
A series of 2,6-disubstituted phenoxyethyl ammonium bromides with true sympatholytic properties. R. A. McLean, R. J. Geus, R. J. Mohrbacher, P. A. Mattis, G. E. Ullyot.

1,1'-Trimethylene bis(4-formylpyridinium bromide) dioxime (TMB-4) and 2-pyridine aldoxime methiodide (2-PAM) as adjuvants to atropine in the treatment of anticholinesterase poisoning. J. H. Fleischer, H. O. Michel, L. Yates, C. S. Harrison.

A method for the evaluation of depressants of subatrial rhythmic function in the heart of the intact animal. J. Roberts, R. Baer.

Potassium balance of the dog heart: effects of increasing heart rate and of pentobarbital and dihydro-ouabain. T. Brown, G. Grupp, G. H. Acheson.

A characterization of the stimulation of mammalian muscle spindles by succinylcholine. J. C. Brining, C. M. Smith.

A pharmacological comparison of therapeutically useful centrally acting skeletal muscle relaxants. A. P. Roszkowski.

Enzymatic pathway for the formation of cotinine, a major metabolite of nicotine in rabbit liver. H. B. Hucker, J. R. Gillette, B. B. Brodie.

The relative potencies of methohexital and thiopental. J. W. Bellville, P. J. Fennel, T. Murphy, W. S. Howland.

The effect of ouabain on the oxygen consumption, the high energy phosphates and the contractility of the cat papillary muscle. K. S. Lee, D. H. Yu, R. Burstein.

An effect of cardiac glycosides on oxidative phosphorylation by heart mitochondria. K. S. Lee, A. Schwartz, R. Burstein.
Barbiturate metabolism as affected by certain agents acting on the liver. J. M. Fujimoto, K. B. Pearce, G. L. Plaa.-------- 139
The pharmacologic effects of heroin in relationship to its rate of biotransformation. E. L. Way, J. W. Kemp, J. M. Young, D. R. Grassetti.----------------------------- 144
Behavioral determination of time and dose parameters of monoamine oxidase inhibitors. G. A. Heise, E. Boff.------------------------ 155
Human pharmacology and addiction liability of norcodeine. H. F. Fraser, H. Isbell, G. D. Van Horn.----------------------------- 172
Some effects on the central nervous system of gamma-amino-N-butyric acid (GABA) and certain related amino acids administered systemically and intracerebrally to mice. O. D. Gulati, H. C. Stanton.----------------------------- 178
The action of analgetic agents on positive afterpotentials of frog sciatic nerve. W. A. Krivoy.----------------------------- 186
A survey of the effects of isoxsuprine on nonvascular smooth muscle. P. M. Lish, K. W. Dungan, E. L. Peters.----------------------------- 191
Isoproterenol vasomotor reversal by sympathomimetic amines. D. T. Walz, T. Koppanyi, G. D. Maengwyn-Davies, M. L. Joyce.---------------- 200
The mechanism of isoproterenol vasomotor reversal by phenylephrine. D. T. Walz, G. D. Maengwyn-Davies.----------------------------- 208
The adrenal cortical suppressant effect of two triazine analogs in the guinea pig. P. J. Costa, D. D. Bonnycastle.----------------------------- 214
Effect of phenothiazine derivatives on dextran-induced edema. L. Kato, B. Gozay.----------------------------- 231

Effect of trans-2-phenylcyclopropylamine upon norepinephrine concentration and monoamine oxidase activity of rat brain. H. Green, R. W. Erickson.----------------------------- 237
Intracellular distribution of norepinephrine in rat brain. I. Effect of reserpine and the monoamine oxidase inhibitors, trans-2-phenylcyclopropylamine and 1-isonicotinyl-2-isopropyl hydrazine. H. Green, J. L. Sawyer.----------------------------- 243
Evidence that tranquilizing action of reserpine is associated with change in brain serotonin and not in brain norepinephrine. Effects of reserpine, raunescine, benzoquinolizines, dimethylaminobenzoyl methylreserpate, and stress. B. B. Brodie, K. F. Finger, F. B. Orlans, G. P. Quinn, F. Sulser.----------------------------- 250

