

Leading Pharmacology Journals

Publications of the American Society for Pharmacology and Experimental Therapeutics, Inc.

The Journal of Pharmacology and Experimental Therapeutics

Editor: John A. Harvey, Ph.D.

JPET is respected the world over as one of the leading research journals in the field of pharmacology. Readers find broad coverage of all aspects of the interactions of chemicals with biological systems, including autonomic, behavioral, cardiovascular, cellular, clinical, developmental, gastrointestinal, immuno-, neuro-, pulmonary, and renal pharmacology, as well as analgesics, drug abuse, metabolism and disposition, chemotherapy, and toxicology. *Monthly*

Drug Metabolism and Disposition: the biological fate of chemicals

Editor: Vincent G. Zannoni, Ph.D.

Drug Metabolism and Disposition publishes in vitro and in vivo experimental results that bring readers significant and original information on xenobiotic metabolism and disposition, including metabolism of all pharmacologic agents or drugs and environmental chemicals, reactants and preservatives. The areas covered are: pharmacokinetics, pharmacodynamics and mechanisms, genetic, nutritional, or hormonal factors affecting the biological fate of chemicals, toxicological consequences of xenobiotic metabolism. *Bimonthly*

Pharmacological Reviews

Editor: Robert E. Stitzel, Ph.D.

Pharmacological Reviews is a showcase for important review articles in your field, featuring longer papers on topics of high current interest. The areas covered in review papers have included biochemical and cellular pharmacology, drug metabolism and disposition, renal pharmacology, neuropharmacology, behavioral pharmacology, clinical pharmacology, and toxicology. No library serving the pharmacologic community should be without a subscription. *Quarterly*

Molecular Pharmacology

Editor: T. Kendall Harden, Ph.D.

The papers published in **Molecular Pharmacology** are on the cutting edge of research on drug action and selective toxicity at the molecular level. Original applications of biochemistry, biophysics, genetics, and molecular biology are juxtaposed with innovative pharmacologic research to elucidate basic problems in pharmacology and toxicology, including such areas as molecular mechanisms involved in drug receptor-effector coupling, xenobiotic metabolism, and antibiotic and anticancer drug action. *Monthly*

An important resource for everyone
involved in research on the
metabolism of drugs and chemicals

DRUG METABOLISM AND DISPOSITION

The Biological Fate of Chemicals

Editor: Vincent G. Zannoni, PhD, University of Michigan,
Ann Arbor, Michigan

DRUG METABOLISM AND DISPOSITION publishes *in vitro*
and *in vivo* experimental results that bring readers significant
and original information on xenobiotic metabolism and
disposition, including metabolism of all pharmacologic agents
or drugs and environmental chemicals, reactants, and preser-
vatives. All papers are refereed to ensure a high standard of
publication. The areas covered are:

- pharmacokinetics
- pharmacodynamics
- genetic, nutritional, and hormonal factors affecting the
biological fate of chemicals
- toxicological consequences of xenobiotic metabolism

This journal should be a standard reference in all pharmacology
and toxicology departments. It is also a valuable resource for all
medicinal chemists involved in designing drugs and all biochemists
involved with drug metabolism.

Bimonthly

Zinc Protoporphyrin IX

NEW

Inhibitor of hepatic heme oxygenase.

Cat. No. Z-102

Verma et al. "Carbon monoxide: A putative neural messenger."

Science 259, 381 (1993).

NG-Monomethyl-L-arginine acetate

NO synthetase inhibitor. Cat. No. M-125

Olken et al. *Biochem. Biophys. Res. Commun.* 177(2), 828 (1991).

S-Nitroso-N-acetylpenicillamine (SNAP)

Potent vasodilator; releases nitric oxide when administered *in vivo*. Cat. No. N-152

Schaeffer et al. *J. Pharmacol. Exp. Ther.* 260(1), 286 (1992).

OTHER FEATURED RBI PRODUCTS

Bay K 8644

(+/-) Ca²⁺ slow channel agonist. Cat. No. B-112

S(-) Ca²⁺ channel activator. Cat. No. B-133

R(+) Ca²⁺ channel blocker. Cat. No. B-132

DOI HCl

(+/-) Potent and selective 5HT₂/5HT_{1C} serotonin agonist that crosses the blood brain barrier.

Cat. No. D-101

R(-) More potent enantiomer. Cat. No. D-153

S(+) Less potent enantiomer. Cat. No. D-154

Naltrindole HCl

Highly selective, non-peptide δ -opioid antagonist.

Cat. No. N-115

CGP-23996

A non-reducible analog of somatostatin suitable for iodination; the radioiodinated molecule can be used in binding assays for somatostatin receptors.

Cat. No. C-176

Thiobutabartibal sodium salt (Inactin®)

Long-lasting animal anesthetic. Cat. No. T-133
