A double-blind, within subject comparison of spontaneous opioid withdrawal from buprenorphine versus morphine
D. Andrew Tompkins, Michael T. Smith, Miriam Z. Mintzer, Claudia M. Campbell, and Eric C. Strain
Journal of Pharmacology and Experimental Therapeutics  (#209478)

Supplemental Table 1. Mean Peak Daily Visual Analog Scale Ratings (+/- SEM) of Positive Drug Effects during and after Active Drug Administration. VAS=visual analog scale (0-100). Day 0 = last day of active drug administration.

A) High VAS

Withdrawal Condition

- ▲ Morphine
- ■ Buprenorphine

B) Drug Effects VAS

C) Liking VAS

D) Good Effects VAS