129:3 July 60

8351 The effects of amphotericin B on yeast metabolism. G. R. Gale.-- 257
8352 Studies on the pharmacology of 6-azauracil. A. D. Welch, R. E.
Handschumacher, J. J. Jaffe.----------------------------- 262
8353 Relation between pharmacologic augmentation of cardiac contract-
ile force and the activation of myocardial glycogen phosphory-
lase. S. E. Mayer, N. C. Moran.-------------------------- 271
8354 The relation between the binding of sulfonamides to albumin and
their antibacterial efficacy. A. H. Anton.---------------- 282
8355 Biochemical and pharmacological studies of dimethylaminoethanol
8356 The physiological disposition of hexamethonium and related com-
ounds. R. R. Levine.------------------------------------- 296
8357 Studies of the contribution of bladder absorption to the physi-
ological changes induced by pentobarbital. J. F. Borzelleca.--- 305
8358 Penetration of brain and brain tumor by aromatic compounds as a
function of molecular substituents. A. H. Soloway, B. Whitman,
J. R. Messer.----------------------------------------- 310
8359 Measurement of the inotropic effects of drugs on the innervated
and noninnervated embryonic chick heart. L. P. McCarty, W. C.
Lee, F. E. Shideman.---------------------------------- 315
8360 Cardiac actions of a series of saturated and unsaturated bis-
trimethylammonium compounds. H. G. Schoepke, F. E. Shideman.-- 322
8361 The effects of a new sympathetic blocking drug (bretylium) on
cardiovascular control. D. M. Aviado, A. H. Dii, J. Duffy.---- 328
8362 Action of cholinergic stimulants on the inferior mesenteric
ganglion of the cat. F. Herr, L. Gyermek.----------------- 338
8363 Bromide and chloride excretion with diuretic agents in animals.
C. M. Kagawa, C. G. Van Arman.------------------------- 343
8364 Comparison of dimethylchlortetracycline with tetracycline in the
control of experimental infections in mice. N. A. Kuck, G. S. Redin. -350

129:4 Aug 60

8365 A comparison of the in vivo inhibition of brain and liver mono-
amine oxidase as produced by beta-phenylisopropylhydrazine
(PiH) and iproniazid. J. H. Gogerty, A. Horita.----------- 357
8366 The effects of phenobarbital upon phosphate metabolism of cere-
bral cortex in vitro. M. M. Cohen, P. J. Heald.---------- 361
8367 Kinetics of sulfisoxazole acetylation and excretion in humans.
E. Nelson, I. O'Reilly.---------------------------------- 368
8368 The role of alcohol dehydrogenase in the metabolism of chloral
hydrate. P. J. Friedman, J. R. Cooper.------------------- 373
8369 Inhibition of the renal tubular excretion of N1-methylnicotin-
amide (NNN) in the avian kidney by a cyanine dye and by bis-
quaternary compounds. R. L. Volle, L. Peters, R. E. Green.--- 377
8370 Renal tubular transport relationships between N1-methylnicotin-
amide (NNN), mecamylamine, quinine, quinidine and quinacrine
in the avian kidney. R. L. Volle, R. E. Green, L. Peters.---- 388
8371 Reactivation of neostigmine inhibited human plasma cholinester-

8378 Measurement of brain excitability by use of hexafluorodiethyl
Ling.----------------------------------------------- 445

8379 Pentylenetetrazol seizure activity in mice as influenced by
route of administration, acute adrenalectomy and reserpine.
J. M. Little, E. A. Conrad.----------------------------- 454

8380 The effect of mescoline on the optic evoked potentials in the
unanesthetized rabbit. J. R. Smythies, W. P. Koella, C. K. Levy,
J. Czicman.------------------------------------------ 462

8381 Effects of various drugs on the isolation-induced fighting be-
Niemegeers.------------------------------------------ 471

NOTICE

to Subscribers and Readers

Attention is directed to the current method (ACC) of using entry numbers
opposite the unit terms and names comprising the Subject and Author sec-
tions of the Journal index. These entry numbers coincide with the appro-
riate accession numbers listed serially at the left of the titles in the
Register of Articles. Their purpose is to condense and unify the three
parts of the index, and to expedite its use.

For details of the ACC indexing system please see: This Journal,
Vol. 122:2, Jan., Vol. 122: N1-2, April, 1958; and Vol. 127: Al 1-2, December,
1959.

The possibility has been considered that additional copies of the index,
bound separately, might be of value to libraries and to other subscribers
and readers for use in reference work. Such a separate distribution would
be justified only if the sale of a significant number of copies could be
assured. It is suggested that anyone interested in such separate indexes
write a letter to the Publisher who can then determine the feasibility
of separate distribution.
