CONTENTS

NUMBER 1, AUGUST, 1910

I. The Action of Drugs on the Salivary Secretion. By V. E. Henderson...... 1
II. Thyreotropic Iodine Compounds. By Reid Hunt and Atherton Seidell 15
III. On Insufflation of the Lungs with Hydrogen; with Carbon Dioxide; and
   with Air. By C. C. Guthrie, F. V. Guthrie and A. H. Ryan ............... 49
IV. The Influence of Intravenous Injections of Sparteine and Adrenalin on
   the Heart of the Dog. By A. Strickler and Moyer S. Fleisher ........... 55
V. In Regard to the Detoxification of Benzoic Acid by Optical Isomers of
   Leucin. By A. H. Koelker and Samuel Amberg.................. 59
VI. On the Toxicology of the Tutu Plant. By William W. Ford .......... 73

NUMBER 2, OCTOBER, 1910

VII. On the Action of Magnesium Sulphate. By S. A. Matthews and Clyde
    Brooks.................................................................................. 87
VIII. On the Efficacy of Antimony-Thioglycollic Acid Compounds in the
     Treatment of Experimental Trypanosomiasis. By L. G. Rowntree and
     John J. Abel........................................................................ 101
IX. Further Observations on the Immunisation of animals to the Poisons
    in Fungi. By William W. Ford............................................. 145
X. Expectorants. By V. E. Henderson and A. H. Taylor................. 153

NUMBER 3, DECEMBER, 1910

XI. In Memoriam. Christian Archibald Herter.......................................................... 165
XII. Tetanic Convulsions in Frogs Produced by Acid Fuchsin, and their
     Relation to the Problem of Inhibition in the Central Nervous System.
     By Henry G. Barbour and John J. Abel.................................... 167
XIII. The Toxicity of Martius Yellow and some Other Aniline Dyes and
      the Entrance of Dyes into Cells. By A. P. Mathews and Elizabeth Long-
      fellow.................................................................................. 201
XIV. Physiological Studies in Anaphylaxis:
      II. Reaction of Smooth Muscle from Guinea-Pigs Rendered Tolerant
           to Large Doses of Serum. By W. H. Schultz...................... 221
XV. The Action of Ether on an Anaerobic Animal Tissue. By Albert P.
    Mathews.............................................................................. 231
XVI. Pharmacological Studies on the Phosphatids:
      I. Methods for the Study of Their Combinations with Drugs and Other
         Substances. By W. Koch................................................. 239
CONTENTS

XVII. II. The Relation of the Phosphatids to the Sodium and Potassium of the Neuron. By W. Koch and F. H. Pike .......................................................... 245

XVIII. III. The Relation of the Phosphatids to Overton and Meyer's Theory of Narcosis. By W. Koch and F. C. McLean ........................................... 249

XIX. IV. The Relation of Brain Phosphatids to Tissue Metabolites. By W. Koch and A. W. Williams .......................................................... 253

XX. V. The Function of the Brain Phosphatids in the Physiological Action of Strychnin. By W. Koch and H. T. Mostrom .................................. 265

NUMBER 4, MARCH, 1911

XXI. Some Observations on the Physiological Action of Sodium Chloride. By Don R. Joseph and S. J. Meltzer .................................................. 271

XXII. The Distribution of Haemolysins, Agglutinins and Poisons in Fungi, Especially the Amanitas, the Entolomas, the Lactarius and the Inocybes. By William W. Ford .................................................. 285

XXIII. The Site of Action of Strychnine in the Spinal Cord. By A. H. Ryan and Hugh McGuigan .......................................................... 319

XXIV. The Control of Strychnine Poisoning by Means of Intratracheal Insufflation and Ether. A Preliminary Communication. By T. S. Githens and S. J. Meltzer .................................................. 357

XXV. The Inhibitory Action of Sodium Chloride upon the Phenomena following the Removal of the Parathyroids in Dogs. A Preliminary Communication. By D. R. Joseph and S. J. Meltzer .................................................. 361

XXVII. Scientific Proceedings of the American Society for Pharmacology and Experimental Therapeutics. Edited by the Secretary, Dr. Reid Hunt .................................................. 391

NUMBER 5, MAY, 1911

XXVIII. An Experimental Study of Camphoric Acid. By George B. Roth .................................................. 405

XXIX. On the Influence of Various Salts upon Tetany following Parathyroidectomy. By Carl Voegtlin and W. G. MacCallum .................................................. 421

XXX. The Rôle of the Portal Circulation of the Liver in Bile Formation and Jaundice. By C. Voegtlin and B. M. Bernheim .................................................. 455

XXXI. Note Concerning the Laxative Properties of the Tribasic Salts of Phenolphthalic Acid. By L. G. Rountree .................................................. 469

NUMBER 6, JULY, 1911

XXXII. Studies on the Circulation in Man: IV. The Influence of Oxygen Inhalation on the Circulation in a Case of Cyanosis. By G. N. Stewart .................................................. 477
XXXIII. Further Data Relating to the Use of Certain Antimonial Compounds in the Treatment of Experimental Trypanosomiasis. By L. G. Rowntree and John J. Abel 

XXXIV. The Liver in its Relation to Anaphylactic Shock. By Carl Voegtlin and B. M. Bernheim 

XXXV. A Study of the Antiseptic and the Pharmacologic Properties of Meta-Cresol Acetate. By Isidor Greenwald 

XXXVI. On the Action of Senecio Alkaloids and the Causation of the Hepatic Cirrhosis of Cattle (Pictou, Molteno, or Winton disease). By Arthur R. Cushny 

XXXVII. On the Properties of Several Species of the Polyporaceae and of a New Variety of Clitocybe, Clitocybe Dealbata Sudorifica, Peck. By William W. Ford and Joseph L. Sherrick 

XXXVIII. Further Study of the Relation of the Adrenals to Pancreatic Activity. By Charles Wallis Edmunds
