text{d}\)) quinoxaline (rats, mice), 742
U-54494 A, block, sodium channel current (mice), 110

Antidepressants
mu opioid receptor binding, neuroblastoma cells, brain and cell membranes (guinea pigs), 9
regulation of 5-HT(1A) receptor function, agonists, hippocampus (rats), 16

Antifungal agents, DAT-582 (ferrets, dogs), 1159

Antiepileptic agents, \(\text{N}\)-glucuronidation of lamotrigine, liver microsomes (humans), 1166
Anti-inflammatory, activity of BF389, arthritus model (rats), 300

Anticoagulant, intrathoracically administered calcium, mechanism of action (mice), 117
long-lasting antagonistic actions, tail-flick test (mice), 1237
opioid and nonopioid components, mechanism of action, tramadol (rats), 275
pharmacological profile, bicyclic cannabino"adin analogs, 201
spinal opioid delta, receptor subtype (mice), 518

Antipsychotics
amphetaminel-induced slowing, dopaminergic neurons, 5-HT(2) receptor antagonists (rats), 872
clozapine, polymorphic human microsomal and cytochrome P450 2D6, 1355
typical and atypical, binding, transiently expressed 5-HT(2C) receptors, 1361
Antipyrine, significant absorption, urinary bladder (rats), 698

Anxiety
preclinical studies of LY237733, (rats), 51
relief of spasticity, 2,3-dihydroxy-6-nitro-7-sulfamoyl-benzo(\(\text{d}\))quinoxaline (rats, mice), 742
Aorta, smooth muscle cells, prostaglandin synthesis, adrenergic stimuli (rabbits), 849
Apnea, 5-hydroxytryptamine-induced, pharmacological characterization (rats), 917
Arachidonate, cytochrome P450-derived metabolites, cyclooxygenase dependency, renovascular actions (rabbits), 104
Arachidonic acid, release and calcium influx, melittin and mastoparan, PC12 cells (rats), 369
Area postrema, mechanisms of vomiting, serotonin-3 receptor agonists (cats), 509
Arginine, renal vascular action of adenosine, role, endothelium-derived relaxing factor (dogs), 1262
L-Arginine, interaction of non-arginine compounds, N\(^\text{6}\)-monomethyl L-arginine (rats), 676
Armstead, W. M., Mirro, R., Zuckerman, S. L. and Leffler, C. W.: Vasopressin modulates cerebrovascular responses to opioids in newborn pigs, 1107
Aronson, M. J., see Kanof, P. D., 355
Arreto, C. D., see Bureau, M. F., 832

Artery
coronary
conversion of nitroglycerin to nitric oxide (cattle), 652
plasminogen-streptokinase activator complex, thrombolytic activity (dogs), 64
prostaglandin E\(_1\)-induced vasorelaxation (pigs), 1128
purinergic relaxation, hyperpolarization (guinea pigs, rabbits), 592
vasorelaxant activity, \(\alpha\)-selective adenosine agonist (pigs), 437
mesenteric, amplification, \(\alpha\) adrenergic vasoconstriction (dogs), 1119
pig, mechanisms of relaxation, potassium channel blockers (pigs), 248

