Title: Differential cell-protective function of two resveratrol (trans-3,5,4'-trihydroxystilbene) glucosides against oxidative stress

Authors: Ryusuke Hosoda, Atsushi Kuno, Yusuke S. Hori, Katsuki Ohtani, Nobutaka Wakamiya, Azusa Oohiro, Hiroki Hamada, and Yoshiyuki Horio

Journal: The Journal of Pharmacology and Experimental Therapeutics

Supplemental Fig. 1

Supplemental Fig. 1. Purity of RSV glucosides synthesized in plant cells of *Phytolacca Americana*. Resveratrol (RSV, upper), resveratrol 3-O- β -D-glucoside (3G-RSV, middle), or resveratrol 4'-O- β -D-glucose (4'G-RSV, lower) used in the experiments was dissolved in methanol (1 mM) and analyzed by HPLC (A) and ESI-MS (B).
