

REGISTER OF ARTICLES

8314-8332

129:1 May 60

8314	The actions of dichloroisoproterenol in the dog heart-lung preparation and the isolated guinea-pig atrium. W. W. Fleming, D. F. Hawkins.-----	1
8315	A series of 2,6-disubstituted phenoxyethyl ammonium bromides with true sympatholytic properties. R. A. McLean, R. J. Geus, R. J. Mohrbacher, P. A. Mattis, G. E. Ulyot.-----	11
8316	Pharmacology of trimethyl (2-(2,6-dimethylphenoxy)propyl) trimethylammonium chloride, monohydrate; compound 6890 or <u>beta</u> -TM 10. R. A. McLean, R. J. Geus, J. Pasternack, P. A. Mattis, G. E. Ulyot. -----	17
8317	Concerning a possible action of guanethidine (SU-5864) in smooth muscle. R. A. Maxwell, A. J. Plummer, H. Povalski, F. Schneider-	24
8318	1,1'-Trimethylene bis(4-formylpyridinium bromide) dioxime (TMB-4) and 2-pyridine aldoxime methiodide (2-PAM) as adjuvants to atropine in the treatment of anticholinesterase poisoning. J. H. Fleisher, H. O. Michel, L. Yates, C. S. Harrison-----	31
8319	A method for the evaluation of depressants of subatrial rhythmic function in the heart of the intact animal. J. Roberts, R. Baer-	36
8320	Potassium balance of the dog heart: effects of increasing heart rate and of pentobarbital and dihydro-ouabain. T. Brown, G. Grupp, G. H. Acheson. -----	42
8321	Studies on the pharmacology of glucagon. A. Farah, R. Tuttle.----	49
8322	A characterization of the stimulation of mammalian muscle spindles by succinylcholine. J. C. Brinling, C. M. Smith. -----	56
8323	A pharmacological study on the Renshaw cell. V. G. Longo, W. R. Martin, K. R. Unna. -----	61
8324	Quantification of effects of depressant drugs on EEG activation response. J. Paul-David, Jean-Louis Riehl, K. R. Unna. -----	69
8325	A pharmacological comparison of therapeutically useful centrally acting skeletal muscle relaxants. A. P. Roszkowski. -----	75
8326	A study of the diuretic effect of triamcinolone in the dog. L. A. Wozniak, A. Paino, I. Ringler, R. R. Roepke.-----	82
8327	The distribution and metabolic state of carbon-14 meprobamate in the rat brain. J. L. Emmerson, T. S. Miya, G. K. W. Yim.-----	89
8328	Enzymatic pathway for the formation of cotinine, a major metabolite of nicotine in rabbit liver. H. B. Hucker, J. R. Gillette, B. B. Brodie. -----	94
8329	Sustained action oral medication I. A quantitative study of prednisolone in man, in the dog and <u>in vitro</u> . J. G. Wagner, O. S. Carpenter, E. J. Collins.-----	101
8330	The relative potencies of methohexital and thiopental. J. W. Bellville, P. J. Fennel, T. Murphy, W. S. Howland. -----	108

129:2 June 60

8331	The effect of ouabain on the oxygen consumption, the high energy phosphates and the contractility of the cat papillary muscle. K. S. Lee, D. H. Yu, R. Burstein.-----	115
8332	An effect of cardiac glycosides on oxidative phosphorylation by heart mitochondria. K. S. Lee, A. Schwartz, R. Burstein.-----	123

