Scope of Submitted Manuscripts
The Journal invites for review original papers dealing with
interactions of chemicals with biological systems. Any aspect of
pharmacology and therapeutics is included, but descriptive case
reports without dose response or mechanism studies are not
accepted. Manuscripts dealing primarily with new methods will be
reviewed only if data are presented showing new or more reliable
pharmacological information has been obtained by use of the
methods.

Submission of Manuscripts
Submit four copies of manuscript to Dr. John A. Harvey,
Editor in Chief, Journal of Pharmacology and Experi-
mental Therapeutics, Medical College of Pennsylvania
and Hahnemann University, EPPI Conference Center,
Suite 500D, 3200 Henry Avenue, Philadelphia, PA 19129,
accompanied by a check or purchase order for $40.00 manu-
script handling fee (in U.S. funds drawn on a U.S. bank
payable to ASPET). If submission of the manuscript handling
fee entails personal financial hardship to the author, the fee
will be waived. In that event the authors should submit a request
for waiver of the fee at the time the manuscript is submitted. Only
one copy of rejected manuscripts will be returned. Extra copies
of figures will not be returned unless specifically requested at
the time the manuscript is submitted.

Manuscripts should be typewritten and double spaced in the
English language using one side only of approximately 21.6 by
28 cm paper. One original drawing or photograph of each line
figure and four (4) clear copies or/and 4 original drawings or
photographs of each halftone figure are required. Pages should
not be stapled together.

Authors submitting a manuscript do so with the understand-
ing that if it is accepted for publication, copyright in the article,
including the right to reproduce the article in all forms and
media, shall be assigned exclusively to the Society for Pharma-
cology and Experimental Therapeutics. Reasonable requests by
authors for permission to reproduce their contributions to the
Journal may be honored at the discretion of the Society. It will be necessary for all authors to sign an assignment of copyright form which will be mailed from the Editorial Office on acceptance of the manuscript. The only exceptions will be manuscripts on work performed by em-
ployees of the U.S. Federal Government.

Cover Letter
Each manuscript must be accompanied by a written
statement signed by one author: "The undersigned author
affirms that the manuscript (title of article) and the data it
contains are original, are not under consideration by another
journal, and have not been published previously. The study
reported in this manuscript have been carried out in accordance
with the Declaration of Helsinki and/or with the Guide for the
Care and Use of Laboratory Animals as adopted and promul-
gated by the National Institute of Health". Authors should also
indicate in the cover letter the field of pharmacology to which
the research applies.

Organization of the Manuscript
In most cases manuscripts should contain the following sec-
tions in the order listed; each section should begin on a new
page and all pages should be numbered consecutively.

1. Title page. This should contain the complete title of the
manuscript, the names of all authors, and the laboratory of
origin. Support for the research should be indicated as a num-
bered footnote to the title and included with other footnotes on
a separate page following the reference section.

2. Running title page. a) A running title: should be
included at the top of this page and should contain no more than
35 spaces, including punctuation. It should convey the sense of
the title. Commonly used abbreviations (such as "ATP",
"ACh," etc.) may be used in the running title. b) Corresponding
author: this page should also contain the name, address, tele-
phone and fax number of the person to whom all correspondence
should be sent. c) A list of abbreviations used in the paper
should also appear on this page. Additionally, each abbreviation
should be defined the first time it is used in the text.

3. Abstract. The abstract should present in a concise form the
purpose, the general methods, the findings, and the conclu-
sions of the manuscript. Abstracts should be limited to 200
words; abstracts of more than 250 words will not be accepted.

4. Introduction. This section should not be labeled, but
should begin on a new page. It should contain a clear statement
of the aims of the reported work or of the hypotheses which the
work is designed to test. A brief account of the background of
the reported work may also be given in this section.

5. Methods. This section should contain explicit, concise
descriptions of all new methods or procedures employed. Mod-
ifications of previously published methods should be described.
Commonly used methods require only a citation of the original
source. When methods are described, the description should be
such as to enable the reader to judge their accuracy, reproduc-
ability and reliability and to repeat the experiment. Very exten-
tended descriptions of methods may be submitted for deposit
with the American Society for Information Science National
Auxiliary Publications Service (NAPS) c/o Microfiche Publica-
tions, P.O. Box 3513, Grand Central Station, New York, NY
10017. A text reference or footnote stating that the full descrip-
tion is available from NAPS permits interested readers to ob-
tain the information and does not occupy an inordinate amount
of Journal space. There is a nominal charge to authors for this
procedure; those who request the complete information from
NAPS pay a small fee.

