INFOGRAPHIC FOR SUBSCRIBERS

THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS (ISSN 0022-3565) is an official publication of the American Society for Pharmacology and Experimental Therapeutics and is published by Williams & Wilkins, 351 West Camden Street, Baltimore, MD 21201-2436. Periodicals postage paid at Baltimore, MD and application to mail at periodicals postage rate pending at additional mailing offices. POSTMASTER: Send address changes to THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS, 351 West Camden Street, Baltimore, MD 21201-2436.

Frequency: Monthly: Four volumes a year beginning in January, April, July, and October.

Correspondence concerning business matters should be addressed to: Customer Service, Subscriptions, Williams & Wilkins, 351 West Camden Street, Baltimore, MD 21201-2436. Telephone 1-(800) 638-6423 from anywhere in the U.S. and Canada. From other countries, call (410) 528-8555. Fax: (410) 528-8596.

Correspondence regarding editorial matters should be addressed to: Dr. John A. Harvey, Editor in Chief, Journal of Pharmacology and Experimental Therapeutics, Allegheny University of the Health Sciences, MCP - Hahnemann School of Medicine, East Falls Campus, 3200 Henry Avenue, EPPI Conference Center, Suite 505D, Philadelphia, PA 19129. Telephone: (215) 842-4061 Fax: (215) 843-0690. E-mail: JPET@allegheny.edu.

For information on Society membership, contact: The American Society for Pharmacology and Experimental Therapeutics, 9650 Rockville Pike, Bethesda, MD 20814. Telephone (301) 530-7060 Fax: (301) 530-7061.

Instructions to Authors appears in the first issue of each volume (January, April, July, October).

Annual Subscription Rates: U.S.: Personal $190.00; Institutional $370.00; Single copy $33.00. Outside the U.S., except for Japan: Personal $265.00; Institutional $445.00; Single copy $39.00.

Institutional (multiple reader) rate applies to libraries, schools, hospitals, clinics, group practices, and federal, commercial and private institutions and organizations.

For Japanese rates, please contact: Igaku-Shoin MYW Ltd., 3-23-14 Hongo, Bunkyo-Ku, Tokyo 113, JAPAN. Telephone: (03) 5689-5400 or 5401. Fax: (03) 5689-5402.

PRICES ARE SUBJECT TO CHANGE.

The GST number for Canadian subscribers is 123394371. Country of origin USA. C.P.C. International Publication Mail #04577256.

New subscriptions received before May 1st of each year will begin with the first issue of the year. Subscriptions received between May 1st and October 31st will start with the mid-year issue (July). Subscriptions received after October 31st will start with the first issue of the following year. Subscriptions may start with any current volume’s issue upon request.

Renews should be done promptly to avoid a break in journal delivery. The Publisher cannot guarantee to supply back issues on late renewals.

Change of address: The publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicate copies may be obtained, if available, from the Publisher at the regular price of a single issue. Send address changes to THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS, 351 West Camden Street, Baltimore, MD 21201-2436. If a member, please contact the Society with your change.

Reprints of individual articles are available only from the authors. If authors need information on their reprint order call (410) 528-4118.

Reprints (non-author) in large quantities, for commercial or academic use, may be purchased from the Publisher. For information and prices call (410) 528-4292.

Microfilm and Microfiche: Prices are available upon request. Microfilm editions may be ordered from Williams & Wilkins.

The Journal subscription list is available for rental on a controlled basis from Williams & Wilkins. All promotional literature must be approved in advance.

Disclaimer: The statements and opinions contained in the articles of THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS are solely those of the individual authors and contributors and not of the American Society for Pharmacology and Experimental Therapeutics or Williams & Wilkins. The appearance of advertisements in the Journal is not a warranty, endorsement or approval of the products or safety. The American Society for Pharmacology and Experimental Therapeutics and the Publisher disclaim responsibility for any injury to persons or property resulting from any ideas or products referred to in the articles or advertisements.

Volume indices appear in the March, June, September, and December issues.

Indexing/Abstracting Services: The Journal is currently included by the following services in print and/or electronic format: Index Medicus, Current Contents (Life Sciences, Science Citation Index, Research Alert [personalized search service], ISI/BioMed [on-line database], Excerpta Medica, and Biosciences Information Service, and Reference Update/Research Information Systems.

