Subscribe now to get all 2010 issues.

Bimonthly issues provide:

- ✓ Scientifically rigorous, cutting-edge content
- ✓ Invited articles from leading experts in pharmacology
- ✓ Fresh, graphically compelling design and layout
- ✓ Articles that are not just deeply informative but a good read as well
- ✓ Impact Factor: 8.273!

Training Opportunities for Graduate Students and PhDs

NIGMS Summer Short Courses in Integrative and Organ Systems Science

The National Institute of General Medical Sciences (NIGMS) is funding four summer short courses that provide specialized training for using intact organ system and in vivo animal models in the conduct of research. The purpose of each short course is to introduce graduate students and Ph.Ds to the knowledge and skills needed for integrative studies of organ systems and intact animals, and the physiological and biochemical responses of these systems to drugs. These critical skills are in short supply. Graduate students and Ph.Ds. with these skills are in great demand in both academic and industrial settings. In 2010, NIGMS summer short courses will be offered at Michigan State University, University of Nebraska Medical Center University of North Carolina at Chapel Hill, and Vanderbilt University School of Medicine.

Animal Models

ASPET-Integrative Organ Systems Sciences (IOSS) Fund

The ASPET-IOSS Fund was created to provide support for graduate students and post-doctoral researchers seeking training in integrative, whole organ systems sciences. The ASPET-IOSS Fund will augment developing programs that provide training of students in integrative, whole organ systems sciences. The ASPET-IOSS Fund hopes to contribute to developing infrastructure to sustain and expand training in this critical area of research. Applications will be reviewed upon receipt and on a continuing basis. The ASPET-IOSS Awards are primarily available to support graduate students and post-docs who participate in an industry sponsored internship that furthers the students' training and exposure to integrative, whole organ biology.
