INDEX TO VOLUME III

Abel, John J. On the action of drugs and the function of the anterior lymph hearts in cardiectomized frogs .................................................. 581
Abel, John J., and Macht, David I. Two crystalline pharmacological agents obtained from the tropical toad, Bufo agua ........................................... 319
Action of diuretics in uranium nephritis (Proceedings) .......................... 459
Action of drugs and the function of the anterior lymph hearts in cardiectomized frogs ................................................................. 581
Action of glandular extracts upon the amount of epinephrin in the blood ...... 625
Action of hydrocyanic acid on the respiration and the antagonistic action of sodium iodosobenzoate ......................................................... 131
Action of salts of choline on arterial blood pressure ............................... 649
Action of sodium citrate upon mammalins, with special reference to acquired tolerance and to its action upon the cerebellum ............................... 635
Adrenal secretion, Note on the effect of nicotine injection on .................... 379
Alcohol and caffein: a study of antagonism and synergism ......................... 267
Allergic reaction of inflammatory character, The influence of sodium iodoxibenzoate and sodium cyanide upon an ........................................... 223
Alsberg, C. L. The toxic action of amianthium muscaetoxicum (Proceedings) 473
Amberg, Samuel, and Knox, J. H. Mason, Jr. The influence of sodium iodoxibenzoate and sodium cyanide upon an allergic reaction of inflammatory character ......................................................... 223
American Society for Pharmacology and Experimental Therapeutics, Scientific proceedings of the ......................................................... 455
Anaphylaxis, Physiological studies in. IV. Reaction of the cat toward horse serum .......................................................... 299
Anesthesia in plants possessing a motor mechanism and in animals, Comparison of (Proceedings) ......................................................... 467
Anterior lymph hearts in cardiectomized frogs, On the action of drugs and the function of the ................................................................. 581
Antiseptic and bactericidal action of the sodium salts of iodbenzoic, iodosobenzoic and iodoxybenzoic acids, On the ................................. 145
Apomorphine, The seat of the emetic action of ....................................... 551
Arkin, Aaron. On the antiseptic and bactericidal action of the sodium salts of iodbenzoic, iodosobenzoic and iodoxybenzoic acids ...................... 145
Atropine, The effects of pilocarpine and, upon the amylolytic power and composition of the saliva .............................................................. 1
Auer, J. The effect of the digitalis group including anaphylaxis upon some skeletal muscles in rabbits, especially in regard to rigor (Proceedings) .... 464
INDEX

Bactericidal action of the sodium salts of iodobenzoic, iodosobenzoic and iodoxybenzoic acids, On the antiseptic and.......................................................... 145
Binger, C. A. L., Cannon, W. B., and Aub, J. C. A note on the effect of nicotine injection on adrenal secretion .......................................................... 379
Biologic tests for epinephrin, A consideration of some .................................. 93
Blood pressure, The action of salts of choline on arterial ........................................... 649
Bufo agua, Two crystalline pharmacological agents obtained from the tropical toad .......................................................... 319
Burnett, Theo. C. and Robertson, T. Brailsford. On the action of sodium citrate upon mammalia, with especial reference to acquired tolerance and to its action upon the cerebellum .......................................................... 635
Caffein: Alcohol and, a study of antagonism and synergism ........................................ 267
Caffein, The action of, on the mammalian heart .......................................................... 609
Caffein, The actions of, on the mammalian circulation ................................................ 19
Caffein, The elimination of (Proceedings) .......................................................... 469
Caffein, The persistent effects of, on the circulation .................................................. 19
Caffein, The toxicity of (Proceedings) .......................................................... 455
Cannon, W. B., Aub, J. C., and Binger, C. A. L. A note on the effect of nicotine injection on adrenal secretion .......................................................... 379
Cardiac circulation, On the convulsant action of acid fuchsin upon frogs deprived of their .......................................................... 183
Cardiectomized frogs, On the action of drugs and the function of the anterior lymph hearts in .......................................................... 581
Chloral poisoning, Chronic (Proceedings) .......................................................... 462
Choline, The action of salts of, on arterial blood pressure ........................................... 649
Choline, The physiological action of salts of (Proceedings) ........................................... 457
Circulation, The actions of caffein on the mammalian ................................................ 19
Circulation, The persistent effects of caffein on the .................................................. 19
Convulsant action of acid fuchsin upon frogs deprived of their cardiac circulation .......................................................... 183
Convulsant action of some sulphonated dyes .......................................................... 531
Crile, G. W., and Menten, M. L. Comparison of anesthesia in plants possessing a motor mechanism and in animals (Proceedings) ........................................... 467
Crystalline pharmacological agents obtained from the tropical toad, Bufo agua .......................................................... 319
Cytisine, the active alkaloid of laburnum (cytisus-laburnum), The physiological action of .......................................................... 205
Dale, H. H., and Laidlaw, P. P. The physiological action of cytisine, the active alkaloid of laburnum (cytisus-laburnum) .......................................................... 205
Dandy, W. E., and Rowntree, L. G. Peritoneal and pleural absorption (Proceedings) .......................................................... 423
Dresbach, M. The physiological action of phenolphthalein oxine .................................. 101
Dyes, On the convulsant action of some (Proceedings) ................................................ 471
INDEX

