The durations of action of thiopental and pentobarbital. A. Goldstein, L. Aronow. 1

Some pharmacologic actions of beta-phenylisopropylhydrazine(PIH). L. G. Eltherington, A. Horita. 7

Biochemical and pharmacological effects of the monoamine oxidase inhibitors, iproniazid, 1-phenyl-2-hydrazinopropane(JB 516) and 1-phenyl-3-hydrazinobutane (JB 835). S. Spector, P. A. Shore, B. B. Brodie. 15

Spectrum of action of muscarone and its derivatives. L. Gyermek, K. R. Unna. 30

Pharmacological comparison of muscarine and muscarone with their dehydro derivatives. L. Gyermek, K. R. Unna. 37

Disappearance of various drugs from the cerebrospinal fluid. S. E. Mayer, R. P. Maickel, B. B. Brodie. 41

Steric configuration and the activity at the mammalian neuromuscular junction of cyclic aminoalcohol derivatives. F. G. Standaert, S. L. Friess. 55

Pharmacology of a series of new 2-substituted pyridine derivatives with emphasis on their analgesic and interneuronal blocking properties. T. B. O'Dell, L. R. Wilson, M. D. Napoli, H. D. White, J. H. Mirsky. 65

Chlorpromazine tolerance and physical dependence. E. M. Boyd. 75

A comparison of three anticonvulsant testing methods. C. L. Mitchell, H. H. Keasling. 79

Isolation of triethyllead ion from liver after inhalation of tetraethyllead. C. D. Stevens, C. J. Feldhake, R. A. Kehoe. 90

Influence of acetylsalicylic acid and salicylamide on the coagulation of blood. A. J. Quick, L. Clesceri. 95

Methods for combining the results of two biological assays. M. C. Sheps, E. A. Moore. 99

Studies on drug resistance in mammalian cells. II. 6-mercaptopurine resistance in mouse fibroblasts. S. Tomizawa, L. Aronow. 107

Active transport of some pyrimidines across the rat intestinal epithelium. L. S. Schanker, D. J. Tocco. 115

The pharmacological activities of benzthiazide (3-benzylthio-methyl-6-chloro-7-sulfamyl-1,2,4-benzothiadiazine-1,1-dioxide), a nonmercurial diuretic. S. Y. P'an, A. Scriabine, D. E. McKersie, W. M. McLamore. 122
REGISTER OF ARTICLES

8274 Pharmacological consequences of the selective release of peripheral norepinephrine by syrosingopine (SU 3118). F. B. H. Orlans, K. P. Finger, B. B. Brodie. ----------------------------- 131

8277 The actions of ambonestyl (N(2-diethylaminoethyl)-isonicotinamide) and quinidine on isolated rabbit atria. E. R. Smith, B. B. Clark. -------------------------------- 154

8278 The effect of pyridoxal and other compounds on the mechanical activity and the sodium and potassium content of isolated rabbit atria. R. R. Levine, E. R. Smith, B. B. Clark. ------- 159

8279 Studies on the action of cortisone acetate on isolated cardiac tissue. R. D. Tanz. --------------------------------------- 168

8280 Amino-methylchromones, brain stem stimulants and pentobarbital antagonists. I. Setnikar, W. Murmann, M. J. Magistretti, P. Da Re. 176

8281 The usefulness of clinical signs for the comparison of intravenous anesthetics in dogs. E. W. Maynert. -------------- 182

8282 Acute tolerance to intravenous anesthetics in dogs. E. W. Maynert, G. I. Klingman. --------------------- 192

8283 Relation of thyroid function to acute and chronic effects of amphetamine in the rat. J. Tormey, L. Lasagna. ----------- 201

8284 Increase in the plasma insulin activity following the continuous infusion of mesoxalate into the pancreatic circulation in dogs. S. Ohashi, S. Takeuchi, Y. Kobayashi. ----------------------- 210

128:3 Mar 60

8285 Potentiation of duration of the vasodilator effect of bradykinin by sympatholytic drugs and by reserpine. M. Rocha E Silva, A. P. Corrado, A. O. Ramos. ------------------------------- 217

8286 Enhancement of inhibitory and excitatory effects of catecholamines. A. P. Roszkowski, G. B. Koelle. ------------------- 227

8287 The effect of gamma-amino-N-butryic acid and some related compounds on the cardiovascular system of anesthetized dogs. H. C. Stanton, F. H. Woodhouse. --------------------------- 233

8288 Sensitization to ventricular fibrillation. I. Sensitization by a substituted propiophenone, U-0882. J. I. Moore, H. H. Swain. 243

8289 Sensitization to ventricular fibrillation. II. Sensitization by amarine and congeners of U-0882. J. I. Moore, H. H. Swain. 253

8290 Cardiac activity of a series of synthetic steroid bases. C. R. Swaine, D. R. Waud. ----------------------------- 259

8292 The effect of guanidine on neuromuscular transmission. M. Otsuka, M. Endo. ----------------------------- 273

NOTICE
to Subscribers and Readers

Attention is directed to the current method (ACC) of using entry numbers opposite the unit terms and names comprising the Subject and Author sections of the Journal index. These entry numbers coincide with the appropriate accession numbers listed serially at the left of the titles in the Register of Articles. Their purpose is to condense and unify the three parts of the index, and to expedite its use.

The possibility has been considered that additional copies of the indexes for this and future volumes, bound separately, might be of value to libraries and to other subscribers and readers for use in reference work. Such a separate distribution would be justified only if the sale of a significant number of copies could be assured. It is suggested that anyone interested in such separate additional indexes write a letter to the Publisher who can then determine the feasibility of separate distribution.