Pulmonary: endothelium-dependent neural relaxation (guinea pigs), 541
histamine receptors, endothelial cell removal (humans), 762
renal, long-term norepinephrine depletion, brief transient ischemia (rats), 902
resistance, calcium utilization, \(\alpha\) adrenoceptors (humans), 637
tail complex prejunctional actions, \(\beta\) dopamine agonists (rats), 568
influence of age, control of norepinephrine release (rats), 722
Arthritis, model, anti-inflammatory activity, BF389 (rats), 300
Ashmore, R. C., see Dauber, I. M., 1250
Asthma, mechanism of inhibitory effects, azelastine, smooth muscle contraction (guinea pigs), 1300
Atkinson, J., see Henrion, D. I.
Ator, N. A., see Griffiths, R. R., 1199
Atria, catecholamine-mediated positive inotropic effect, simple quinones, superoxide anion generation (guinea pigs, rats), 489
Atrial natriuretic factor, binding to lung membranes, peptidase inhibitors (mice), 1373
Atrial natriuretic peptides
captopril and, renal hemodynamics, heart failure (rats), 349
neuromodulatory effects, inhibition of adenylyl cyclase, PC12 cells, 689
pharmacological profile of HS-142-1 (rats, 825
Atropine, sodium nitroprusside and, smooth muscle relaxation, exposure to catecholamines (rats), 756
Atropine, postjunctional ATP release, muscarinic receptors, ileal longitudinal muscles (guinea pigs), 1309
Au, J. L.-S., see Dalton, J. T., 608
Autoradiography, quantitation of norepinephrine uptake sites, nisoxetine radioligand (rats), 427
Autoreceptors
5-HT(1A) receptor characterization, spinal cord (rats), 614
yohimbine effect, renal sympathetic nerve activity, renal norepinephrine spill-over (rabbits), 786
Awouters, F. H. L., see Megens, A. A. H. P., 146, 160
Axon terminals, NMDA and non-NMDA receptors, regulation, hippocampal norepinephrine release (rats), 232, 235
Azelastine, mechanism of inhibitory effects, smooth muscle contraction (guinea pigs), 1300
Azevedo, see Soares-Da-Silva, P., 902
3'-Azido-3'-deoxythymidine, organic ion transport, renal brush border membrane vesicles (rats), 128
Azo dyes, binding and release, role of electronic factors, hepatic microsomes (rats), 554
Baba, H., see Toda, N., 697
Baiely, J. R., see Paul, M. G., 210
Bandiera, S. M., see Chang, T., 1441
Barbiturates, zolpidem behavioral pharmacology (baboons), 1199
Barnes, P. J., see Liu, S. F., 541
Baroreceptor reflex, coronary blood flow, protein kinase C inhibitors (rats), 627
Barr, R., see Lopaschuk, G. D., 1220
Barrett, J. E., see Ahlers, S. T., 474
Basal ganglia, opposite effects of NMDA receptor blockade, 6-hydroxydopamine model of turning (rats), 402
Basophils, modulation of histamine release, protein kinase C inhibitors, secretagogue (humans), 1028
Bathon, J. M., Manning, D. C., Goldman, D. W., Towns, M. C. and Proud, D.: Characterization of kinin receptors on human synovial cells and upregulation of receptor number by interleukin-1, 384
Bay K 8644 amplification of alpha adrenergic vasoconstriction, mesenteric artery and vein (dogs), 1119
different solvents, action as transient calcium channel antagonist, 906
Beauchamp, D., Gourde, P., Thériault, G. and Bergeron, M. G.: Age-dependent gentamicin experimental nephrotoxicity, 444
Behavior
diainhibition and depression, risperidone, ocapepride and haloperidol (rats), 160
progressive ratio and conditioned position responding, chronic marijuana smoke exposure (monkeys), 210
punished responding, antagonism studies, BMY-7378 and NAN-190 (pigeons), 474
Reinfeld, M. C., see Brog, J. S., 343
Belardinelli, L., see Shyrock, J. C., 1292
Bellward, G. D., see Chang, T., 1441, 1450
Benedek, A. M., see Wong, W.-S. F., 714
Beslany, D. N., see Bendele, A. M., 300, 1194
Benzodiazepine agonist and antagonist, pharmacodynamic interaction (rats), 36
withdrawal, gastrointestinal motor alterations (rats), 1067
zolpidem behavioral pharmacology (baboons), 1199
Benzoylcoenzyme, cocaine and metabolite concentrations, maternal administration (guinea pigs), 587
Benzylpenicillin, disposition of cefodizime (rats), 496
Bergeron, M. G., see Beauchamp, D., 444
Berry, R., see Bolger, G. T., 1314
Bestatin, H+ coupled active transport, intestinal brush-border membranes (rabbits), 482
Beutler, J. J., Boer, W. H., Koomana, H. A. and Mees, E. J. D.: Comparative study of the effects of furosemide, ethacrynic acid and bumenitone on the lithium clearance and diluting segment reabsorption in humans, 768
BF389 anti-inflammatory activity, arthritism model (rats), 300
peak tissue levels, correlation, anti-inflammatory activity (rats), 1194
B-HT 933, calcium utilization, alpha adrenceptors, resistance arteries (humans), 637
Bicarbonate, lithium clearance and diluting segment reabsorption, furosemide, ethacrynic acid and bumenitone (humans), 768
Bidault, R., see Magdalou, J., 1166
Bilirubin, alteration of hepatobiliary clearance, long-term diabetes (rats), 1337

