THINK GLOBALLY. TARGET LOCALLY.

Whether you're looking at whole systems or local phenomena, the new Model 2004 ALZET® osmotic pump helps you observe the in vivo effects of compounds more accurately.

This miniature, implantable pump continuously delivers your test agents for four weeks, at a rate of 0.25 µl/hr. Its small size, long duration, and low flow rate make the Model 2004 ideal for brain infusion or targeted delivery in mice and rats.

ALZET pumps offer more accurate in vivo delivery. By sustaining compound levels in plasma and tissues, they allow the effects of your agent to develop fully and reproducibly. ALZET pumps have successfully delivered hundreds of agents— including proteins and other short half-life compounds. Using a simple catheter attachment, you can localize delivery to specific areas. And operation is fully automatic, eliminating the need for complicated dosing schedules.

Look at drug delivery from a new perspective. Call ALZET Technical Services at (800) 524-0095 or (415) 962-2251. Specify your region of interest, and we'll send an information package that will reveal a world of possibilities.

alzet®
OSMOTIC PUMPS
Notice to Contributors

(Revised July 1, 1994)

Scope of Submitted Manuscripts

The Journal invites for review original papers dealing with interactions of chemicals with biological systems. Any aspect of pharmacology and therapeutics is included, but descriptive case reports without dose response or mechanism studies are not accepted. Manuscripts dealing primarily with new methods will be reviewed only if data are presented showing new or more reliable pharmacological information has been obtained by use of the methods.

Submission of Manuscripts

Submit four copies of manuscript to Dr. John A. Harvey, Editor in Chief, Journal of Pharmacology and Experimental Therapeutics, Medical College of Pennsylvania and Hahnemann University, EPP Conference Center, Suite 506D, 3300 Henry Avenue, Philadelphia, PA 19129, accompanied by a check or purchase order for $40.00 manuscript handling fee (in U.S. funds drawn on a U.S. bank payable to ASPET). If submission of the manuscript handling fee exceeds hardship to the author, the fee will be waived. In that event the authors should submit a request for waiver of the fee at the time the manuscript is submitted. Only one copy of rejected manuscripts will be returned. Extra copies of figures will not be returned unless specifically requested at the time the manuscript is submitted.

Manuscripts should be typewritten and double spaced in the English language using one side only of approximately 21.6 by 28 cm paper. One original drawing or photograph of each line figure and four (4) clear copies and/or 4 original drawings or photographs of each halftone figure are required. Pages should not be stapled together.

Authors submitting a manuscript do so with the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Society for Pharmacology and Experimental Therapeutics. Reasonable requests by authors for permission to reproduce their contributions to the Journal will not be refused. It will be necessary for all authors to sign an assignment of copyright form which will be mailed from the Editorial Office on acceptance of the manuscript. The only exceptions will be manuscripts on work performed by employees of the United States Federal Government.

Cover Letter

Each manuscript must be accompanied by a written statement signed by one author: "The undersigned author affirms that the manuscript (title of article) and the data it contains are original, are not under consideration by another journal, and that it has not been published previously." The authors submitting in this manuscript have been carried out in accordance with the Declaration of Helsinki and/or with the Guide for the Care and Use of Laboratory Animals as adopted and promulgated by the National Institute of Health*. Authors should also indicate in the cover letter the field of pharmacology to which the research applies.

Organization of the Manuscript

In most cases manuscripts should contain the following sections in the order listed; each section should begin on a new page and all pages should be numbered consecutively.

1. Title page. This should contain the complete title of the manuscript, the names of all authors, and the laboratory of origin. Support for the research should be indicated as a numbered footnote to the title and included with other footnotes on a separate page following the reference section.

2. Running title page. a) A running title: should be included at the top of this page and should contain no more than 35 spaces, including punctuation. It should convey the sense of the full title. Commonly used abbreviations (such as "ATP," "ACH," etc.) may be used in the running title. b) Corresponding author: this page should also contain the name, address, telephone, and number of the person to whom all correspondence should be sent. c) A list of abbreviations used in the paper should also appear on this page. Additionally, each abbreviation should be defined the first time it is used in the text.

The Journal of Pharmacology and Experimental Therapeutics

No more than four references should be cited in support of any given point. The authors are responsible for accuracy of such citations and are urged to take the utmost care in proofreading citations and the reference list.

10. Footnotes. All footnotes to the title, authors' names or text should be indicated by arabic numeral superscripts, not by letters or other symbols. The footnotes should be typed in sequence on a separate page, not a text page. Footnotes to tables are discussed under Tables, below.

11. Tables. Each table should be on a separate page. Tables should be numbered consecutively with arabic numerals and should be designed to fit the column or page size of the Journal. A brief descriptive title should be given at the top of each table. The table number should be given in capital letters, the title in boldface upper and lower case letters (e.g., TABLE 2).

Uptake of labeled drug by rat liver slices. The footnotes to the tables should be referenced by italicized lower case superscript letters (a, b, c, etc.) and should appear beneath the table involved, not on a separate page of the manuscript. Extensive tabular material not absolutely essential to the manuscript will be accepted for deposit with the ASIS/NAPS (see “Methods,” above). In such instances a footnote in the published paper will refer the interested readers to NAPS from which copies may be obtained. Note Statistics below for expressions of probability.

12. Legends for figures. These should be numbered consecutively in arabic numerals and should appear on a separate page of the manuscript. Legends should explain the figures in sufficient detail so that frequent referral to the text is unnecessary, but efforts should be made to avoid unecessary length. Abbreviations in the legends should conform to those in the text (see “Abbreviations,” below).

