## CONTENTS

## Number 1, May, 1930

I. The Action of the "Parotid" Gland Secretion of Bufo regularis. By David Epstein and J. W. C. Gunn	1
II. Studies on the Colloid Chemistry of Antisepsis and Chemotherapy. III. The Ultramicroscopic Examination of Neoarsphenamine and of Certain Antiseptics, and Their Effects upon Protein Solutions. By Arthur D.	
Hirschfelder and Harold N. Wright	13
felder  IV. On the Pharmacological Action of Various Aromatic-Aliphatic Lactones.  II. Studies on Chemical Constitution and Pharmacological Action. By  W. F. von Oettingen	39 59
V. Pharmacological Studies of Twenty-Three Isomeric Octyl Alcohols. By David I. Macht and Harriet P. Leach	71
metric Methods to Digitalis Standardization. By William Nyiri and Louis DuBois	99
Calcium Ions, Hydrogen Ions and Digitalis. By William Nyiri and Louis DuBois.	111
Number 2, June, 1930	
VIII. Some Ob Ivations on the Suitability of Amytal as an Anesthetic for	
Laborato nimals. By R. C. Garry.  IX. Continu Recording Pens. By J. H. Thompson and A. T. Wilson.  X. An Appa for Continuously Recording Human Blood Pressure. By	129 137
J. H. Tienpson	141
and D. T. Hughson	153
XII. A Comparison of the Premedication Values of Several Barbituric Acid Derivatives in Relation to Nitrous Oxide Anesthesia. By M. S. Stormont,	
XII. A Comparison of the Premedication Values of Several Barbituric Acid Derivatives in Relation to Nitrous Oxide Anesthesia. By M. S. Stormont, I. Lampe and O. W. Barlow	
<ul> <li>XII. A Comparison of the Premedication Values of Several Barbituric Acid Derivatives in Relation to Nitrous Oxide Anesthesia. By M. S. Stormont, I. Lampe and O. W. Barlow.</li> <li>XIII. Studies on the Duration of Action of Drugs. I. Analgesics and Hypnotics. By Theodore Koppanyi and Abraham Lieberson.</li> <li>XIV. Studies on the Duration of Action of Drugs. II. Mydriatic Actions of Epinephrine and Atropine. By Theodore Koppanyi and Abraham</li> </ul>	177

XVII. The Estimation of Digitalis by Pigeon-Emesis and Other Methods. By J. H. Burn	221
XVIII. Detoxification of Nicotine by Ultraviolet Rays. By A. J. Pacini and	
	241
Number 3, July, 1930	
XIX. The Scientific Proceedings of the American Society for Pharmacology and Experimental Therapeutics. Twenty-First Annual Meeting, Held at Chicago, Ill., March 26, 27, 28, 29, 1930	245
Rate and Respiration in Dogs. By Charles M. Gruber and William B. Kountz	275
XXI. Ephedrine on the Ureter. By George B. RothXXII. The Action of Alcohol, Caffeine, and Tobacco, on the Cardiac Output	301
(and Its Related Functions) of Normal Man. By Arthur Grollman  XXIII. The Testing of Local Anesthetics. By T. H. Rider	313
XXIV. Pharmacological Note on Carbo Ligni and Carbo Animalis. By	329
David I. Macht	343
XXV. Biological and Chemical Studies of the Relationship between Arsenic and Crystalline Glutathione. By Sanford M. Rosenthal and Carl Voegtlin	347
XXVI. Studies on Crystalline Insulin. XI. Does Insulin Cause an Initial	
Hyperglycemia? By E. M. K. Geiling and A. M. De Lawder	369
Number 4, August, 1930	
XXVII. The Action of an Alkaloidal Product from the Leaf of Solanum	
Pseudocapsicum, L. By J. M. Watt, H. L. Heimann and E. Meltzer XXVIII. The Prevention of Acute Intoxication from Local Anesthetics. By	387
P. K. Knoefel, R. P. Herwick and A. S. Loevenhart	397
XXIX. Chemotherapy of Quinoline Compounds. Part I. A Preliminary Report on the Action of Certain Quinoline Compounds on Paramoecia. By Upendranath Brahmachari, Tarapada Bhattacharyya, Radhakrishna	
Banerjea and Bibhuti Bhusan Maity	413
XXX. Idiosyncrasy to Quinine, Cinchonidine and Ethylhydrocupreine and Other Levorotatory Alkaloids of the Cinchona Series: Further Chemical Delimitation of the Idiosyncrasy; Alteration in Sensitiveness. By W.	
T. Dawson and Francis A. Garbade	417
XXXI. Studies in Cancer Chemotherapy. IX. The Reaction of the Blood in Cancer. By Fritz Bischoff, M. Louisa Long and Elsie Hill	495
XXXII. Some Observations on the Effect of Pitressin upon the Cardiovascu-	720
lar System. By Charles M. Gruber and William B. Kountz	435
XXXIII. IV. The Effect of Epinephrine upon the Rate of Contraction and upon the Conduction Time of Peristalsis and Antiperistalsis in Excised	
Ureters. By Charles M. Gruber	<b>44</b> 9
XXXIV. Local Anesthetics Derived from Dialkylamino Propandiols. I. Phenylurethans. By T. H. Rider.	457
XXXV. A Study of the Innervation of the Pylorus of the Terrapin. By	
Nolan I. Kaltreider	469