Black, A., see Dong, M. K., 319
Black, C. K., see Kehe, J. H., 78
Bladder
DNA adduct levels, acetylcholinesterase, Syrian inbred hamsters, 865
urinary protein excretion and absorption of antipyrine (rats), 608
urinary incontinence, pharmacological evaluation, JO 1870 (rats), 1152
Blanchard, J. C., see Blanchereau, P., 1433
Blood flow coroanry, release, vascular nitric oxide (rats), 627
reduced, somatostatin, central nervous system (rats), 1425
Blood pressure captopril effects, placental blood flow, uterine oxygen consumption (rabbits), 294
coronary blood flow, release, nitric oxide (rats), 627
effect of anipamil, survival, uremia (rats), 243
pharmacological characterization, SK&F 108586 (rats), 175
preeclamptic studies of LY227733 (rats), 51 systemic effects, of U-68,215, gastric emptying (primates), 1023
Blood vessels
acute vascular homologous tachyphylaxis, regional variation (cats, dogs, rabbits), 644
cerebral, multiple muscarinic binding site subtypes (cats, humans), 660
BM 13,505, thromboxane receptors, interspecies differences (rats, guinea pigs), 789
BMY-7378, NAN-190 and, antagonism studies (pigeons), 474
Boer, W. H., see Beutler, J. J., 768
Böhm, G. A., see Blanchereau, P., 1433

Botulinum C toxin, steroid production and, role of microfilaments, adrenal Y-1 cells, 859
Bourreau, J.-P., see Shimamoto, H., 1119
Bowen, W. D., see Mattia, A., 518
Boyer, C. S. and Petersen, D. R.: Enzymatic basis for the transesterification of cocaine in the presence of ethanol: Evidence for the participation of microsomal carboxylesterases, 939
Brady, J. V., see Griffiths, R. R., 1199
Bradykinin, cromakalim and, mechanisms of relaxation, coronary artery (pigs), 148
Brain
aversive stimulation, threshold for rewarding, heroin/6-acetylmorphine/morphine (rats), 562
binding sites of ifenprodil, pharmacological characterization (brain), 896
cadizate-paratame/cortex/bicampus, cholecytokinin release, D, dopamine receptor (rats), 343
cerebral vasculature, multiple muscarinic binding site subtypes (cats, humans), 660
cocaine and metabolite concentrations, maternal administration (guinea pigs), 587
coupling of somatostatin receptors, adenylyl cyclase (rats), 841
high-affinity dextromethorphan, 3-(3-hydroxyphenyl)-N-(1-proplypipéline binding sites, ropixine allosteric effects (rats), 990
imidazoline receptors, normotensive and hypertensive rats, 1000
membranes, inhibition of protein phosphorylation, opioid-inhibited adenylyl cyclase (rats), 1418
modulation of cerebrovascular responses to opioids, vasopressin, newborns (pigs), 1107
neuroblastoma cell membranes and, mu opioid receptor binding (guinea pigs), 9
norsadenergic circuitry, electrophysiological effects, ethanol (rats), 887
regional energy metabolism, effects of naftidrofuryl oxalate, cerebral embolism (rats), 1058
role of fourth cerebroventricle, nicotine-stimulated prolactin release, catecholamines (rats), 1285
serotonin, fluoxetine effects on convulsions, genetically epilepsy-prone rats, 533
Brainstem
cholecystokinin and cholecystokinin receptors, pharmacological identification (rats), 1433
azole-4-propionate, kainate receptor antagonists, hypermotility response (rats), 1145
Calcitonin gene-related peptide, functional innervation, tracheal smooth muscle (pigs), 1180
Calcium complex prejunctional actions, D2 dopamine agonists, tail artery (rats), 568
cytosolic, acetylcholine-induced changes in tracheal, cromakalin effects (swine), 261
entry blocker anapamin, renal function and survival (rat), 243
extracellular, endothelin-1 effect, gallbladder smooth muscle (guinea pigs), 545
furan, melittin and mastoparan, PC12 cells (rat), 369
intrathecal administration, mechanism of action, antinociceptive effect (mice), 117
mechanism of inhibitory effects, azelazine, smooth muscle contraction (guinea pigs), 1300
mobilization, receptor-coupled G-proteins, intestinal muscle cells (guinea pigs), 90
overload, chronic isradipine treatment, vitamin D3 and nicotine (rat), 1
pharmacological properties, potassium currents, tracheal smooth muscle (swine), 1038
saponin-permeabilized platelets, inositol 1,4,5-trisphosphate-induced aggregation (humans), 947
utilization, alpha adrenoceptors, resistance arteries (humans), 637
Calcium channel α-conotoxin-sensitive, autonomic neurotransmission, airways (guinea pigs), 98
currents, action of Bay K-8644, different solvents, 966
Calcium channel blockers effect of diltiazem, glycolysis and oxidative metabolism, ischemia (rats), 1220
time-dependent protective effects, anoxia- and hypoxia-induced proximal tubule injury (rat), 526
Calligaro, D. O., see Foreman, M. M., 51
Cameron, D. C., see De Luca, A., 364
Cameron, J. S., see Ciampiollio, F., 254
Cannabinoid analogs, bicyclic, pharmacological profile, 201
Capdeville-Atkinson, C., see Henrion, D., 1
Captopril ANF and, renal hemodynamics, heart failure (rats), 349
blood pressure and placental blood flow, uterine oxygen consumption, pregnancy (rabbis), 294
Carbamazepine, compared to ADCI, ethanol withdrawal seizures (mice), 1017
Carboxylesterases, microsomal, transasterealization of cocaine, presence of ethanol (mice), 939
Cardiomyopathy, cardiac responses and binding sites, endothelin, 1314