13. Figures. Illustrations should be submitted as unmounted glossy prints, or laser jet quality figures, preferably reduced to single column size (approximately 3/4 inches in width) to permit reproduction without further reduction. Otherwise, prints should be no larger than 8 by 10 inches and clear enough to permit reproduction without retouching after reduction. The author's name and address and the number of the figure should be placed on the back of each print. A typed label is usually most satisfactory. Ball type pen should not be used. Note Statistics below for expression of probability. Uniform symbolism should be used for all illustrations in a manuscript. Symbols, numbers, and letters in the illustrations must be at least 1.5mm in height after reduction to single column size. The title of each figure should appear in the legend rather than on the figure itself. Photomicrographs and electron micrographs should be labeled with a magnification calibration in micro or Angstrom units. A statement of the magnification should appear in the figure legend.

14. Index Terms. A list of index terms useful in constructing the annual index should be included as the last page of the manuscript.

Statistics
Wherever possible statistical probability (P) in tables, figures, and figure legends should be expressed as P < .05, ** P < .01 and *** P < .001. For second comparisons the symbols † may be used similarly. Authors are urged to avoid unnecessary complexity and to be consistent within the manuscript. In the event of multiple comparisons within a table, footnotes, a, b, c, etc. should be used.

Abbreviations
Magnitudes of variables reported should be expressed in numerals. Most abbreviations are used without punctuation, with no distinction between singular and plural forms (e.g., 1 mg, 25 mg; 1 sec, 25 sec). The usual prefixes are to be used for multiples or submultiples of the basic units (e.g., kg, g, mg, µg, µg, pg). The following abbreviations, or their properly prefixed multiples or submultiples, may be used without definition in the text, tables and figures:

<table>
<thead>
<tr>
<th>Units of mass</th>
<th>Units of electricity</th>
</tr>
</thead>
<tbody>
<tr>
<td>g</td>
<td>volt</td>
</tr>
<tr>
<td>mole</td>
<td>ampere</td>
</tr>
<tr>
<td>equivalent</td>
<td>cycles/sec</td>
</tr>
<tr>
<td>microgram</td>
<td>Hz</td>
</tr>
</tbody>
</table>

Units of concentration:

<table>
<thead>
<tr>
<th>Molar (moles/liter)</th>
<th>Units of radioactivity</th>
</tr>
</thead>
<tbody>
<tr>
<td>liter</td>
<td>curie</td>
</tr>
<tr>
<td>normal (Eq/liter)</td>
<td>counts per min</td>
</tr>
<tr>
<td>percent</td>
<td>roentgen</td>
</tr>
</tbody>
</table>

Units of length:

<table>
<thead>
<tr>
<th>meter</th>
<th>hour</th>
</tr>
</thead>
<tbody>
<tr>
<td>micron</td>
<td>minute</td>
</tr>
<tr>
<td>Ångstrom</td>
<td>second</td>
</tr>
</tbody>
</table>

Kinetcs:

<table>
<thead>
<tr>
<th>dissociation constant</th>
<th>enzyme substrate complex</th>
</tr>
</thead>
<tbody>
<tr>
<td>Kd</td>
<td>Ks</td>
</tr>
</tbody>
</table>

Miscellaneous:

<table>
<thead>
<tr>
<th>degrees of temperature</th>
<th>gravity</th>
</tr>
</thead>
<tbody>
<tr>
<td>°C</td>
<td>mg</td>
</tr>
<tr>
<td>i.v.</td>
<td>i.p.</td>
</tr>
<tr>
<td>S.D.</td>
<td>S.E.</td>
</tr>
</tbody>
</table>

Whenever an abbreviation other than those above is to be used in a manuscript, it is to be defined in the text or in a footnote thereto, the first time it is used. Abbreviations for commonly used substances should be those recommended by the Journal of Biological Chemistry. Abbreviations for drugs may be used if properly defined on first use and if the chemical or generic name of the drug is given when the abbreviation is first used. Abbreviations may be used in the running title but not in the full title of the manuscript.

Drugs
Generic names should be used in text, tables and figures. Trade names may be mentioned in parentheses in the first text reference to the drug but should not appear in titles, figures or tables. When a trade name is used, it should be capitalized; generic or chemical names are not capitalized. The chemical nature of new drugs must be given when it is known. The form of drug used in calculations of doses (e.g., base or salt) should be indicated. When several drugs are used, it may save space to include a separate paragraph in “Methods,” or a separate table or footnote, listing the relevant information about all drugs employed.

Page Charges
Authors are assessed page charges at the rate of $30 per printed page. With the page proof, authors will receive a request for information concerning such charges. These charges will be assessed only if they involve no personal expense to the authors. Request for waiver should be addressed to the ASPET Executive Officer at the time billing is received.

The cost of a limited number of illustrations will be borne by the Journal; the cost of excessive illustrations and of colored illustrations will have to be defrayed by the authors.

After acceptance: When the field editor recommends acceptance of an article for publication, authors are encouraged to submit electronic diskettes of the final version along with the typed REVISED manuscript. The author will receive a packet of information containing copyright forms and detailed instructions pertaining to the publication of their manuscript.

Reprints and page charges. An order form for reprints as well as information on the estimation of page charges will be mailed with the galley proof. Please direct questions on page charges, or other business matters to Kay Croker, Executive Officer, American Society for Pharmacology and Experimental Therapeutics, 9650 Rockville Pike, Bethesda, MD 20814.
