

Aborted Autophagy and Non-apoptotic Death Induced by Farnesyl Transferase Inhibitor and
Lovastatin

Supplemental Figure 1. Lack of LC3-II accumulation in immortal rat Schwann cells (iSC)

following FTI-1 plus lovastatin treatment. iSC and STS-26T cultures were treated as indicated in the figure. Whole cell lysates were prepared 24 and 48 h later for western blot analyses of LC3-I and LC3-II expression. FTI-1 plus lovastatin treatment failed to increase the expression of LC3-II in iSC cells. In contrast, STS-26T cells cotreated with FTI-1 and lovastatin expressed high levels of LC3-II.