Copyright Information: THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS is copyrighted by the American Society for Pharmacology and Experimental Therapeutics. No portion(s) of the work(s) may be reproduced without written consent from Williams & Wilkins. Permission to reproduce copies of articles for non-commercial use may be obtained from the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, (508) 750-8400, with a fee of $3.00 per copy.

Notice to Contributors

(The Journal of Pharmacology and Experimental Therapeutics)

(Revised July 1, 1994)

Scope of Submitted Manuscripts

The Journal invites for review original papers dealing with interactions of chemicals with biological systems. Any aspect of pharmacology and therapeutics is included, but descriptive case reports without dose response or mechanism studies are not accepted. Manuscripts dealing primarily with new methods will be reviewed only if data are presented showing new or more reliable pharmacological information has been obtained by use of the methods.

Submission of Manuscripts

Submit four copies of manuscript to Dr. John A. Harvey, Editor in Chief, Journal of Pharmacology and Experimental Therapeutics, MCP Hahnemann School of Medicine, East Falls Campus, 3200 Henry Avenue, EPPI Conference Center, Suite 505D, Philadelphia, PA 19129, accompanied by a check or purchase order for $40.00 (manuscript handling fee) in U.S. funds drawn on a U.S. bank payable to ASPET. If submission of the manuscript handling fee entails personal financial hardship to the author, the fee will be waived. In that event the authors should submit a request for waiver of the fee at the time the manuscript is submitted. Only one copy of rejected manuscripts will be returned. Extra copies of figures will not be returned unless specifically requested at the time the manuscript is submitted.

Manuscripts should be typewritten and double spaced in the English language using one side only of approximately 21.6 by 28 cm paper. One original drawing or photograph of each line figure and four (4) clear copies and/or four original drawings or photographs of each halftone figure are required. Pages should not be stapled together.

Authors submitting a manuscript do so with the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Society for Pharmacology and Experimental Therapeutics. Reasonable requests by authors for permission to reproduce their contributions to the Journal will not be refused. It will be necessary for all authors to sign an assignment of copyright form which will be mailed from the Editorial Office on acceptance of the manuscript. The only exception will be manuscripts for work performed by employees of the U.S. Federal Government.

Cover Letter

Each manuscript must be accompanied by a written statement signed by one author: "The undersigned author affirms that the manuscript (title of article) and the data it contains are original, are not under consideration by another journal, and have not been published previously. The studies reported in this manuscript have been carried out in accordance with the Declaration of Helsinki and/or with the Guide for the Care and Use of Laboratory Animals as adopted and promulgated by the National Institute of Health." Authors should also indicate in the cover letter the field of pharmacology to which the research applies.

Organization of the Manuscript

In most cases manuscripts should contain the following sections, listed; each section should begin on a new page and all pages should be numbered consecutively.

1. Title page. This should contain the complete title of the manuscript, the names of all authors, and the laboratory of origin. Support for the research should be indicated as a numbered footnote to the title and included with other footnotes on a separate page following the reference section.

2. Running title page. a) A running title: should be included at the top of this page and should contain no more than 35 words including punctuation. It should convey the sense of the full title. Commonly used abbreviations (such as "ATP," "ACH," etc.) may be used in the running title. b) Corresponding author: this page should also contain the name, address, telephone and fax number of the person to whom all correspondence should be addressed. c) A list of abbreviations used in the paper should also appear on this page. Additionally, each abbreviation should be defined the first time it is used in the text.

3. Abstract. The abstract should present in a concise form the purpose, the general methods, the findings, and the conclusions of the manuscript. Abstracts should be limited to 200 words; abstracts of more than 250 words will not be accepted.

4. Introduction. This section should not be labeled, but should begin on a new page. It should contain a clear statement of the aims of the reported work or of the hypotheses which the work was designed to test. A brief account of the background of the reported work may also be given in this section.

