

Broad coverage of pharmacology
in a prestigious journal

THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS

Editor: **John Harvey, PhD**, The Medical College
of Pennsylvania

JPET is respected the world over as one of the leading research journals in the field of pharmacology. Readers find broad coverage of all aspects of the interactions of chemicals with biological systems, including:

- autonomic pharmacology
- analgesia
- behavioral pharmacology
- cardiovascular pharmacology
- cellular pharmacology
- chemotherapy
- clinical pharmacology
- developmental pharmacology
- drug abuse
- drug metabolism & disposition
- gastrointestinal pharmacology
- immunopharmacology
- neuropharmacology
- pulmonary pharmacology
- renal pharmacology
- toxicology

JPET is valuable reading for academic, industrial and clinical pharmacologists as well as toxicologists. The Journal deserves a place in every pharmaceutical and toxicological research laboratory and pharmacology/toxicology department throughout the world.

MD and PA subscribers must add state sales tax. Subscriptions outside the US and Canada must be prepaid, in US dollars only. In Japan, contact Igaku-Shoin MYW, Ltd. (03) 5689-5400. Rates valid for orders received before October 31, 1994.

Please allow 8 weeks for delivery of your first issue. Surface mail delivery to countries outside the US may take up to 16 weeks. Airmail rates available upon request.

Discounts available to members on all ASPET publications. SAVE 10% when ordering two, SAVE 15% when ordering three, SAVE 20% when ordering all four.

Newsworthy and timely
articles in your field

MOLECULAR PHARMACOLOGY

Editor: **T. Kendall Harden, PhD**, University of North Carolina
School of Medicine, Chapel Hill, North Carolina

Is your special interest receptors and neurotransmitters... drug
metabolism... antibiotic and anticancer drug actions... or other
areas related to the molecular basis of drug action? If so, you
should be subscribing to **MOLECULAR PHARMACOLOGY**.

The editor's and editorial board's high standards ensure that the
papers you read in **MOLECULAR PHARMACOLOGY** are on the
cutting edge of research on drug action and selective toxicity at the
molecular level. Original applications of biochemistry, biophysics,
genetics, and molecular biology are juxtaposed with innovative
pharmacologic research to elucidate basic problems in pharma-
cology and toxicology, including such areas as molecular mecha-
nisms involved in drug receptor-effector coupling, xenobiotic
metabolism, and antibiotic and anticancer drug action. Start your
subscription today to ensure access to the most newsworthy papers
in your field. **Monthly**

Call toll-free to start your subscription immediately, **1-800-638-6423**
from anywhere in the U.S. or Canada.

RBI THE RESEARCHER'S GOLD STANDARD

RECOMBINANT RECEPTORS

RBI introduces recombinant receptors as **ready to use reagents** for drug discovery activities, including **screening** of new molecular entities. RBI offers one step access to a growing number of G-protein coupled receptors, available in the form of **frozen cell membranes** containing high concentrations of **specific receptor subtypes**.

RBI's products feature high quality, specificity, sensitivity, stability and convenience, without requiring any change in your current assay protocols. Ideally suited for antagonist binding assays, RBI's recombinant receptors find application in subtype selectivity testing, cross-reactivity tests, high-flux binding screens and as standard reagents for signal transduction research.

RECEPTOR	SUBTYPE	CAT. No.
Adrenergic	β_1 (human)*	B-143
	β_2 (human)*	B-144
Dopamine	D ₁ (human)*	D-178
	D _{2S} (human)*	D-179
	D _{2L} (human)*	D-180
	D ₃ (human)	D-152
	D ₃ (rat)*	D-181
	D _{4.2} (human)**	D-177
Muscarinic	D ₅ (human)*	D-182
	M ₁ (human)*	M-174
	M ₂ (human)*	M-175
	M ₃ (human)*	M-176
	M ₄ (human)*	M-177

Recombinant receptors are supplied as 1.0 ml frozen cell membrane suspensions for 100 assay points. Available for immediate delivery.

* Manufactured for RBI by BioSignal.

**Manufactured for RBI by Panlabs; supplied as non-viable frozen cells.

The newest edition of *Neurotransmissions* features "MK-801 (Dizocilpine Maleate) - NMDA Receptor Antagonist" by Leslie L. Iversen, FRS. Write for your free copy.