Edmunds, C. W. Upon the action of protein poison (Proceedings) .................. 461
Effect of caffeine on the circulation (Proceedings) ........................................ 468
Effect of nicotine injection on adrenal secretion, A note on the ...................... 379
Eggleston, Cary, and Hatcher, Robert A. The seat of the emetic action of
apomorphine ........................................................................................................... 551
Electrocardiogram in morphin poisoning in the dog (Proceedings) .................. 468
Emetic action of apomorphine, The seat of the .................................................... 551
Epinephrin, A consideration of some biologic tests for ....................................... 93
Epinephrin in the blood, The action of glandular extracts upon the amount of
625
Epinephrine .............................................................................................................
Ewing, E. M. The effects of pilocarpine and atropine upon the amylolytic
power and composition of the saliva .....................................................................
Ewins, Arthur James. A new water soluble active constituent of squills ......... 155
Eyster, J. A. E., and Meek, W. J. The electrocardiogram in morphin poisoning
in the dog (Proceedings) ....................................................................................... 468
Fitz, R., and Rowntree, L. G. Studies of renal function in experimental
nephritides (Proceedings) ...................................................................................... 460
Fuchsin, On the convulsant action of acid, upon frogs deprived of their car-
diac circulation ...................................................................................................... 183
Gastro-intestinal absorption of drugs, Quantitative studies on the ................. 387
Geraghty, J. T., and Rowntree, L. G. Intramuscular versus subcutaneous
absorption (Proceedings) ....................................................................................... 460
Githens, T. S., and Meitzer, S. J. On the duration of irritability of the motor
nerves of the frog after death and the effect of strychnin upon it (Proceed-
eds) ......................................................................................................................
Glandular extracts, The action of, upon the amount of epinephrin in the
blood ....................................................................................................................... 625
Grove, W. E., and Loevenhart, A. S. The action of hydrocyanic acid on the
respiration and the antagonistic action of sodium iodosobenzoate ................. 131
Grove, W. E., and Loevenhart, A. S. Studies on the pharmacological action of
oxidizing substances .............................................................................................. 101
Habit ......................................................................................................................... 515
Hale, Worth. The seasonal and sex variations of Rana pipiens to digitalis
(Proceedings) ......................................................................................................... 458
Hanzlik, Paul J. Quantitative studies on the gastro-intestinal absorption of
drugs. II. The absorption of sodium iodide ......................................................... 387
Hanzlik, Paul J. and Sollmann, T. Inhibition of iodide absorption by chloride
(Proceedings) .......................................................................................................... 473
Hatcher, Robert A., and Eggleston, Cary. The seat of the emetic action of
apomorphine ............................................................................................................. 551
Hess, C. L. von, and McGuigan, Hugh. Isocalycanthine and its quaternary
base ......................................................................................................................... 441
Horse serum, Reaction of the cat toward ................................................................ 299
Hoskins, R. G. A consideration of some biologic tests for epinephrin ............. 93
Hydrocyanic acid, The action of, on the respiration and the antagonistic
action of sodium iodosobenzoate ........................................................................... 131