Eicosanoids
cyclo-xygenase P450-derived arachidonate metabolites, cyclooxygenase dependence, renovascular actions (rabbits), 104
multiple actions of SC-41930 (humans), 187
Elastase, inhibitor SR 26831, biochemical and pharmacological activities (humans), 809
Electroencephalography, pharmacodynamic interaction, midazolam, flumazenil (rats), 36
Electrophysiology
actions of UD-CG 212 Cl, myocardium (guinea pigs), 58
depressant effects of ethanol, genetic covariation, selected lines of rats, 879
effects of ethanol, noradrenergic circuitry (rats), 887
Elfarra, A. A., see Sausen, P. J., 393
Eltzoprazine, discriminative stimulus properties (rats), 1045
Emboli, cerebral, brain regional energy metabolism, nafidrofuryl oxalate effects (rats), 1058
Emesis, mechanisms of vomiting, serotonin-3 receptor agonists (cats), 509
Emmett-Oglesby, M. W., see Ayesta, F. J., 168
Emphysema, elastase inhibitor SR 26831, biochemical and pharmacological activities (humans), 809
Enalapril, antiproteinuric action, urinary prostatic glandular, stroke-prone SHR rats, 1410
17-Endorphin, induced tail flick inhibition, antagonism by cholecystokinin (mice), 1086
Endothelial cells, removal, histamine receptors, pulmonary arterial muscle (humans), 762
Endothelin-1, acetylated, constrictor, lung vasculature (guinea pigs), 632
amplification of alpha adrenergic vaso-
Glucose
brain regional energy metabolism, cerebral embolism, effects of naftridofuryl oxalate effects (rats), 1058
catecholamine-releasing and hyperglycemic effects, central 5-HT2 receptor, p-fenfluramine (rats), 1008
glycolysis and oxidative metabolism, effects of diltiazem, ischemic/reperfusion heart (rats), 1220
Glutamate
N-acylated analogs, inhibition, N-acetyl-1-sarcosyl-L-glutamate catabolism, 1093
dopamine levels and release in striatum, environmental temperature, methamphetamine (rats), 817
neuroprotective effects, ifenprodil and SL-92,0715, hippocampal cells (rats), 925
Glutathione
conjugation of four 2-bromo-3-methylvaleric acid stereoisomers, chiral inversion (rats), 1349
melphalan conjugation, direct measurement, human melanoma cells and mammaryl liver, 1331
Glutathione S-transferases, conversion of nitroglycerin to nitric oxide, coronary artery smooth muscle (cattle), 652
Glyburide
diazoxide and, ATP-sensitive K+ channels, hypertrophied ventricular myocytes (rats), 254
vasorelaxant activity, A-selective adenosine agonist, coronary artery (pigs), 437

Newsworthy and timely articles in your field

MOLECULAR PHARMACOLOGY

Editor: T. Kendall Harden, PhD, University of North Carolina School of Medicine, Chapel Hill, North Carolina
Is your special interest receptors and neurotransmitters…drug metabolism…antibiotic and anticancer drug actions…or other areas related to the molecular basis of drug action? If so, you should be subscribing to MOLECULAR PHARMACOLOGY.

