

## CONTENTS

## NUMBERS 1 AND 2, JULY, 1915

I. The Effect of Certain Drugs on the Respiration and Gaseous Metabolism in Normal Human Subjects. By Harold L. Higgins and James H. Means.....	1
II. Intrapericardial Medication and Massage in the Treatment of Arrest of the Heart. By James A. Gunn and Philip A. Martin.....	31
III. Observations on the Effect of Intravenous Injections of Sodium Phosphate. By Isidor Greenwald.....	57
IV. On the Action of Veratrum Viride, with some Remarks on the Inter-relationship of the Medullary Centres. By William Cramer.....	63
V. Action of Drugs on the Isolated Gall-Bladder. By Charles C. Lieb and John E. McWhorter.....	83
VI. The Effects of Chelidonin on Smooth Muscle. By Paul J. Hanzlik... 99	99
VII. The Comparative Action of the Stereo-isomers of Hydroxyhydrindamine. By Yasuo Ikeda.....	121
VIII. The Antitoxic Action of Rattlesnake Serum on Rattlesnake Venom with a Note on the Percentage of Total Solids of the Serum and Bile. By William H. Welker and John Marshall.....	125
IX. Observations on Plasmapheresis. Second Paper. By B. B. Turner, E. K. Marshall, Jr., and Paul D. Lamson.....	129
X. The Toxicity of Certain Hirudin Preparations. By E. K. Marshall, Jr. 157	157
XI. The Rôle of the Liver in Acute Polycythaemia: A Mechanism for the Regulation of the Red Corpuscle Content of the Blood. By Paul D. Lamson.....	169

## NUMBER 3, OCTOBER, 1915

XII. The Seat of the Emetic Action of Various Drugs. By Cary Eggleston and Robert A. Hatcher.....	225
XIII. The Influence of Salicylates on the Elimination of Uric Acid and Other Waste Products from the Blood. By W. Denis.....	255
XIV. Studies on the Circulation in Man. XIV. The Change Produced in the Bloodflow (in the Hands) under the Influence of Digitalis in Cases of Auricular Fibrillation. By G. N. Stewart and R. W. Scott.....	263
XV. Studies on the Circulation in Man. XV. Further Observations, Chiefly Pharmacological, on the Criteria by which Deficiencies in the Bloodflow (in the Hands or Feet) due to Mechanical Causes may be Discriminated from Changes due to Functional (Vasomotor) Causes. By G. N. Stewart.....	281
XVI. Studies on the Vasomotor Centre. XVIII. The Effects of Veratrum Viride and Cevadin (Veratrin). By J. D. Pilcher and Torald Sollmann	295

XVII. A Physiological Test for Cholin and Some of its Applications. By Reid Hunt.....	301
XVIII. Action of the Opium Alkaloids, Individually and in Combination with Each Other, on the Respiration. By D. I. Macht.....	339
XIX. The Vasomotor Reaction to Nicotin: Locus of Stimulation. By R. G. Hoskins and S. Walter Ranson.....	375

## NUMBER 4, NOVEMBER, 1915

XX. The Similarity and Synergy of Morphine and Strychnine' Action. By Hugh McGuigan and E. L. Ross.....	385
XXI. The Synergism of Morphin and the Scopolamins. By Maurice I. Smith.....	407
XXII. On the Action of Cocaine. By M. Kuroda.....	423
XXIII. The Bloodflow in a Patient with Double Aortic and Double Mitral Disease. By L. H. Newburgh and J. H. Means.....	441
XXIV. The Effect of Caffeine upon the Bloodflow in Normal Human Subjects. By J. H. Means and L. H. Newburgh.....	449
XXV. An Apparatus for the Perfusion of Isolated Organs. By A. N. Richards and Cecil K. Drinker.....	467
XXVI. Urine Formation by the Perfused Kidney: Preliminary Experiments on the Action of Caffeine. By A. N. Richards and O. H. Plant.....	485
XXVII. The Action of Phenylethylamin on the Heart. By Henry G. Barbour and Edward M. Frankel.....	511
XXVIII. The Response of the Surviving Uterus to Morphin and Scopolamin. By Henry G. Barbour and Nat H. Copenhaver.....	529
XXIX. The Action of Caffein and of Epinephrin upon the Vagus Nerve. By Henry G. Barbour and Simon B. Kleiner.....	541
XXX. Morphin and Scopolamin Action upon the Intact Uterus. By Henry Gray Barbour.....	547

