8255 The durations of action of thiopental and pentobarbital.
A. Goldstein, L. Aronow. ------------------------------- 1
8256 Some pharmacologic actions of \textit{beta}-phenylisopropylhydrazine(PIH).
L. G. Eltherington, A. Horita. ------------------------------- 7
8257 Biochemical and pharmacological effects of the monoamine oxidase inhibitors, iproniazid, \textit{1-phenyl-2-hydrazinopropane}(JB 516) and \textit{1-phenyl-3-hydrazinobutane} (JB 835). S. Spector, P. A. Shore, B. B. Brodie. ------------------------------- 15
8259 Spectrum of action of muscarone and its derivatives. L. Gyermek, K. R. Unna. ----------------------------------- 30
8260 Pharmacological comparison of muscarine and muscarone with their dehydro derivatives. L. Gyermek, K. R. Unna. ----------------------------------- 37
8261 Disappearance of various drugs from the cerebrospinal fluid.
S. E. Mayer, R. P. Maickel, B. B. Brodie. ------------------------------- 41
8262 Nitrous oxide analgesia in relation to mental performance.
J. Parkhouse, J. R. Henrie, G. M. Duncan, H. P. Rome. ------------------------------- 44
8263 Steric configuration and the activity at the mammalian neuromuscular junction of cyclic aminoalcohol derivatives.
F. G. Standaert, S. L. Friess. ----------------------------------- 55
8264 Pharmacology of a series of new 2-substituted pyridine derivatives with emphasis on their analgesic and interneuronal blocking properties. T. B. O'Dell, L. R. Wilson, M. D. Napoli, H. D. White, J. H. Mirsky. ------------------------------- 65
8265 Chlorpromazine tolerance and physical dependence. E. M. Boyd. --- 75
8266 A comparison of three anticonvulsant testing methods.
C. L. Mitchell, H. H. Keasling. ----------------------------------- 79
8268 Isolation of triethyllead ion from liver after inhalation of tetraethyllead. C. D. Stevens, C. J. Feldhake, R. A. Kehoe. --- 90
8269 Influence of acetylsalicylic acid and salicylamide on the coagulation of blood. A. J. Quick, L. Clesceri. --- 95
8270 Methods for combining the results of two biological assays.
M. C. Sheps, E. A. Moore. ----------------------------------- 99

NOTICE
to Subscribers and Readers

Attention is directed to the current method (ACC) of using entry numbers
opposite the unit terms and names comprising the Subject and Author sec-
tions of the Journal index. These entry numbers coincide with the appro-
priate accession numbers listed serially at the left of the titles in the
Register of Articles. Their purpose is to condense and unify the three
parts of the index, and to expedite its use.

For details of the ACC indexing system please see: This Journal,
Vol. 122:2, Jan., Vol. 122: N1-2, April, 1958; and Vol. 127: A1 1-2, December,
1959.

The possibility has been considered that additional copies of the
indexes for this and future volumes, bound separately, might be of value
to libraries and to other subscribers and readers for use in reference
work. Such a separate distribution would be justified only if the sale of
a significant number of copies could be assured. It is suggested that
anyone interested in such separate additional indexes write a letter to the
Publisher who can then determine the feasibility of separate distribution.
