NOTICE

to Subscribers and Readers

Attention is directed to the current method (ACC) of using entry numbers opposite the unit terms and names comprising the Subject and Author sections of the Journal index. These entry numbers coincide with the appropriate accession numbers listed serially at the left of the titles in the Register of Articles. Their purpose is to condense and unify the three parts of the index, and to expedite its use.

For details of the ACC indexing system please see: This Journal, Vol. 122:2,Jan., Vol.122: N1-2,April,1958; and Vol.127: AI 1-2,December, 1959.

The possibility has been considered that additional copies of the indexes for this and future volumes, bound separately, might be of value to libraries and to other subscribers and readers for use in reference work. Such a separate distribution would be justified only if the sale of a significant number of copies could be assured. It is suggested that anyone interested in such separate additional indexes write a letter to the Publisher who can then determine the feasibility of separate distribution.
