128:1 Jan 60

8255 The durations of action of thiopental and pentobarbital.
A. Goldstein, L. Aronow. ------------------------------------------ 1

8256 Some pharmacologic actions of beta-phenylisopropylhydrazine(PIH).
L. G. Eltherington, A. Horita. -------------------------------------- 7

8257 Biochemical and pharmacological effects of the monoamine oxidase
inhibitors, iproniazid, 1-phenyl-2-hydrazinopropane(JB 516) and
1-phenyl-3-hydrazinobutane (JB 835). S. Spector, P. A. Shore,
B. B. Brodie. ------------------------------------------------------ 15

8258 Pharmacology of (2- (octahydro-1-azocinyl) -ethyl) - guanidine
sulfate (SU-5864). R. A. Maxwell, A. J. Plummer, F. Schneider,
H. Povalski, A. I. Daniel. ------------------------------------------ 22

8259 Spectrum of action of muscarone and its derivatives. L. Gyermek,
K. R. Unna. -------------------------------------------------------- 30

8260 Pharmacological comparison of muscarine and muscarone with their
dehydro derivatives. L. Gyermek, K. R. Unna. ----------------------- 37

8261 Disappearance of various drugs from the cerebrospinal fluid.
S. E. Mayer, R. P. Maickel, B. B. Brodie. -------------------------- 41

8262 Nitrous oxide analgesia in relation to mental performance.
J. Parkhouse, J. R. Henrie, G. M. Duncan, H. P. Rome. ----------- 44

8263 Steric configuration and the activity at the mammalian neuro-
muscular junction of cyclic aminoalcohol derivatives.
F. G. Standaert, S. L. Friess. -------------------------------------- 55

8264 Pharmacology of a series of new 2-substituted pyridine
derivatives with emphasis on their analgesic and interneuronal
blocking properties. T. B. O'Dell, L. R. Wilson, M. D. Napoli,
H. D. White, J. H. Mirsky. ----------------------------------------- 65

8265 Chlorpromazine tolerance and physical dependence. E. M. Boyd. --- 75

8266 A comparison of three anticonvulsant testing methods.
C. L. Mitchell, H. H. Keasling. ----------------------------- 79

8267 The relation of drug-induced hypoglycemia to duodenal motility in
anesthetized dogs. R. D. Bunag, B. M. Rigor, L. G. Tan-Gatue,
W. R. Reotutar, R. Guevara. --------------------------------- 85

8268 Isolation of triethyllead ion from liver after inhalation of
tetraethyllead. C. D. Stevens, C. J. Feldhake, R. A. Kehoe. --- 90

8269 Influence of acetylsalicylic acid and salicylamide on the
coagulation of blood. A. J. Quick, L. Clesceri. ------------------ 95

8270 Methods for combining the results of two biological assays.
M. C. Sheps, E. A. Moore. ---------------------------------------- 99

128:2 Feb 60

8271 Studies on drug resistance in mammalian cells. II. 6-mercapto-
urine resistance in mouse fibroblasts. S. Tomizawa, L. Aronow. -107

8272 Active transport of some pyrimidines across the rat intestinal
epithelium. L. S. Schanker, D. J. Tocco. ------------------------- 115

8273 The pharmacological activities of benzthiazide (3-benzylthio-
methyl-6-chloro-7-sulfamyl-1,2,4-benzo thiadiazine-1,1-dioxide),
a nonmercurial diuretic. S. Y. P'an, A. Scriabine, D. E. McKersie,
W. M. McLamore. ------------------------------------------ 122

8313 A method for the quantitative comparison of anticancer agents with special reference to a series of folic acid antagonists. A. E. Sloboda. 419

NOTICE

to Subscribers and Readers

Attention is directed to the current method (ACC) of using entry numbers opposite the unit terms and names comprising the Subject and Author sections of the Journal index. These entry numbers coincide with the appropriate accession numbers listed serially at the left of the titles in the Register of Articles. Their purpose is to condense and unify the three parts of the index, and to expedite its use.

The possibility has been considered that additional copies of the indexes for this and future volumes, bound separately, might be of value to libraries and to other subscribers and readers for use in reference work. Such a separate distribution would be justified only if the sale of a significant number of copies could be assured. It is suggested that anyone interested in such separate additional indexes write a letter to the Publisher who can then determine the feasibility of separate distribution.