## ILLUSTRATIONS

Perfusion of the isolated heart of the frog with a 1:8000 solution of Transvaal	
toad secretion (Fig. 1)	3
The effect of an intravenous injection of toad secretion (3 mgm. per kilogram)	
in the cat (Fig. 2)	5
— effect of a solution of toad secretion (1:50,000) on the isolated cat's heart	
(Fig. 3)	7
— effect of toad secretion on the isolated intestine of the cat (Fig. 4)	8
Drawing showing the appearance of a cholesterol suspension and of egg albu-	
min, viewed with the ultramicroscope (Fig. 1)	17
Aggregation of egg albumin by antiseptics, viewed with the ultramicroscope	
(Fig. 2)	20
Effect of changes in H-ion concentration upon the flocculation of neoarsphe-	
namine (Fig. 3)	27
Neoarsphenamine and its reaction with egg albumin (Fig. 4)	28
Effects of neoarsphenamine and mercurochrome on rabbit's blood plasma	
(Fig. 5)	31
Studies on the colloid chemistry of antisepsis and chemotherapy (Fig. 1)	47
on the colloid chemistry of antisepsis and chemotherapy (Fig. 2)	48
— on the colloid chemistry of antisepsis and chemotherapy (Fig. 3)	50
on the colloid chemistry of antisepsis and chemotherapy (Fig. 4)	52
Ichthyometer (Fig. 1)	<b>78</b>
Ichthyogram (Fig. 2)	79
Helicogram. Effect of octyl alcohol XXI (Fig. 3)	83
Cat, 2.6 kgm. Ether anesthesia (Fig. 4)	86
Vas deferens of rat. Effect of octyl alcohol I (Fig. 5)	88
Uterus of the guinea pig (Fig. 6)	89
Relation of ouabain to calcium (Fig. 1)	116
Toxic effect of 0.002 per cent CaCl <sub>2</sub> , subsequent to administration of 0.002 mg.	
per cent ouabain (Fig. 2)	117
Hastening and reinforcing effect of toxic digitan action by subsequent admin-	
	118
Almost immediate toxic effect of 0.08 cc. Digitan intravenously subsequent to	
	119
Typical digitalis poisoning in slightly acid menstruum (Fig. 5)	122
Male cat (Fig. 1)	130
rabbit (Fig. 2)	131
Perfusion of frog's heart with Greene's frog-heart cannula (Fig. 3)	132
	134
	139
A, reservoir with, leading from it, $B$ , capillary tube, enclosed in $C$ , the straw,	
which is nipped in $D$ , a small half-cylinder of metal, chilled at $E$ , the	
fulcrum, to fit the bearing-cones (Fig. 2)	139

A, the float proper, held central by $B$ , the manometer tube cover, $C$ , the ink	
reservoir with $D$ , the capillary leading from it to $E$ , the pen held in $F$ ,	
	139
Armlet for use with the Thompson sphygmanograph (Fig. 1)	
Wristlet for use with the Thompson sphygmanograph (Fig. 2)	
Photograph of the manometer and portable case (Fig. 3)	145
Typical human blood pressure tracing recorded by the sphygmanograph (Fig. 4)	146
Rise of blood pressure in human subject resulting from subcutaneous injection (five minutes previous to beginning of record of ephedrine hydrochloride).	
Time intervals of five minutes (Fig. 5)	147
Fall of blood pressure in human subject during inhalation of amyl nitrite	
(Fig. 6)	147
A comparison of the premedication values of several barbituric acid deriva-	
tives in relation to nitrous oxide anesthesia (Fig. 1)	166
— comparison of the premedication values of several barbituric acid deriv-	
atives in relation to nitrous oxide anesthesia (Fig. 2)	167
Persistence of mydriasis after graded intravenous injections of epinephrine	
	189
— of mydriasis after graded intravenous injections of epinephrine in two	
cats. Small doses (0.00006 to 0.0125 mgm.) (Fig. 2)	190
of mydriasis in the left pupil after the injection of epinephrine into the	
	191
Comparison of the difference in the duration of mydriasis in the right pupil	
after a given dose of epinephrine injected into the femoral vein (A) and	
into the left common carotid artery (B). Same cat as in figure 3 (Fig. 4).	192
Persistence of mydriasis after graded intraocular injections of epinephrine	
, , ,	193