## NUMBER 5, DECEMBER, 1915

XXXI. Absorption of Potassium Iodid by Perfused Thyroid Glands and Some of the Factors Modifying It. By David Marine and H. O. Feiss.....	557
XXXII. Contributions to the Physiology of the Stomach. XXVIII. Further Studies on the Action of Bitter Tonics on the Secretion of Gastric Juice. By Louis D. Moorhead.....	577
XXXIII. The Central Action of Digitalis as Tested by the Cardio-Inhibitory Center. By C. W. Greene and J. O. Peeler.....	591
XXXIV. The Influence of Some Drugs Used in the Treatment of Gout (and Arthritis) on the Elimination of Uric Acid and Other Waste Products from the Blood. By W. Denis.....	601

## ILLUSTRATIONS

Rabbit. Urethane (Fig. 1).....	35
— Urethane (Fig. 2).....	37
— Urethane (Fig. 3).....	38
Cat. Urethane and Chloroform (Fig. 4).....	40
Rabbit, heart arrested by chloroform (Fig. 5).....	47
— heart arrested by chloroform (Fig. 6 I).....	48
— (Fig. 6 II).....	49
Cat, 2 kilo, Experiment 5. (Fig. 1).....	69
Same experiment as figure 1 (Fig. 2).....	70
Cat. Experiment 23 (Fig. 3).....	71
— 2.7 kilo. Experiment 33 (Fig. 4).....	71
— Experiment 17 (Fig. 5).....	72
— Both vagi cut. Experiment 18 (Fig. 6).....	73
Gall-bladder. Dog. Circular coat (Fig. 1).....	88
— Dog. Longitudinal fibers recording (Fig. 2).....	89
— Dog. Longitudinal coat (Fig. 3).....	90
— Dog. Longitudinal coat (Fig. 4).....	92
— Dog. Longitudinal fibers recording (Fig. 5).....	93
— Dog. Circular coat (Fig. 6).....	95
— Dog. Circular coat (Fig. 7).....	95
— Dog. Circular coat (Fig. 8).....	96
Ring of frog's oesophagus in Ringer's solution at 28° C. (Fig. 1).....	101
Frog's stomach—region of fundus; longitudinal muscle (Fig. 2).....	102
Ring of rabbit's intestine (Fig. 3).....	102
Strip of rabbit's uterus (not gravied) (Fig. 4).....	103
Ring of cat's intestine (Fig. 5).....	103
Strip of pregnant uterus of guinea pig (Fig. 6).....	104
— of pregnant uterus of guinea pig (Fig. 7).....	105
Ring of frog's oesophagus (Fig. 8).....	106
Perfusion of frog's vessels with Ringer's solution and chelidonin (Fig. 9)...	110
Effect of chelidonin on frog's vessels constricted by epinephrin (Fig. 10)...	111
— of histamin on respiration of chelidonized rabbit (Fig. 11).....	117
Isolated rabbit's heart perfused with Locke's solution (Fig. 1).....	123
Case 1. Lead 2. Note the absence of the P summits and the marked irregularity of the ventricular deflection R (Fig. 1).....	270
Tracing taken with Mackenzie polygraph from C. R. (Fig. II).....	272
Veratrum viride on vasomotor centre and blood pressure (Fig. 1).....	297
Cevadin on the vasomotor center, blood pressure and respiration (Fig. 2)...	297
Frog heart; May 28; Straub method (Fig. 1).....	305
Frog's heart. Experiment January 27, 1915; Straub method (Fig. 2).....	309
— Experiment December 10, 1914. Straub method (Fig. 3).....	312