6. Results. This section ordinarily contains the experi-
mental data to be presented, but not extended discussions of
their significance. Results should usually be presented in
graphic or tabular form, rather than discursively. Graphic
presentation of data is often preferred but there should not be
duplication in text, tables and figures. Sufficient data must be
given to allow readers to judge the variability and reliability of
the results. Statistical tests used and the data analyzed should
be explained so that the findings can be interpreted and evalu-
ated.

7. Discussion. This section should present conclusions to
be drawn from the results. Speculative discussion is not discour-
gaged but should be based on the data presented and identified
as such. The discussion should be as concise as possible, within the limits of the ideas which the authors wish to
propose and adequate discussion of related work by others.

8. Acknowledgments. This section should begin on a
separate page, have a separate heading, and be placed at the
end of the text of the manuscript. Gifts and assistance can be
acknowledged here but, financial support should appear in a
footnote to the title.

9. References. In text citations give the author's name
and the year of publication (e.g., McCarthy, 1952; Ruth and
Gehrig, 1929). With more than two authors, the text citation
should contain the name of the first author, followed by "et al.",
and the date (e.g., Kennedy et al., 1960). In the list of refer-
ces, entries should be arranged alphabetically by author and not
numbered. All authors' names should be given. If reference is
made to more than one publication by the same authors in the
same year, suffixes (a, b, c, etc.) should be added to the year in
the text citation and in the list of references.

The list of references should contain, in sequence, the follow-
ing information: authors' names and initials, title of the cited
article, title of the journal in which it appeared, volume number
of the journal, inclusive pagination and year of publication.
Abbreviations for journals should conform to the Biosis List of
Serials (Biosciences Information Services of Biological Ab-
stracts, Philadelphia, PA 19103). Citations of personal commu-
nications, unpublished observations, and papers submitted for
publication should be given in parentheses at the appropriate
place in the text, not in the list of references. A paper may not
be cited as "in press" unless it has been accepted for publication.
In such cases the name of the journal must be given.

Examples of references to books, chapters and journal articles
follow:
Bruce, M. S.: The anxiogenic effects of caffeine. Postgrad.
drinking: Reinforcing and physical dependence producing ef-
Tallarida, R. J. and Murray, R. B.: Manual of Pharmacologic
Young, A. M. and Sannerud, C. A.: Tolerance to drug discrimi-
native stimuli. In Psychoactive Drugs: Tolerance and Sensi-
No more than four references should be cited in support of any
given point. The authors are responsible for accuracy of such
citations and are urged to take the utmost care in proofreading
citations and the reference list.

10. Footnotes. All footnotes to the title, authors' names or
text should be indicated by arabic numeral superscripts, not
by letters or other symbols. The footnotes should be typed in
sequence on a separate page, not a text page. Footnotes to tables
are discussed under Tables, below.

11. Tables. Each table should be on a separate page. Ta-
bles should be numbered consecutively with arabic numerals,
and should be designed to fit the column or page size of the
Journal. A brief descriptive title should be given at the top of
each table. The table number should be given in capital let-
ters, the title in boldface upper and lower case letters (e.g.,
TABLE 3).

Uptake of labeled drug by rat liver slices. The footnotes to
the tables should be referenced by italicized lowercase super-
script letters (a, b, c, etc.) and should appear beneath the table
involved, not on a separate page of the manuscript. Extensive
tabular material not absolutely essential to the manuscript will
be accepted for deposit with the ASIS/NAPS (see "Methods,"
above) in such instances a footnote in the published paper
will refer the interested readers to NAPS from which copies may
be obtained. Note Statistics below for expressions of probability.

12. Legends for figures. These should be numbered con-
secutively in arabic numerals and should appear on a separate
page of the manuscript. Legends should explain the figures in
sufficient detail so that frequent referral to the text is unnec-
sary, but efforts should be made to avoid unnecessary length.
Abbreviations in the legends should conform to those in the
text (see "Abbreviations," below).