The second secon	216
Curves same as in figure 6, showing depressant effects of 3 cc., 1:200 chloral	
	216

Curves same as in figure 6, showing depressant effects of 2 cc., 1:10,000	
ephedrine. A, control (Fig. 8)	216
— same as in figure 6, showing depressant effect of 2 cc., 1 per cent quinidine	
sulphate solution (Fig. 9)	
The estimation of digitalis by pigeon-emesis and other methods (Fig. 1) $\dots$	
estimation of digitalis by pigeon-emesis and other methods (Fig. 2)	
estimation of digitalis by pigeon-emesis and other methods (Fig. 3)	
estimation of digitalis by pigeon-emesis and other methods (Fig. 4)	231
Graph illustrating the normal variations in blood pressure in unanesthetized	
dogs (Fig. 1)	280
Curve plotted from the data obtained from a 9-kgm. dog under chloretone	
anesthesia (Fig. 2)	282
obtained from a 6-kgm. dog. Local anesthesia. Upper record is that of	
the respiration with, tambour and pneumograph, the middle record the	
blood pressure with membrane manometer and the lower record the time	
	283
- plotted from the data obtained from a non-anesthetized 6.5-kgm. dog	
(Fig. 4)	285
9.5-kgm. dog. Local anesthesia. Top record the blood pressure with mem-	
brane manometer, and bottom record the time interval in fifteen seconds	000
(Fig. 5)	286
Curve plotted from the data obtained from an experiment upon an unanesthe-	000
tized 9.5-kgm. dog (Fig. 6)	288
6-kgm. dog. Local anesthesia, both vagi cut four hours earlier. Top record	
the blood pressure with membrane manometer, bottom record the time interval in fifteen seconds (Fig. 7)	200
Curve plotted from the data obtained from an experiment upon an 8-kgm.	209
dog. Both vagi cut two hours previously. Local anesthesia (Fig. 8)	200
14-kgm. dog under ether anesthesia. Both adrenal glands excised. Top	290
curve that of the blood pressure with a membrane manometer, bottom	
curve that of the blood pressure with a membrane manometer, bottom curve the time interval in fifteen seconds (Fig. 9)	909
12-kgm. dog. Local anesthesia. Both carotid arteries had been tied off	232
under ether anesthesia three hours before this record was made. Top	
curve the blood pressure with membrane manometer and bottom record	
the time in fifteen-second intervals (Fig. 10)	294
Effect of 10 mgm. of ephedrine sulphate (Lilly & Co.) in 100 cc. of alkaline	
Locke-Ringer on the excised dogs' ureter (Fig. 1)	305
— of 20 mgm. of ephedrine hydrochloride (Read) on the excised ureter of	
dog (Fig. 2)	305
- of 80 additional milligrams of ephedrine hydrochloride (Read) on the	
same segment of dog's ureter which was used to obtain figure 2 (Fig. 3)	306
- of 20 mgm. of ephedrine hydrochloride (Read) in 100 cc. of alkaline	
Locke-Ringer, on a quiescent segment of dogs' ureter (Fig. 4)	307
— of 0.1 mgm. of epinephrine (Parke Davis & Co.) on the same segment	
which was used for obtaining figure 4, the Locke-Ringer having been	
changed seven minutes previously (Fig. 5)	<b>3</b> 08
— of 10 mgm. of ephedrine sulphate (Lilly & Co.) on a beating segment of	
nigg' ureter (Fig. 6)	308

Prevention of the local inflammatory reaction from N/100 arsenoxide when N/10 glutathione is simultaneously injected (right ear) (Fig. 1)	256
Biological and chemical studies of the relationship between arsenic and	550
crystalline glutathione (Chart 1)	360
