

CONTENTS

NUMBER 1, MAY, 1935

I. The Mode of Action of Certain Drugs Which Stimulate Respiration. By Samson Wright.....	1
II. An Investigation of the Toxicity and Hypoglycemic Effect of Several Guanidine Compounds. By George S. Samuelsen.....	17
III. The Respiratory Effects of Morphine, Codeine and Related Substances. IV. The Effect of α -monoacetylmorphine, Monoacetyldihydromorphine, Diacetylmorphine (Heroin) and Diacetyldihydromorphine on the Respiratory Activity of the Rabbit. By Charles I. Wright and Fleming A. Barbour.....	25
IV. The Use of Sodium Formaldehyde Sulphoxylate in Acute Mercury Poisoning. By Sanford M. Rosenthal.....	34
V. Ventricular Response in Caffeine-nicotine Antagonism. By Ralph H. Cheney.....	42
VI. A Comparison of the Motor Effects of Morphine, Codeine and Dihydromorphinone Hydrochloride (Dilaudid) on Thierry Fistulae. By Robert P. Walton and C. Frank Lacey.....	53
VII. Absorption of Drugs Through the Oral Mucosa. By Robert P. Walton and C. Frank Lacey.....	61
VIII. Sodium N-methyl-cyclohexenyl-methyl-barbituric Acid (Evipal): Hypnosis, Anesthesia and Toxicity. By A. H. Maloney and R. Hertz.....	77
IX. Remarks on the Distribution of Barbiturates in the Brain. By Theodore Koppanyi and James M. Dille.....	84
X. Studies of Phenanthrene Derivatives. IV. A Veratrine-like Action on Skeletal Muscle of Certain 9-substitution Products of Phenanthrene. By Ralph G. Smith.....	87
XI. The Identity of the Reducing Substance in the Urine of Normal Persons Following the Ingestion of Amidopyrine. By Morris Enklewitz.....	100
XII. On the True Methyl Cholines. By André Simonart.....	105
XIII. Beta-methylcholine Chloride and Its Acetyl Ester. By Randolph T. Major and Joseph K. Cline.....	131

NUMBER 2, JUNE, 1935

XIV. The Scientific Proceedings of the American Society for Pharmacology and Experimental Therapeutics, Incorporated. Twenty-sixth Annual Meeting, Held at Detroit, Michigan, April 10, 11, 12, 13, 1935. Edited by the Secretary, E. M. K. Geiling.....	137
XV. The Pharmacological Action of Pukateine. By William S. Fogg.....	167
XVI. The Relative Anesthetic Effects of Various Ureas. By Johannes S. Buck, Axel M. Hjort and Edwin J. deBeer.....	188

