Volume 208, January–March 1979

- Abstinence syndrome, morphine, rats, effects of antipsychotic and antianxiety drugs, 63
- Acara, M., *see* Koschier, F. J., 287
- Activator, calcium-dependent, of cyclic nucleotide phosphodiesterase, selective binding of antipsychotics and other psychoactive agents to, 454
- Adenosine triphosphatase, catecholamine-sensitive, in mouse brain, effects of acute and continuous morphine treatment, 80
- Adenylate cyclase, ganglionic, stimulation by catecholamines, 31
- Adler, C. H., *see* Klemfuss, H., 91
- Adler, M. W.
see Klemfuss, H., 91
see Baldino, F., Jr., 63
- Adrenal gland
phenylethanolamine N-methyltransferase, effects of SK&F 29661, 24
steroids, indirectly modulating morphine and β -endorphin effects, 176
- Adrenergic mechanisms, dominance in mediating hypotensive drug-induced renin release in conscious rat, 303
- Age, relationship to metabolism and protein binding of digoxin in sheep, 263
- Alkadhi, K., *see* Quenzer, L., 31
- Alloxan, selectivity for β -cells of islets of Langerhans, effect of pH, 184
- Alphaprodine, intravenous, relative potency and duration of action with respect to respiratory depression in man, 73
- Alward, C. T., *see* Bailie, M. D., 298
- γ -Aminobutyric acid, neurons in caudatus, pallidus and nigra, effects of opioids and dopamine agonists, 190
- Aminopyrine N-demethylase, cytochrome P-450-dependent, in rat brain, comparison with hepatic aminopyrine N-demethylation, 271
- d*-Amphetamine, anorexic effect, tolerance to, effect of depletion of brain dopamine by 6-hydroxydopamine, 134
- Analgesia, morphine-induced, differential effects of leucine and methionine enkephalin, 86
- Anesthesia, effect on cardiovascular and renal function in newborn piglet, 298
- Anorexic effect, of *d*-amphetamine and fenfluramine in rats, tolerance to, effect of depletion of brain dopamine by 6-hydroxydopamine, 134
- Antianxiety drugs, effects on morphine abstinence syndrome in rats, 63
- Anticholinergic actions, stereospecific, of enantiomers of CTC, cyproheptadine derivative, 460
- Anticonvulsant drugs, protein binding in serum of dog and man, 429
- Anticonvulsant effects
of benzhydryl piperazines on maximal electroshock seizures in rats, 480
of ropazine in rat, 236
- Antidopaminergic actions, stereospecific, of enantiomers of CTC, cyproheptadine derivative, 460
- Antihypertensive effects, of MK-447, 148
- Antihypertensive treatment, effects on systolic blood pressure and renin experimental hypertension in rats, 310
- Antimeperidine antibodies, specificity and reactivity with opioid peptides, 498
- Antimorphine antibodies, specificity and reactivity with opioid peptides, 498
- Antinociception, mediated by spinal serotonin terminal system, 446
- Antipsychotic drugs
effects on morphine abstinence syndrome in rats, 63
selective binding to calcium-dependent activator of cyclic nucleotide phosphodiesterase, 454
- Antitubulin agent, nocodazole, action on tubulin assembly, axonal ultrastructure and fast axonal transport, 411
- Antitumor activity, of BCNU, CCNU and PCNU, effect of phenobarbital pretreatment, 1
- Aorta, strips, isolated, rabbit, contractile response to unsaturated fatty acid peroxides, 347
- Aqleh, K. A., *see* Kaufman, R. D., 73
- Arbel, E. R. and Glick, G.: Effects of veratrine on the *in situ* dog heart: Evidence for increased ventricular fibrillation threshold, 314
- Arceneaux, J. E. L., *see* Pitt, C. G., 12
- Arrhythmias, ventricular, digitalis-induced, role of forebrain noradrenergic mechanisms, 57
- Arteries, renal, canine, tension and ^{45}Ca fluxes, differing actions of nitroprusside and D-600 on, 155

- Cardiovascular function, in newborn piglet, effect of anesthesia, 298
- Cardiovascular responses, from hindlimb sensory receptors evoked by intra-arterial injection of bradykinin and other chemical agents in rabbit, 319
- Cat(s)
- forebrain noradrenergic mechanisms and digitalis-induced ventricular arrhythmias, 57
 - influences of autonomic nervous system on production of cerebrospinal fluid, 341
 - neuromuscular junction, actions of phenylene diacryloyl bis-cholinium esters, 436
 - spinal serotonin terminal system mediating antinociception, 446
 - tubulin assembly, axonal ultrastructure and fast axoplasmic transport, nocodazole action, 411
- Catecholamine(s)
- sensitive adenosine triphosphatase in mouse brain, effects of acute and continuous morphine treatment, 80
 - tubular secretion and metabolism by rat kidney, 144
 - transmission blockade and stimulation of ganglionic adenylate cyclase by, 31
- β -Cells, islets of Langerhans, Effect of pH on selectivity of alloxan for, 184
- Central nervous system
- noradrenergic mechanisms, role in digitalis-induced ventricular arrhythmias, 57