REGISTER OF ARTICLES

8333-8350

129:2 June 60

8333	Some factors affecting glucuronide formation <u>in vitro</u> . J. K. Inscoe, J. Axelrod.-----	128
8334	Observations on the drug-induced synthesis of D-glucuronic, L-gulonic and L-ascorbic acids in rats. J. J. Burns, A. H. Conney, P. G. Dayton, C. Evans, G. R. Martin, D. Taller. ----	132
8335	Barbiturate metabolism as affected by certain agents acting on the liver. J. M. Fujimoto, K. B. Pearce, G. L. Plaa.-----	139
8336	The pharmacologic effects of heroin in relationship to its rate of biotransformation. E. L. Way, J. W. Kemp, J. M. Young, D. R. Grasseti.-----	144
8337	Behavioral determination of time and dose parameters of monoamine oxidase inhibitors. G. A. Heise, E. Boff.-----	155
8338	The psychosedative properties of methaminodiazepoxide. L. O. Randall, W. Schallek, G. A. Heise, E. F. Keith, R. E. Bagdon.-	163
8339	Human pharmacology and addiction liability of norcodeine. H. F. Fraser, H. Isbell, G. D. Van Horn.-----	172
8340	Some effects on the central nervous system of <u>gamma</u> -amino-N-butyric acid (GABA) and certain related amino acids administered systemically and intracerebrally to mice. O. D. Gulati, H. C. Stanton.-----	178
8341	The action of analgetic agents on positive afterpotentials of frog sciatic nerve. W. A. Krivoy.-----	186
8342	A survey of the effects of isoxsuprine on nonvascular smooth muscle. P. M. Lish, K. W. Dungan, E. L. Peters.-----	191
8343	Isoproterenol vasomotor reversal by sympathomimetic amines. D. T. Walz, T. Koppanyi, G. D. Maengwyn-Davies, M. L. Joyce.--	200
8344	The mechanism of isoproterenol vasomotor reversal by phenylephrine. D. T. Walz, G. D. Maengwyn-Davies.-----	208
8345	The adrenal cortical suppressant effect of two triazine analogs in the guinea pig. P. J. Costa, D. D. Bonnycastle.-----	214
8346	Actions of S,2-aminoethylisothiuronium Br. HBR (AET). Toxicity and protective effect against nitrogen mustard toxicity. M. G. Kelly, D. P. Rall, G. E. Trivers, R. W. O'Gara, C. G. Zubrod.-	218
8347	Effect of phenothiazine derivatives on dextran-induced edema. L. Kato, B. Gozsy.-----	231

129:3 July 60

8348	Effect of trans-2-phenylcyclopropylamine upon norepinephrine concentration and monoamine oxidase activity of rat brain. H. Green, R. W. Erickson.-----	237
8349	Intracellular distribution of norepinephrine in rat brain. I. Effect of reserpine and the monoamine oxidase inhibitors, trans-2-phenylcyclopropylamine and 1-isonicotinyl-2-isopropyl hydrazine. H. Green, J. L. Sawyer.-----	243
8350	Evidence that tranquilizing action of reserpine is associated with change in brain serotonin and not in brain norepinephrine. Effects of reserpine, raunescine, benzoquinolizines, dimethylaminobenzoyl methylreserpate, and stress. B. B. Brodie, K. F. Finger, F. B. Orleans, G. P. Quinn, F. Sulser.-----	250

REGISTER OF ARTICLES

8351-8371

129:3 July 60

- 8351 The effects of amphotericin B on yeast metabolism. G. R. Gale.-- 257
- 8352 Studies on the pharmacology of 6-azauracil. A. D. Welch, R. E. Handschumacher, J. J. Jaffe.----- 262
- 8353 Relation between pharmacologic augmentation of cardiac contractile force and the activation of myocardial glycogen phosphorylase. S. E. Mayer, N. C. Moran.----- 271
- 8354 The relation between the binding of sulfonamides to albumin and their antibacterial efficacy. A. H. Anton.----- 282
- 8355 Biochemical and pharmacological studies of dimethylaminoethanol (Deanol). G. Pepeu, D. X. Freedman, N. J. Giarmann.----- 291
- 8356 The physiological disposition of hexamethonium and related compounds. R. R. Levine.----- 296
- 8357 Studies of the contribution of bladder absorption to the physiological changes induced by pentobarbital. J. F. Borzelleca.--- 305
- 8358 Penetration of brain and brain tumor by aromatic compounds as a function of molecular substituents. A. H. Soloway, B. Whitman, J. R. Messer.----- 310
- 8359 Measurement of the inotropic effects of drugs on the innervated and noninnervated embryonic chick heart. L. P. McCarty, W. C. Lee, F. E. Shideman.----- 315
- 8360 Cardiac actions of a series of saturated and unsaturated bis-trimethylammonium compounds. H. G. Schoepke, F. E. Shideman.-- 322
- 8361 The effects of a new sympathetic blocking drug (bretylum) on cardiovascular control. D. M. Aviado, A. H. Dil, J. Duffy.---- 328
- 8362 Action of cholinergic stimulants on the inferior mesenteric ganglion of the cat. F. Herr, L. Gyermek.----- 338
- 8363 Bromide and chloride excretion with diuretic agents in animals. C. M. Kagawa, C. G. Van Arman.----- 343
- 8364 Comparison of dimethylchlortetracycline with tetracycline in the control of experimental infections in mice. N. A. Kuck, G. S. Redin.-350