XXVII. Cardiac Automaticity Effects of Caffeine and Nicotine. I. Caffeine Influence upon the Response of the Sino-Auricular Strip. By Ralph H. Cheney.....	213
XXVIII. Cardiac Automaticity Effects of Caffeine and Nicotine. II. Nicotine Influence upon the Response of the Sino-auricular Strip. By Ralph H. Cheney.....	222
XIX. Cardiac Automaticity Effects of Caffeine and Nicotine. III. Caffeine-nicotine Antagonism in Sino-auricular Strip Response. By Ralph H. Cheney.....	230
XX. Experimental Studies in Alcoholism. IV. Attempts to Modify the Concentration of Alcohol in the Blood after Intravenous Administration of Alcohol. By Robert Fleming and Dorothy Reynolds.....	236
XXI. The Relation Between the Quantity of Thyroid-stimulating Hormone of the Anterior Pituitary Gland Administered and the Proliferative Activity and Hypertrophy of the Thyroid Acini in Guinea Pigs. By A. A. Kippen and Leo Loeb.....	246
NUMBER 3, JULY, 1935	
XXII. The Action of Ergoclavine and Sensibamine. By A. Vartiainen.	259
XXIII. The Action of Certain New Histamine Derivatives. By A. Vartiainen.....	265
XXIV. Methylene Blue, Methemoglobin, and Cyanide Poisoning. By William B. Wendel.....	283
XXV. The Action and Toxicity of Retrorsine. By K. K. Chen, A. Ling Chen and Charles L. Rose.....	299
XXVI. The Reaction of the Cervical Portion of the Dog's Oesophagus to Drugs. By W. J. R. Camp.....	306
XXVII. The Relation of pH and Surface Tension to the Activity of Local Anesthetics. By John H. Gardner and Joseph Semb.....	309
XXVIII. Observations on Dogs under the Continued Influence of Ephedrine. By Eric Ogden and A. R. Teather.....	320
XXIX. A Contribution to the Pharmacology of Trichlorethylene. By John C. Krantz, Jr., C. Jelleff Carr, Ruth Musser and William G. Harne.....	327
XXX. An Investigation into the Ratio between the Effective and Lethal Doses of Bulbocapnine in the Cat. By R. S. Amadon and A. H. Craige.....	334
XXXI. On the Alleged Occurrence of Acetylcholine and Adrenalin in Cat's Saliva. By P. S. Larson.....	341
XXXII. The Ratio of the Toxicity of Acetanilid to Its Antipyretic Activity in Rats. By Paul K. Smith and W. E. Hambourger..	346
NUMBER 4, AUGUST, 1935	
XXXIII. The Antiseptic Action of Carbazole-3-diazonium Chloride and Certain Other Diazonium Compounds. With a Note on the Preparation of Carbazole-3-diazonium Chloride. By C. H. Browning, R. Gulbransen and S. Horwood Tucker.....	353

XXXIV. Caesium Tetraiodophenolphthalein—A New Salt for Gall-bladder Visualization. By Julian Johnson and Lewis H. Hitzrot.....	358
XXXV. The Trypanocidal Action of Certain Styryl Selenazole Compounds. By C. H. Browning, R. Gulbransen and W. McCartney.....	367
XXXVI. Alcohol Injected Intravenously: Rate of Disappearance from the Blood Stream in Man. By Henry W. Newman and Windsor C. Cutting.....	371
XXXVII. The Evaluation of Gonadotropic Hormone Preparations on the Basis of the Rat-Mouse Ratio Assay. By Warren O. Nelson and Milton D. Overholser.....	378
XXXVIII. A Simple Method for the Administration of the Estrogenic Substances of Urine. By Arthur Grollman, Harris B. Shumacker, Jr., and Evelyn Howard.....	393
XXXIX. The Pharmacologic Action of Ergotocin, a New Ergot Principle. By M. Edward Davis, Fred. L. Adair, K. K. Chen and Edward E. Swanson.....	398
XL. The Urinary Bladder Mechanisms. By V. E. Henderson and M. H. Roepke.....	408
XLI. Cumulative Poisoning by Lanadigin, Ouabain, and Digitoxin in Dogs. By R. C. Li and H. B. van Dyke.....	415
XLII. Effect of Various Anesthetics on Salivary Secretion. By Benjamin H. Robbins.....	426
XLIII. Studies on the Reduction of Pitressin and Pitocin with Cysteine. By Robert Ridgely Sealock and Vincent du Vigneaud.....	433
XLIV. The Toxicity of Methyl Mercaptan for Fresh Water Fish. By Arch E. Cole.....	448
XLV. Metabolic Response of White Rats to Continued Administration of Dinitrophenol. By B. Terada and M. L. Tainter.....	454
XLVI. A Contribution to the Pharmacology of Nicotine. By Harry Gold and Frederick Brown.....	463
XLVII. Index.....	477