13. Figures. Illustrations should be submitted as un-
mounted glossy prints, or laser jet quality figures, preferably
reduced to single column size (approximately 9 inches in width) to
permit reproduction without further reduction. Otherwise, prints
should be no larger than 8 by 10 inches and clear enough to permit
reproduction without retouching after reduction. The author's
name and address and the number of the figure should be placed on
the back of each print. A typed label is usually most satisfac-
tory. Ball type pen should not be used. Note Statistics below for
expression of probability. Uniform symbolism should be used for
all illustrations in a manuscript. Symbols, numbers, and letters in
the illustrations must be at least 1.5mm in height after reduction
to single column size. The title of each figure should appear in the
legend rather than on the figure itself. Photomicrographs and
electron micrographs should be labeled with a magnification cali-
bration in micro or Angstrom units. A statement of the magnifi-
cation should appear in the figure legend.

14. Index Terms. A list of index terms useful in construct-
ing the annual index should be included as the last page of the
manuscript.

Statistics
Wherever possible statistical probability (P) in tables, figures,
and figure legends should be expressed as * P < .05, ** P < .01 and
*** P < .001. For second comparisons the symbols * may be used
similarly. Authors are urged to avoid unnecessary complexity and
to be consistent within the manuscript. In the event of multiple
comparisons within a table, footnotes, a, b, c, etc. should be used.

Abbreviations
Magnitudes of variables reported should be expressed in numer-
als. Most abbreviations are used without punctuation, with no
distinction between singular and plural forms (e.g., 1 mg, 25 mg;
1 sec, 25 sec). The usual prefixes are to be used for multiples or
submultiples of the basic units (e.g., kg, g, mg; µg, ng, pg). The
following abbreviations, or their properly prefixed multiples or
submultiples, may be used without definition in the text, tables and
figures:

<table>
<thead>
<tr>
<th>Units of mass</th>
<th>Units of electricity</th>
</tr>
</thead>
<tbody>
<tr>
<td>gram (g)</td>
<td>volt (V)</td>
</tr>
<tr>
<td>mole (mol)</td>
<td>ampere (A)</td>
</tr>
<tr>
<td>equivalent (Eq)</td>
<td>cycles/sec (Hz)</td>
</tr>
<tr>
<td>microgram (µg)</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Units of concentration</th>
<th>Units of radioactivity</th>
</tr>
</thead>
<tbody>
<tr>
<td>molar (mole/ liter)</td>
<td>curie (Ci)</td>
</tr>
<tr>
<td>normal (Eq/liter)</td>
<td>counts per min (cpm)</td>
</tr>
<tr>
<td>percent (%)</td>
<td>disintegrations per min (dpm)</td>
</tr>
<tr>
<td>Angstrom</td>
<td>rontgen (r)</td>
</tr>
</tbody>
</table>

| Units of length or    | Units of time                 |
| volume               |                               |
| meter (m)            | hour                          |
| micron (µ)           | minute                        |
| Angstrom             | second                        |

Kinetics
- dissociation constant: K
- dissociation constant of enzyme substrate complex: K_{i}
- enzyme inhibitor complex: K
- Michaelis constant: K
- maximum initial velocity: V_{max}

Miscellaneous
- degrees of temperature: °C
- gravity: g
- median doses: LD_{50}, LD_{90}, etc.
- optically isometric forms: d-1, d-
- routes of drug administration: i.v., i.p., s.c., i.m.
- standard deviation: S.D.
- standard error: S.E.

Whenever an abbreviation other than those above is to be used
in a manuscript, it is to be defined in the text or in a footnote
thereof, the first time it is used. Abbreviations for commonly used
substances should be those recommended by the Journal of Bio-
logical Chemistry. Abbreviations for drugs may be used if properly
defined on first use and if the chemical or generic name of the drug
is given when the abbreviation is first used. Abbreviations may be
used in the running title but not in the full title of the manuscript.