Frog's Heart. Experiment December 4, 1914. Straub method (Fig. 4).....	313
— Experiment February 5, 1915. Straub method (Fig. 5) .....	315
— Experiment February 25, 1915 (Fig. 6) .....	319
— Experiment March 26, 1915 (Fig. 7).....	321
— Experiment February 25, 1915 (Fig. 8) .....	323
— Experiment March 26, 1915 (Fig. 9).....	325
— Experiment March 19, 1915 (Fig. 10).....	328
— Experiment March 3, 1915 (Fig. 11).....	329
— Experiment February 20, 1915 (Fig. 12).....	332
Respiratory apparatus described in the text (Fig. 1).....	344
Experiment April 26, 1915. Perfusion of respiratory center of a dog by Hooker's method (Fig. 2).....	368
— April 27, 1915. Perfusion of respiratory center by Hooker's method (Fig. 3).....	370
Initial reactions to adrenin and nicotin (Fig. 1).....	378
Effect of cutting spinal cord, eighth cervical level (reduced to $\frac{1}{2}$ ) (Fig. 2) ...	378
Repetition of 1 after cord transection (reduced to $\frac{1}{2}$ ) (Fig. 3).....	378
Effect of destroying spinal cord (Fig. 4).....	379
Repetition of 3 after cord destruction (reduced to $\frac{1}{2}$ ) (Fig. 5).....	379
Reaction to "adrenalin" 1 cc. 1 : 100,000 (Fig. 6).....	381
Perfusion of frog's heart (Fig. 1; Fig. 2).....	415
— of frog's heart (Fig. 3).....	416
— of frog's heart (Fig. 4).....	417
— of frog's heart (Fig. 5).....	417
Heart of <i>Rana temporaria</i> , Action of cocaine 1 in 10,000 (Fig. 1).....	428
Dog's heart (Fig. 2).....	430
Rabbit's small intestine (Fig. 3).....	431
— small intestine (Fig. 4).....	432
Isolated cat's stomach muscle (Fig. 5).....	433
— non-pregnant rabbit's uterus (Fig. 6).....	433
Non-pregnant dog's uterus (Fig. 7).....	433
— cat's uterus (Fig. 8).....	434
Cat's uterus during pregnancy (Fig. 9).....	435
— bladder (Fig. 10).....	436
Glass perfusion pump with connections for modifying character of pulse (Fig. 1).....	468
— (Fig. 2).....	469
Front elevation of stand and driving apparatus (Fig. 3).....	470
Side elevation of stand and driving apparatus (Fig. 4).....	471
Sectional diagram of stand (Fig. 5).....	472
Driving cam (40); outlet valve cam (47); inlet valve cam (48) (Fig. 6).....	475
Diagram showing relation of pump to valves during one complete cycle (Fig. 7).....	475
A tracing made with a Hürthle manometer attached to the side arm of the tube (Fig. 8).....	476
Oxygenating device (Fig. 9).....	477

Circular glass tube through which blood is driven to the oxygenating device (Fig. 10).....	478
Photograph of the perfusion and recording apparatus made immediately after the completion of experiment 3 (Fig. 1).....	489
Portions of record made during experiment 3 (Fig. 2).....	505
Action of frog's heart perfused with phenylethylamin hydrochlorid (Fig. 1).	513
Isolated rabbit's heart perfused with autogenous hirudinized blood diluted with Locke's solution (Fig. 2).....	516
— rabbit's heart, etc., Phenylethylamin 0.00005 gram (Fig. 3).....	517
— rabbit's heart, etc., Phenylethylamin 0.00025, later 0.0005 gram (Fig. 4)	519
Continuous with figure 4. Phenylethylamin 0.001 gram (Fig. 5).....	519
Phenylethylamin 0.002 gram (Fig. 6).....	520
Decerebrate cat. Experiment 8 (Fig. 7).....	524
— cat. Experiment 7 (Fig. 8).....	524
Urethanized cat. Experiment 9 (Fig. 9).....	524
Effect of morphin upon isolated pregnant cat uterus (Experiment XI) (Fig. 1)	532
— of scopolamin upon isolated non-pregnant guinea pig uterus (Fig. 2)..	533
— of morphin plus scopolamin upon isolated pregnant guinea pig uterus (Fig. 3).....	535
Perfusion of frog heart with Ringer's solution (Fig. 1).....	545
(Same experiment) Begins during caffein—Ringer perfusion (Fig. 2).....	545
Non-pregnant cat. Pithed through orbits. Experiment 23 (Fig. 1).....	552
Pregnant cat. Pithed through orbits. Experiment 25 (Fig. 2).....	553
Perfusion apparatus (Fig. 1).....	560
— of digitalis through the cephalic end of the carotid of the isolated head (Fig. 1).....	592
Brain perfusion of 0.1 per cent digitalis in Ringer's solution (Fig. 2).....	593
Second perfusion of the brain with 0.1 per cent digitalis in Ringer's solution (Fig. 3).....	593
Perfusion of the brain with 0.01 per cent digitalis in Ringer's solution, first test (Fig. 4).....	595