ILLUSTRATIONS

Action of drugs which stimulate respiration (Fig. 1).....	3
— of drugs which stimulate respiration (Fig. 2).....	4
— of drugs which stimulate respiration (Fig. 3).....	5
— of drugs which stimulate respiration (Fig. 4A).....	7
— of drugs which stimulate respiration (Fig. 4B).....	8
— of drugs which stimulate respiration (Fig. 5).....	10
— of drugs which stimulate respiration (Fig. 6A).....	11
— of drugs which stimulate respiration (Fig. 6B).....	12
— of drugs which stimulate respiration (Fig. 7).....	13
Minute volume one hour after the injection expressed as a percentage of the normal (Fig. 1).....	29
— volume while inhaling a carbon dioxide mixture expressed as a percentage of the preinjection value (Fig. 2).....	30
Continuous records of the oxygen consumption, respiratory rate and minute volume after subcutaneous injection of the hydrochloride salts of the drugs (Fig. 3).....	31
Prevention of kidney damage from one to two lethal doses of mercuric chloride injected subcutaneously by intravenous injections of formaldehyde sulphoxylate (Fig. 1).....	37
Incomplete protection from kidney damage by intravenous sulphoxylate therapy following three lethal doses of mercuric chloride subcutaneously (Fig. 2).....	38
Apparatus: ventricular strip preparation. (Modified after Dale) (Fig. 1).....	44
Response in caffeine-nicotine antagonism (Plate I).....	48
— in caffeine-nicotine antagonism (Plate II).....	49
— in caffeine-nicotine antagonism (Plate III).....	49
— in caffeine-nicotine antagonism (Plate IV).....	50
— in caffeine-nicotine antagonism (Plate V).....	51
Morphine derivatives on Thierry fistulae (Fig. 1).....	54
— derivatives on Thierry fistulae (Fig. 2).....	54
— derivatives on Thierry fistulae (Fig. 3).....	54
— derivatives on Thierry fistulae (Fig. 4).....	54
— derivatives on Thierry fistulae (Fig. 5).....	54
— derivatives on Thierry fistulae (Fig. 6).....	54
— derivatives on Thierry fistulae (Fig. 7).....	55
— derivatives on Thierry fistulae (Fig. 8).....	55
— derivatives on Thierry fistulae (Fig. 9).....	55
— derivatives on Thierry fistulae (Fig. 10).....	55
Cat—2 hours after administration of phenanthrene-9-carboxylic acid, 100 mgm. per kilogram, in 2 per cent gum acacia solution by stomach tube (Fig. 1).....	80

Effect of sodium phenanthrene-9-carboxylic acid on isotonic gastrocnemius muscle contractions of the cat and rabbit (Fig. 2).....	93
— of sodium phenanthrene-9-carboxylic acid on isometric gastrocnemius muscle contractions of the curarized cat and rabbit (Fig. 3).....	94
— of sodium phenanthrene-9-carboxylic acid on isometric gastrocnemius muscle contractions of the normal and curarized rabbit (Fig. 4).....	95
— of 1, 2, 3, 4, 5, 6, 7, 8-octahydro-phenanthrene-9-carboxylic acid, sodium salt, on isotonic gastrocnemius muscle contractions of the normal and curarized cat (Fig. 5).....	96
— of phenanthrene-9-carboxylic acid, methyl ester, on isotonic gastrocnemius muscle contractions of the cat (Fig. 6).....	96
On the true methyl cholines (Fig. 1).....	123
Effect of pukateine hydrochloride in dilution of 1:30,000 on the rabbit's isolated muscle (Fig. 1).....	173
— of pukateine, strength 1:10,000 on a gastrocnemius, sciatic nerve preparation (Fig. 2).....	174
Rabbit's heart, perfused (Fig. 3).....	175
Diagram of circuit used to demonstrate the refractory period of the frog's ventricle (Fig. 4).....	176
Frog's cardiogram (Fig. 5).....	177
Cat's heart, in situ (myocardiograph tracing) (Fig. 6).....	181
Electrocardiogram. Cat. Urethane (Fig. 7).....	184
Effect of caffeine on sino-auricular strip (Plate I).....	217
— of caffeine on sino-auricular strip (Plate II).....	218
— of caffeine on sino-auricular strip (Plate III).....	219
— of nicotine on sino-auricular strip (Plate I).....	224
— of nicotine on sino-auricular strip (Plate II).....	225
— of nicotine on sino-auricular strip (Plate III).....	226
Caffeine-nicotine antagonism in sino-auricular strip response (Plate I).....	232
— antagonism in sino-auricular strip response (Plate II).....	232
Experimental studies in alcoholism (Fig. 1).....	238
— studies in alcoholism (Fig. 2).....	238
— studies in alcoholism (Fig. 3).....	239
— studies in alcoholism (Fig. 4).....	239