Drugs
Generic names should be used in text, tables and figures. Trade
names may be mentioned in parentheses in the first text reference
to the drug but should not appear in titles, figures or tables. When
a trade name is used, it should be capitalized; generic or chemical
names are not capitalized. The chemical nature of new drugs must
be given when it is known. The form of drug used in calculations of
doses (e.g., base or salt) should be indicated. When several drugs
are used in the manuscript, they should be defined in a separate
paragraph in "Methods," or a separate table or footnote, listing the relevant
information about all drugs employed.

Page Charges
Authors are assessed page charges at the rate of $30 per printed
page. With the page proof, authors will receive a request for infor-
mation concerning such charges. These charges will be assessed
only if they involve no personal expense to the authors. Request for
waiver should be addressed to the ASPET Executive Officer at the
time billing is received.

The cost of a limited number of illustrations will be borne by the
Journal; the cost of excessive illustrations and of colored illustra-
tions will have to be defrayed by the authors.

After acceptance: When the field editor recommends acceptance
of an article for publication, authors are encouraged to submit
electronic diskettes of the final version along with the typed
REVISED manuscript. The author will receive a packet of infor-
mation containing copyright forms and detailed instructions per-
taining to the publication of their manuscript.

Reprints and page charges. An order form for reprints as well as
information on the estimation of page charges will be mailed with
the galley proof. Please direct questions on page charges, or other
business matters to Kay Croker, Executive Officer, American So-
ciety for Pharmacology and Experimental Therapeutics, 9650
Rockville Pike, Bethesda, MD 20814.
Harrisons
PRINCIPLES OF INTERNAL MEDICINE, 13/e
Isselbacher, Braunwald, Wilson, Martin, Fauci, Kasper

"The sun is shining... and a new edition of Harrisons sits smartly on our bookshelf. All's well with the world."
— JAMA

70 completely new chapters and over 230 expert contributors. The thirteenth edition of Harrisons's addresses head on the issues and clinical concerns that continue to shape the practice of medicine today. Look for new coverage on cellular and molecular biology, genetics of cancer, the impact of social factors on disease, AIDS and so much more!

Get the full benefit of Harrisons's by using the COMPANION HANDBOOK and PreTest Self-Assessment and Review

1994/2,400 Pages/640 Illus. (140 Full Color)
Two Volume Set/ISBN:0-07-911169-6/$125.00

Also Available on CD-ROM!

HARRISON'S PLUS
"[HARRISON'S PLUS] is the most complete reference tool this writer has seen." — Frank Gutay, Ph.D. Knowledge Management Systems, Inc.

New Features Include:
• 1996 U.S. Pharmacopoeial Drug Information for the Health Care Professional featuring over 20% new material and the latest drugs, their indications, side effects, dosage and more.
• Over 1,000 color photographs of commonly used drugs from the USP Medicine Chart. Searchable by brand name, manufacturer, or product description.
• New Appendices on drug therapy.
• 1 FREE Update disc within the first 12 months of purchase providing the latest additions to the USP DI® drug information.

Also Available... HARRISON'S PRINCIPLES OF INTERNAL MEDICINE, 13/e CD-ROM. Featuring the same easy-to-use software found in HARRISON'S PLUS. Provides the complete thirteenth edition on CD-ROM.

Goodman & Gilman's
THE PHARMACOLOGICAL BASIS OF THERAPEUTICS, 9/e
Hardman, Limbird, Molinoff, Ruddon, Goodman Gilman

"Invaluable to all those who work with drugs."
— NEJM

What's new in the Ninth Edition? You'll find the latest on ocular pharmacology, genetherapy, the treatment of migraine, molecular pharmacology, antineoplastic agents, cancer chemotherapy, antiviral agents for the treatment of AIDS, and much more. No other book guides you through the therapeutic decisions you face daily like Goodman & Gilman. Invest in your career by ordering the new edition today! A tradition of excellence for 50 years and running!

January 1996/1,800 Pages/800 Illus.
ISBN:0-07-026266-7/$85.00

Goodman & Gilman's
The Pharmacological Basis of Therapeutics, 9/e CD-ROM

In late 1996, McGraw-Hill introduces its stellar new edition of the gold standard in pharmacology on CD-ROM! Review in an instant the latest in therapeutics and more. Students and practitioners will benefit from the speed with which you can search this vitally important database. All text and illustrations are included.
