The distribution, excretion and metabolism of C¹⁴-labeled tripelennamine (pyribenzamine) by guinea pigs. E. O. Weinman, T. A. Geissman. 1

Studies on the metabolic degradation of propoxyphene. H. M. Lee, E. G. Scott, A. Pohland. 14

The effects of meprobamate and pentobarbital upon cortical and subcortical responses to auditory stimulation. H. Kletzkin, K. Swan. 35

Effects of some steroid and nonsteroid lactones on potassium exchange and physiological properties of the isolated perfused guinea pig ventricle. R. L. Vick. 40

Studies on veratrum alkaloids. XXVIII. The action of the erythrophleum alkaloids on the single twitch and on the "veratrine response" of the sartorius muscle of the frog. W. Flacke. 49

The supersensitivity caused by cocaine. U. Trendelenburg. 55

Action of tricyclamol sulfate on gastric secretion of rats and dogs. T. M. Lin, R. S. Alphin, K. K. Chen. 66

The pharmacological actions of oxypanamine, an alkaloid derived from the seeds of ormosia panamensis. N. C. Moran, G. P. Quinn, W. M. Butler, Jr. 73

An analysis of the histamine-like actions of oxypanamine. N. C. Moran, G. P. Quinn, W. M. Butler, Jr. 85

The intracellular distribution of N-C¹⁴-methyl levorphanol in brain, liver and kidney tissue of the rat. L. B. Mellett, L. A. Woods. 97

Biochemical and pharmacological changes in the rat following chronic administration of morphine, nalorphine and nor-morphine. J. Cochin, J. Axelrod. 105

The role of the hypothalamus in pituitary-adrenal activation and antidiuresis by morphine. R. George, E. L. Way. 111

The analgesic equivalence to morphine and relative side action liability of oxymorphone (4-hydroxydihydromorphinone). N. B. Eddy, L. E. Lee, Jr. 116

Central nervous system depressant effects of some indolyl-ethylpyridines. J. H. Mrsky, H. D. White, T. B. O'Dell. 122

Sulfur-35 labeled acetazolamide in cat brain. L. J. Roth, J. C. Schoolar, C. F. Barlow. 128
REGISTER OF ARTICLES
125:2 Feb 59

8117 Metabolic aspects of the positive inotropic action of fluoride on rat ventricle. J. M. Covin, D. A. Berman. 137
8118 The role of potassium in epinephrine-induced cardiac arrhythmias. P. E. Dresel, M. Nickerson. 142
8119 Pharmacologic evidence for the existence of a presynaptic event in neuromuscular transmission. W. F. Riker, Jr., G. Werner, J. Roberts, A. Kuperthan. 150
8120 The contractile response of directly stimulated muscle after administration of neuromuscular blocking compounds. R. L. Irwin, J. B. Wells. 159
8121 The effects of some possible neurohumoral agents on spinal cord reflexes. J. W. Kissel, E. F. Domino. 168

125:3 Mar 59
8123 Distribution of drugs between blood and cerebrospinal fluid: General methodology and effect of pH gradients. D. P. Rail, J. R. Stabenau, C. G. Zubrod. 185
8124 Distribution of drugs between blood and cerebrospinal fluid in the various vertebrate classes. C. G. Zubrod, D. P. Rail. 194
8127 The effect of azacyclonol on some cardiovascular and metabolic actions of epinephrine. P. E. Dresel. 208
8129 A study of the interactions of hexyl-cyclohexylethylamine (hecylamine), ephedrine, cocaine and catecholamines. V. L. Sydow. 218
8130 Interaction between neuromuscular blocking agents: Time course of effects as assessed by rabbit head-drop assay. C. M. Smith, C. Urban. 227
8131 Interactions between epinephrine and some psychotomimetic drugs. E. Costa, G. Zetler. 230
8132 Antagonism of the frequency of phenylquinone-induced writhing in the mouse by weak analgesics and nonanalgesics. L. C. Hendershot, J. Forsaith. 237
8133 Effect of morphine and nalorphine on plasma hydrocortisone levels in man. R. K. McDonald, F. T. Evans, V. K. Weise, R. W. Patrick. 241
8134 The effect of morphine sulfate on avoidance and escape behavior. T. Verhave, J. E. Owen, Jr., E. B. Robbins. 248
8135 Electrophysiological correlates of avoidance conditioning in the cat. E. R. John, K. F. Killam. 252

R-11
On the mechanism of intestinal absorption of drugs. C. A. M. Hogben, D. J. Tocco, B. B. Brodie, L. S. Schanker. 275
Fate, distribution and excretion of S35 promazine. S. S. Walkenstein, J. Seifter. 283
Absorption and excretion studies on tetracycline. M. H. Pindell, K. M. Cull, K. M. Doran, H. L. Dickison. 287
The physiological disposition of chlorothiazide (diuril) in the dog. J. E. Baer, H. L. Leidy, A. V. Brooks, K. H. Beyer. 295
Comparative effects of chlorothiazide and mersalyl (mersalyl sodium and theophylline) on the kidney. W. P. Blackmore. 303
The influence of acidosis and alkalosis on mercurial-induced diuresis and sulphhydryl changes in the kidney. A. Farah, C. H. Bender, R. Kruse, E. Cafruny. 309
The kinetics of depression of potassium outflux by cocaine in toad sciatic nerve. A. M. Shanes, M. D. Berman. 316
Further studies on the site of action of the neuromuscular blocking agent, 3,6-bis(3-diethylaminopropoxy) pyridazine bismethiodide. R. M. Gesler, A. V. Lasher, J. O. Hoppe, E. A. Steck. 323
The antagonism of atropine to the EEG effects of adrenergic drugs. R. P. White, E. A. Daigneault. 339
The effect of bemegride (megimide) and metrazol on some neurodepressors. V. Zapata-Ortiz, R. Castro de la Mata, A. Campos-Iturrizaga. 347

NOTICE

Attention is directed to the current method (ACC) of using entry numbers opposite the unit terms and names comprising the Subject and Author sections of the Journal index. These entry numbers coincide with the appropriate accession numbers listed serially at the left of the titles in the Register of Articles. Their purpose is to condense and unify the three parts of the index, and to expedite its use.

For details of the ACC indexing system please see: This Journal, "Index Notices", Vol. 122:2, Jan., and Vol. 122: N1-2, April, 1958.

The possibility has been considered that additional copies of the indexes for this and future volumes, bound separately, might be of value to libraries and to other subscribers and readers for use in reference work. Such a separate distribution would be justified only if the sale of a significant number of copies could be assured. It is suggested that anyone interested in such separate additional indexes write a letter to the Publisher who can then determine the feasibility of separate distribution.