— studies in alcoholism (Fig. 6).....	240
— studies in alcoholism (Fig. 7).....	242
— studies in alcoholism (Fig. 8).....	242
Two horns of a virgin guinea-pig's uterus. Ergoclavine compared with ergotoxine (Fig. 1).....	261
— horns of a virgin guinea-pig's uterus. Sensibamine compared with ergotoxine (Fig. 2).....	261
— symmetrical pieces of rabbit's uterus. Ergoclavine compared with ergotoxine (Fig. 3).....	262
— symmetrical pieces of rabbit's uterus. Sensibamine compared with ergotoxine (Fig. 4).....	262
Spinal cat's blood pressure (Fig. 5).....	263
Cat. Ether. Carotid. Blood pressure (Fig. 1).....	267

Rabbit. Urethane. Carotid. Blood pressure (Fig. 2).....	268
Isolated rat's uterus (Fig. 3).....	269
— guinea-pig's intestine (Fig. 4).....	270
Cat. Chloralose. Blood pressure (Fig. 5).....	270
Isolated guinea-pig's uterus (Fig. 6).....	271
— guinea-pig's intestine (Fig. 7).....	271
Cat. Chloralose. Blood pressure (Fig. 8).....	272
Isolated guinea-pig's uterus (Fig. 9).....	273
— guinea-pig's intestine (Fig. 10).....	273
Cat. Chloralose. Blood pressure (Fig. 11).....	274
Spinal cat. Blood pressure (Fig. 12).....	275
— cat. Suprenals removed. Blood pressure (Fig. 13).....	276
Cat. Chloralose. Blood pressure (Fig. 14).....	276
Contractions of cat's nictitating membrane. Superior cervical ganglion perfused (Fig. 15).....	278
Isometric contractions of cat's denervated gastrocnemius injections into aorta at bifurcation (Fig. 16).....	279
Isolated <i>rectus abdominis</i> of frog (Fig. 17).....	279
— strip of leech body wall (Fig. 18).....	280
Spinal cat. Blood pressure (Fig. 19).....	281
Section of liver showing marked necrosis (Fig. 1).....	301
Action and toxicity of retrorsine (Fig. 2).....	303
Activity of local anesthetics (Graph I).....	316
Pulse rate and systolic blood pressure of dog following subcutaneous injection of 5 mgm. per kilogram (Fig. 1).....	322
Ten-day subcutaneous followed after an interval by four-day oral administration of ephedrine (Fig. 2).....	324
Pharmacology of trichlorethylene (Fig. 1).....	329
Effect of trichlorethylene on blood pressure, pulse rate and respiration (Fig. 2).....	330
Acetylcholine and adrenalin in cat's saliva (Fig. 1).....	343
— and adrenalin in cat's saliva (Fig. 2).....	343
— and adrenalin in cat's saliva (Fig. 3).....	344
Fever producing agents in rats (Fig. 1).....	347
Therapeutic doses of acetanilid in milligrams per kilogram (Fig. 2).....	348
Acetanilid in normal rats (Fig. 3).....	349
Toxicity of acetanilid (Fig. 4).....	350
New salt for gall-bladder visualization (Fig. 1).....	360
Shadow obtained with 2.64 grams of caesium tetraiodophenolphthalein given intravenously (Fig. 2).....	363
Curves of the alcoholic concentration of the blood following intravenous injection of single doses of 0.5 to 1.5 cc. ethyl alcohol per kilogram of body weight (Fig. 1).....	373
Blood alcohol maintained at different concentrations by prolonged injection of approximately equal amounts of alcohol (Fig. 2).....	374
— alcohol maintained at different concentrations by prolonged injection of equal amounts of alcohol (Fig. 3).....	376
Ovary of mouse injected with 0.05 cc. antuitrin-S ($\times 40$) (Fig. 1).....	385