5. Methods. This section should contain explicit, concise descriptions of all new methods or procedures employed. Modifications of previously published methods should be described. Commonly used methods require only a citation of the original source. When methods are described, the description should be such as to enable the reader to judge their accuracy, reproducibility and reliability and to repeat the experiment. Very extended descriptions of methods may be submitted for deposit with the American Society for Information Science National Auxiliary Publications Service (NAPS) or/and Microfiche Publications, P.O. Box 3513, Grand Central Station, New York, NY 10017. A text reference or footnote stating that the full description is available from NAPS permits interested readers to obtain the information and does not occupy an inordinate amount of Journal space. There is a nominal charge to authors for this procedure; those who request the complete information from NAPS pay a small fee.

6. Results. This section ordinarily contains the experimental data to be presented, but not extended discussions of their significance. Results should usually be presented in graphic or tabular form, rather than discursively. Graphic presentation of data is often preferred but there should not be duplication in text, tables and figures. Sufficient data must be given to allow readers to judge the variability and reliability of the results. Statistical tests used and the data analyzed should be explained so that the findings can be interpreted and evaluated.

7. Discussion. This section should present conclusions to be drawn from the results. Speculative discussion is not discouraged, but the speculation should be based on the data presented and identified as such. The discussion should be as concise as possible, within the limits of the ideas which the authors wish to propose and adequate discussion of related work by others.

8. Acknowledgments. This section should begin on a separate page, have a separate heading, and be placed at the end of the text of the manuscript. Gifts and assistance can be acknowledged here but, financial support should appear in a footnote to the title.

9. References. In text citations give the author's name and the year of publication (e.g., McCarthy, 1952; Ruth and Gehrig, 1929). With more than two authors, the text citation should contain the name of the first author, followed by "et al.," and the date (e.g., Kennedy et al., 1960). In the list of references, entries should be arranged alphabetically by author and not numbered. All authors' names should be given. If reference is made to more than one publication by the same authors in the same year, suffixes (a, b, c, etc.) should be added to the year in the text citation and in the list of references.

The list of references should contain, in sequence, the following information: authors' names and initials, title of the cited article, title of the journal in which it appeared, volume number of the journal, inclusive pagination and year of publication. Abbreviations for journals should conform to the Biomedical Journal List of Serials (BioSciences Information Services of Biological Abstracts, Philadelphia, PA 19103). Citations of personal communications, unpublished observations, and papers submitted for publication should be given in parentheses at the appropriate place in the list of references. Authors may not be cited as "in press" unless it has been accepted for publication. In such cases the name of the journal must be given.

Examples of references to books, chapters and journal articles follow:

Abbreviations

The units of mass, electricity, and concentration are listed in Table 1. Units of length, volume, and time are listed in Table 2. Kinetics and dissociation constants are listed in Table 3. Miscellaneous abbreviations and symbols are listed in Table 4. Drugs are listed in Table 5.

Footnotes

10. Footnotes. All footnotes to the title, authors' names or text should be indicated by arabic numeral superscripts, not by letters or other symbols. The footnotes should be typed in sequence on a separate page, not a text page. Footnotes to tables are discussed under Tables, below.

11. Tables. Each table should be on a separate page. Tables should be numbered consecutively with arabic numerals, and should be designed to fit the column or page size of the Journal. A brief descriptive title should be given at the top of each table. The table number should be given in capital letters, the title in boldface upper and lower case letters (e.g., TABLE 3).

Uptake of labeled drug by rat liver slices. The uptake of drug by liver slices can be determined by the method described in the Methods section. The results are expressed as the percentage of the initial drug concentration.

12. Legends for figures. These should be numbered consecutively in arabic numerals and should appear on a separate page of the manuscript. Legends should explain the figures in sufficient detail so that frequent reference to the text is unnecessary, but efforts should be made to avoid unnecessary length. Abbreviations in the legends should conform to those in the text (see "Abbreviations," below).

13. Figures. Illustrations should be submitted as unmounted glossy prints, or laser jet quality figures, preferably reduced to single column size (approximately 3½ inches in width) to permit reproduction without further reduction. Otherwise, prints should be large (no less than 8 by 10 inches and clear enough to permit reproduction without retouching after reduction. The author's name and address and the number of the figure should be placed on the back of each print. A typed label is usually most satisfactory. Ball type pen should not be used. Note Statistics below for expressions of probability.

14. Index Terms. A list of index terms useful in constructing the annual index should be included as the last page of the manuscript.

