

OPTO-VARIMEX

Ultimate Activity Meter and Pattern of Movements Plotter

Measures activity of two groups of animals simultaneously

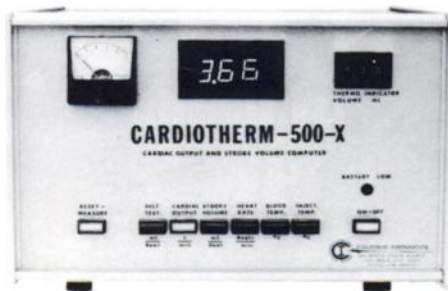

Measures startle response (height of animal jump)

Measures tremors and respiration with proximity sensor

- Measures horizontal activity by interruption of invisible infrared beams criss-crossing animal cage 1" above the bottom.
- Measures rearing and jumping activity by means of two adjustable light curtains.
- Plots pattern of animal movements on X-Y chart recorder by decoding position of animal from interrupted IR beams.
- *Completely* insensitive to urine bedding or feces as IR beams cross the cage 1" above bottom.
- Large 15" x 15" transparent plastic cage — not attached to the instrument.
- Infinitely stable, no tuning, no warm-up. Results can be compared between two units made at different times or located in different countries.
- Silent electronic counters present separate results of horizontal jumping and rearing activity.
- **Applications** For study of:
 1. Pattern of movement modification under narcotics and psychopharmaceuticals.
 2. Eating or drinking habits.
 3. Preference of heat, cold or light environment.
 4. Subtle circadian rhythms and many others.
- Will work with single animal or groups of animals. (Single animal only for pattern plotting).
- Multichannel printing counter available for data recording.

NEW! Stroke Volume and Cardiac Output Computer

- Measures Cardiac Output by Thermodilution (or Dyedilution with optional densitometer).
 - Monitors Heart Rate
 - Calculates Stroke Volume
 - Prints result of measurement (optional)
- Doubles as automatic printing Thermometer and Heart Rate Trend Monitor (prints results in periodic intervals)

Thermodilution Power Injector Model "500"

- Assures consistent and accurate Cardiac Output measurements
- Powered from compressed air, CO₂ bottle or hospital's air system. (no disposable cartridges, one small rechargeable CO₂ bottle lasts for 1000 injections)
- Uses disposable plastic syringes
- Automatically refills syringe via 2-way valve
- Can be ECG synchronized or remotely controlled

Dye Densitometer

for dye dilution measurements with Cardiotherm-500-X Cardiac Output and Stroke Volume Computer.

COLUMBUS INSTRUMENTS INTERNATIONAL CORPORATION

Supplier of individual instruments and total measuring systems

Mailing Address:
950 N. Hague Ave.
Columbus, Ohio 43204 USA

Phone: (614) 488-6176

Cable Address: "COLINSTRUM"

NEW FROM ASM

CURRENT CHEMOTHERAPY

Proceedings of the
10th International
Congress of Chemotherapy,
Zurich, Switzerland,
September 1977

Publication Date: 28 February 1978

This brand new, up-to-the-minute publication represents the most exhaustive compendium of antimicrobial and anticancer chemotherapy knowledge available. Because of the rapidity of publication (a mere five months after the superb Congress was held), it will be an invaluable addition to the library of all scientists and clinicians working in the field. By using extended abstracts of the 26 symposia and 600 communications, the book provides the reader with ready access to a vast body of knowledge about infectious diseases and oncology. With contributors from 65 countries, the perspective is truly international. It is also interdisciplinary,

reflecting the need for ongoing communication among scientists from a wide array of specialties, and the clinicians who will ultimately administer new chemotherapeutic agents.

Thus CURRENT CHEMOTHERAPY will be an extraordinarily useful sourcebook for chemists, biochemists, molecular biologists, microbiologists, enzymologists, immunologists, and pharmacologists, as well as for physicians who treat infectious diseases and cancer patients. It is also an essential acquisition for every medical, hospital, pharmaceutical, and biomedical library.

Bibliographical and Ordering Information

Editors: Walter Siegenthaler, Ruedi Luthy

In two volumes: 1,350 pages; clothbound; fully illustrated ISBN: 0-914826-16-6 Price: \$75.00 for the 2-volume set (Note: Members of ASM may purchase CURRENT CHEMOTHERAPY, for personal use only, for \$30.00 prepaid. Foreign orders must also be prepaid.)

Books Relevant to the Needs of Today's Pharmacologist

DRUG MONITORING

A Requirement for Responsible Drug Use

By Ronald B. Stewart, MS, Leighton E. Cluff, MD, and James R. Philp, MD

The authors have been involved in developing methods and obtaining information from drug monitoring for more than a decade. This practical guide benefits directly from that experience. *Drug Monitoring* will assist in the consideration and establishment of new and different programs in drug monitoring because it illustrates practical methods and systems with the results that can be obtained.

Contents: Public & Community Responsibilities. National & International Responsibilities. Medical Profession Responsibilities. Hospital Responsibilities. Community Pharmacists' Responsibilities. Pharmaceutical Industry's Responsibilities. Academic Responsibilities. Theoretical Aspects of Drug Monitoring. Study of Drug Interactions. Historical Developments in Drug Monitoring. Current Systems of Monitoring. Patient Drug History. Drug Utilization Review. Specific Approaches. Legal Considerations. Data Collection. Computer Systems. Personnel Organization and Costs. Adult & Pediatric Hospital Medical Services. Drug Monitoring in Obstetrics. Adverse Drug Reaction. Drug Utilization and Antibiotic Surveillance. Therapeutic Principles.

CLINICAL PHARMACY AND THERAPEUTICS

By Eric T. Herfindal, PharmD and Joseph L. Hirschman, PharmD

Basic advice for the pharmacist or pharmacologist in the patient-oriented team approach to health care. This volume gives the specialist the necessary tools to render sound therapeutic advice through its practical review of the diagnosis and treatment of those diseases likely to be encountered in team practice.

1975/621 pages / 39 illustrations / 160 tables/\$23.50

PUBLIC HEALTH AND COMMUNITY MEDICINE For the Allied Health Professions Second Edition

By Lloyd E. Burton, PhD and Hugh H. Smith, MD, MPH

The thorough coverage of the first edition has been combined with the result of five years of change in health legislation, research, and management to produce this comprehensive overview of modern health care. Contributory agencies are described and defined with an examination of their relationship to private medicine. An excellent book for every member of today's health care team.

1975/572 pages / 116 illustrations/\$19.75

DRUG INTERACTIONS A Handbook for Clinical Use

By Stanley N. Cohen, MD and Marsha F. Armstrong, MD

Concise, accurate, accessible and clinically relevant information on the physiological consequences of dispensing interacting drugs. The authors demonstrate that although interaction between drugs is often considered to be a contraindication to their concurrent administration, most combinations can be dispensed when appropriate adjustments are made in dosage or method of administration.

1974/358 pages/illustrated/\$20.00