Ovary of untreated control mouse ($\times 40$) (Fig. 2).....	385
— of mouse injected with 0.1 cc. sheep pituitary extract ($\times 40$) (Fig. 3)..	385
— of mouse injected with 0.2 cc. sheep pituitary extract ($\times 40$) (Fig. 4)..	385
— of mouse injected with 0.036 cc. pregnant mare serum ($\times 40$) (Fig. 5)..	385
Tubal ova in mouse injected with 0.05 cc. antuitrin S ($\times 84$) (Fig. 6).....	385
— ova in mouse injected with 0.15 cc. sheep pituitary extract ($\times 84$) (Fig. 7).	385
Action of ergotocin on human postpartum uteri (Fig. 1).....	401
Absence of inhibitory action of ergotocin over epinephrine on blood pressure in the pithed cat (Fig. 2).....	402
— of inhibitory action of ergotocin over epinephrine on isolated rabbit's uterus (Fig. 3).....	402
Action of ergotocin on the frog's heart (Fig. 4).....	404
Relaxation of isolated rabbit's intestines by ergotocin, and its abolition by ergotamine (Fig. 5).....	405
Urinary bladder mechanisms (Fig. 1).....	410
— bladder mechanisms (Fig. 2).....	411
Effect of various anesthetics on salivary secretion (Fig. 1).....	428
Pitressin-cysteine reduction (Fig. 1).....	438
Inactivation of cysteine-reduced pitressin by benzyl chloride (Fig. 2).....	439
Pitocin-cysteine reduction (Fig. 3).....	440
Pitocin. Inactivation by benzylation after reduction (Fig. 4).....	442
Pitressin-reoxidized (Fig. 5).....	443
Average metabolic response of rats to 20 mgm. per kilogram dinitrophenol injected subcutaneously (Fig. 1).....	455
— metabolic responses of 51 rats to various doses of dinitrophenol admin- istered intragastrically (Fig. 2).....	458
— metabolic response of 11 dinitrophenol-fed rats to 20 mgm. per kilogram intragastrically (Fig. 3).....	458
Renal excretion as a factor in the metabolic response to intragastrically administered dinitrophenol (Fig. 4).....	460
Effect of nicotine on respiration and blood pressure in the cat during local anesthesia (Fig. 1).....	465
— of nicotine on respiration and blood pressure in the cat during barbital depression (Fig. 2).....	465
— of nicotine on respiration in the cat during local anesthesia (Fig. 3)...	467
— of nicotine on respiration in the cat after 300 mgm. of barbital-sodium (Fig. 4).....	467
— of phrenic stimulation on the contraction of the diaphragm in the nor- mal cat in which respiration ceased after ether (Fig. 5).....	471
— of phrenic stimulation on the contraction of the diaphragm in the normal cat in which respiration ceased after ether (Fig. 6).....	471
Response of the diaphragm to phrenic stimulation in cat after intravenous injection of curare, 2.0 mgm. per kilogram (Fig. 7).....	471
Effect of intravenous injection of nicotine, 2.0 mgm. per kilogram, in normal cat (Fig. 8).....	471
— of 50 per cent of the fatal dose of nicotine on the endings of the phrenic nerve in cat (Fig. 9).....	471