Statistics

Whenever possible statistical probability (P) in tables, figures, and figure legends should be expressed as $P < .05$, ** $P < .01$ and *** $P < .001$. For second comparisons the symbols † may be used similarly. Authors are urged to avoid unnecessary complexity and to be consistent within the manuscript. In the event of multiple comparisons within a table, footnotes, a, b, c, etc. should be used.

Abbreviations

Magnitudes of variables reported should be expressed in numerals. Most abbreviations are used without punctuation, with no distinction between singular and plural forms (e.g., 1 mg, 25 mg, 1 sec, 25 sec). The usual prefixes are to be used for multiples or submultiples of the basic units (e.g., kg, g, mg, μg, ng, pg). The following abbreviations, or their properly prefixed multiples or submultiples, may be used without definition in the text, tables and figures:

Units of mass

<table>
<thead>
<tr>
<th>Unit</th>
<th>Symbol</th>

</table>

When an abbreviation other than those above is to be used in a manuscript, it should be defined in the text or in a footnote thereto, the first time it is used. Abbreviations for commonly used substances should be those recommended by the Journal of Biological Chemistry. Abbreviations for drugs may be used if properly defined on first use and if the chemical or generic name of the drug is given when the abbreviation is first used. Abbreviations may be used in the running title but not in the full title of the manuscript.

Drugs

Generic names should be used in text, tables and figures. Trade names may be mentioned in parentheses in the first text reference to the drug but should not appear in titles, figures or tables. When a trade name is used, it should be capitalized; generic or chemical names are not capitalized. The chemical nature of new drugs must be given when it is known. The form of drug used in calculations (e.g., base or salt) should be indicated. When several drugs are used, it may save space to include a separate paragraph in "Methods," or a separate table or footnote, listing the relevant information about all drugs employed.

Page Charges

Authors are assessed page charges at the rate of $30 per printed page. With the page proof, authors will receive a request for information concerning such charges. These charges will be assessed only if they involve no personal expense to the authors. Requests for waiver should be addressed to the ASPET Executive Officer at the time billing is received.

The cost of a limited number of illustrations will be borne by the Journal; the cost of excessive illustrations and of colored illustrations will have to be defrayed by the authors.

After acceptance: When the field editor recommends acceptance of an article for publication, authors are encouraged to submit electronic diskettes of the final version along with the typed REVISED manuscript. The author will receive a packet of information containing copyright forms and detailed instructions pertaining to the publication of their manuscript.

Reprints and page charges. An order form for reprints as well as information on the estimation of page charges will be mailed with the galley proof. Please direct questions on page charges, or other business matters to Kay Croker, Executive Officer, American Society for Pharmacology and Experimental Therapeutics, 9690 Rockville Pike, Bethesda, MD 20814.
Leading Pharmacology Journals

Publications of the American Society for Pharmacology and Experimental Therapeutics, Inc.

The Journal of Pharmacology and Experimental Therapeutics
Editor: John A. Harvey, Ph.D.

JPET is respected the world over as one of the leading research journals in the field of pharmacology. You'll find broad coverage of all aspects of the interactions of chemicals with biological systems, including autonomic, behavioral, cardiovascular, cellular, clinical, developmental, gastrointestinal, immuno-, neuro-, pulmonary, and renal pharmacology, as well as analgesics, drug abuse, metabolism and disposition, chemotherapy, and toxicology. Monthly.

Drug Metabolism and Disposition: The Biological Fate of Chemicals
Editor: Raymond F. Novak, Ph.D.

Drug Metabolism and Disposition publishes experimental results from in vitro and in vivo systems that bring you significant and original information on metabolism and disposition of endogenous and exogenous compounds, including pharmacologic agents and environmental chemicals. The areas covered are: xenobiotic metabolism, expression of drug metabolizing enzymes, regulation of drug metabolizing enzyme gene expression, pharmacokinetics, pharmacodynamics and toxicological consequences of xenobiotic metabolism. Monthly.

Pharmacological Reviews
Editor: David B. Bylund, Ph.D.

Pharmacological Reviews is a showcase for important review articles in your field, featuring longer papers on topics of high current interest. The areas covered in review papers have included biochemical and cellular pharmacology, drug metabolism and disposition, renal pharmacology, neuropharmacology, behavioral pharmacology, clinical pharmacology, and toxicology. No library serving the pharmacologic community should be without a subscription. Quarterly.