The editor's and editorial board's high standards ensure that the papers you read in MOLECULAR PHARMACOLOGY are on the cutting edge of research on drug action and selective toxicity at the molecular level. Original applications of biochemistry, biophysics, genetics, and molecular biology are juxtaposed with innovative pharmacologic research to elucidate basic problems in pharmacology and toxicology, including such areas as molecular mechanisms involved in drug receptor-effector coupling, xenobiotic metabolism, and antibiotic and anticancer drug action. Start your subscription today to ensure access to the most newsworthy papers in your field. Monthly

Call toll-free to start your subscription immediately, 1-800-638-6423 from anywhere in the U.S. or Canada.

INFORMATION TO SUBSCRIBERS

THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS is issued monthly. Four volumes are published each year. Each volume contains three numbers.

Correspondence concerning business matters should be addressed to Williams & Wilkins, 428 East Preston St., Baltimore, MD 21202-3993 U.S.A.

Annual Subscription Rates—U. S. A. AND POSSESSIONS: personal, $180.00; institutional, $310.00; single copy, $19.00. FOREIGN: personal, $245.00; institutional, $375.00; single copy, $23.00. (Prices subject to change.) Institutional (multiple reader) rate applies to libraries, schools, hospitals, clinics, group practices, and federal, commercial, and private institutions and organizations. Foreign subscribers who wish to have issues sent by airmail may inquire of the publisher for the additional cost. The GST Tax Number for Canadian subscribers is 123394371.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions are entered to begin with the next issue to publish unless otherwise specified by the subscriber. Subscriptions run for a twelve-month period.

To avoid a break in your series, subscriptions should be renewed promptly. The publisher cannot guarantee to supply back issues on belated renewals.

Reprints of individual articles are available only from authors.

Microfilm. For availability, inquire of Williams & Wilkins.

WILLIAMS & WILKINS
BALTIMORE, MD 21202-3993 U.S.A.
## RATS/MICE ROTATION METER
Counts left, right and partial rotations. Single data collection unit for 1 to 8 animals. Self standing with its' own printer, it can also transfer data via RS-232 to PC.

## END-TIDAL CO₂ METER FOR MICE AND RATS
Extremely small air sample 5ml/min. High frequency response (150 or 300 breath/min). Analog output for recorders. Equipped with own printer. Digital display for end tidal CO₂ and N₂O.

## VO₂/VCO₂ MEASUREMENTS DURING EXERCISE
Complete computerized systems for mice, rats, dogs and horses. Include multi-lane enclosed animal exercisers with adjustable speed and inclination.

## MULTIPLE ANIMAL VIDEO TRACKING
Tracks multiple animals sharing the same space using color markers for identification. Also measures activity, (distance traveled) rotations, visits to zones etc. of multiple animals in multiple cages using black/white contract principle. Ideal for water mazes.

## GRIP-STRENGTH METER
Objective measurements of animal deficiency in strength.

## "FIGURE-8" AND RADIAL MAZES
System of 1 to 8 mazes controlled by IBM-PC, supplied with software. Animal location is monitored by multiple IR beams.

## MULTIPLE CAGE ANIMAL ACTIVITY METER
128 individual IR beams interfaced to IBM-PC monitor multiple standard plastic cages. Software differentiates ambulatory from non-ambulatory activity, can operate 64 cages with 2 IR beams assigned for each cage.

## PASSIVE/ACTIVE AVOIDANCE

## RESPIRATION FREQUENCY RELATIVE TIDAL VOLUME
Measure respiration frequency and relative tidal volume of free running animals by monitoring small pressure changes with each breath. Continuous supply of air to animals. Normal size cages (1 to 16). Computer data collection.

## STARTLE RESPONSE SYSTEM
IBM-PC based. 1 to 8 animals. Software control of stimulus and pre-pulse. Calibrated sensors (load cells). Systematic or random stimulus delivery. Acoustic, air puff and electric stimulus.