129:4 Aug 60

- 8365 A comparison of the in vivo inhibition of brain and liver monoamine oxidase as produced by beta-phenylisopropylhydrazine (PIH) and iproniazid. J. H. Gogerty, A. Horita.----- 357
- 8366 The effects of phenobarbital upon phosphate metabolism of cerebral cortex in vitro. M. M. Cohen, P. J. Heald.----- 361
- 8367 Kinetics of sulfisoxazole acetylation and excretion in humans. E. Nelson, I. O'Reilly.----- 368
- 8368 The role of alcohol dehydrogenase in the metabolism of chloral hydrate. P. J. Friedman, J. R. Cooper.----- 373
- 8369 Inhibition of the renal tubular excretion of N¹-methylnicotinamide (NMN) in the avian kidney by a cyanine dye and by bis-quaternary compounds. R. L. Volle, L. Peters, R. E. Green.---- 377
- 8370 Renal tubular transport relationships between N¹-methylnicotinamide (NMN), mecamlamine, quinine, quinidine and quinacrine in the avian kidney. R. L. Volle, R. E. Green, L. Peters.---- 388
- 8371 Reactivation of neostigmine inhibited human plasma cholinesterase. F. F. Foldes, E. G. Erdos, E. K. Zsigmond, J. A. Zwartz.- 394

REGISTER OF ARTICLES

8372-8381

129:4 Aug 60

8372	Hexafluorenium:Its anticholinesterase and neuromuscular activity. F. F. Foldes, R. E. Molloy, E. K. Zsigmond, J. A. Zwartz.-----	400
8373	Effects of acetylcholine and epinephrine on the contractile strength and action potential of electrically driven guinea pig atria. R. F. Furchgott, W. Sleator, Jr., T. de Gubareff.---	405
8374	The use of the rabbit aorta strip in the analysis of the mode of action of <u>l</u> -epinephrine on vascular smooth muscle.J. A. Bevan-	417
8375	Cyclopropane-epinephrine interaction on the nictitating membrane of the spinal cat.J. S. Gravenstein, E. T. Sherman, T. W. Andersen.-----	428
8376	Effects of several blocking agents on the sympathetic and para- sympathetic postganglionic action potentials.F. Alonso-de Forida, J. Cato, L. Ramirez, E. G. Pardo.-----	433
8377	The uterine relaxant properties of isoxsuprine. P. M. Lish, I. W. Hillyard, K. W. Dungan.-----	438
8378	Measurement of brain excitability by use of hexafluorodiethyl ether(Indoklon). E. B. Truitt, Jr., E. M. Ebersberger, A. S. C. Ling.-----	445
8379	Pentylentetrazol seizure activity in mice as influenced by route of administration, acute adrenalectomy and reserpine. J. M. Little, E. A. Conrad.-----	454
8380	The effect of mescaline on the optic evoked potentials in the unanesthetized rabbit.J. R. Smythies, W. P. Koella, C. K. Levy, J. Czicman.-----	462
8381	Effects of various drugs on the isolation-induced fighting be- havior of male mice. P.A.J. Janssen, A. H. Jageneau, C. J. E. Niemegeers.-----	471

NOTICE

to Subscribers and Readers

Attention is directed to the current method (ACC) of using entry numbers opposite the unit terms and names comprising the Subject and Author sections of the Journal index. These entry numbers coincide with the appropriate accession numbers listed serially at the left of the titles in the Register of Articles. Their purpose is to condense and unify the three parts of the index, and to expedite its use.

For details of the ACC indexing system please see: This Journal, Vol. 122:2, Jan., Vol. 122: N1-2, April, 1958; and Vol. 127: AI 1-2, December, 1959.

The possibility has been considered that additional copies of the index, bound separately, might be of value to libraries and to other subscribers and readers for use in reference work. Such a separate distribution would be justified only if the sale of a significant number of copies could be assured. It is suggested that anyone interested in such separate indexes write a letter to the Publisher who can then determine the feasibility of separate distribution.
