

# The Journal of PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS

*A Publication of The American Society  
for Pharmacology and Experimental Therapeutics*

Founded by John J. Abel 1909

**Editor** Eva King Killam

**Assistant Editor** Manfred A. Hollinger

**Editors for  
Specific Fields**

*Analgesia and Drug Abuse*  
Joseph Cochlin

*Autonomic Pharmacology*  
Robert E. Stitzel

*Behavioral Pharmacology*  
Roger T. Kelleher

*Cardiovascular Pharmacology*  
Henry R. Besch, Jr.  
Benedict R. Lucchesi

*Cell Pharmacology*  
Toshio Narahashi  
George B. Weiss

*Chemotherapy*  
H. George Mandel

*Developmental Pharmacology*  
Bernard L. Mirkin

*Drug Metabolism and Disposition*  
Edward Bresnick  
Vincent G. Zannoni

*Gastrointestinal Pharmacology*  
Thomas F. Burks

*Immunopharmacology*  
Sydney Specter

*Neuropharmacology*  
A. James Hance  
Charles O. Rutledge

*Pulmonary Pharmacology*  
Manfred A. Hollinger

*Renal Pharmacology*  
William O. Berndt

*Toxicology*  
Curtis D. Klaassen

## What are the implications of recent advances in cellular and molecular biology for pharmacologists and toxicologists?

### WORKSHOP ON CELLULAR AND MOLECULAR TOXICOLOGY

Edited by **Don Fawcett & James Newberne**

That's the subject addressed in this new book, the product of a symposium organized by the Pharmaceutical Manufacturer's Association Foundation. The **Workshop** brings together leading authorities from cell biology, pharmacology, pathology, and toxicology to consider the implications of recent advances in cellular and molecular biology for you and your colleagues.

The **Workshop** covers the following topics:

- Current concepts of *molecular organization of the cell membrane*... plus surface specialization related to cell-to-cell communication
- *Nature of surface receptors* and their interaction with hormones... plus experimental studies on the induction of acetylcholine receptors on muscle
- *Membrane systems of the cytoplasm*, including their role in detoxification & metabolism of drugs... along with changes in these functions with advancing age
- *Important section on the nucleus*... includes recent progress in defining the structure of chromatin, mechanisms of DNA damage and repair, nature of interaction between steroid hormones and the nucleus
- Discussion of relative advantages of *microbial methods and sister chromatid exchange in mammalian cells for the assessment and mutagenicity of drugs and environmental toxins*... plus methods of protection against the mutagenic effect of certain drugs
- Section on *lysosomes and their destabilization by drugs*... plus approaches to the treatment of lysosomal disease

Now the results of this unique study are available to you in a hardbound overprint from *Pharmacological Reviews*. If you want the latest information on advances in toxicology, this is one meeting you can't afford to miss.

**1980/300 pages/92 illustrations/\$20.00 [U.S.] (#3047-7)**

## Handy manual highlights most frequently used drugs

### MANUAL OF CLINICAL PHARMACOLOGY

Edited by **David H. Robertson, MD**, Assistant Professor of Medicine and Pharmacology, Vanderbilt University School of Medicine, and **Craig R. Smith, MD**, Acting Director, Division of Internal Medicine, The Johns Hopkins University School of Medicine

A handy new manual supplements the large, more unwieldy references that are probably already part of your library. It gives you the most thorough understanding possible of the several dozen *key drugs* that are most commonly used in clinical practice. An annotated bibliography on these drugs is supplied as a point of access to the more detailed pharmacological literature. The discussion sections aren't intended to be complete reviews... but they *identify for you quickly which drugs are practical... or difficult... or new*.

This manual will supplement your knowledge of the many thousands of drugs on the market by giving you a very thorough understanding of the few dozen drugs that are most frequently used, highlighting those areas that are most important to you.

**1981/about 250 pages/about \$18.00 [U.S.] (#7300-1)**

### RETURN THIS COUPON TO GET YOUR NEW BOOKS ON 20-DAY FREE TRIAL

SEND ME \_\_\_\_\_ copies of Fawcett & Newberne's **WORKSHOP ON CELLULAR AND MOLECULAR TOXICOLOGY** (#3047-7) at \$20.00 per copy [U.S. price].

AND send me \_\_\_\_\_ copies of Robertson & Smith's **MANUAL OF CLINICAL PHARMACOLOGY** (#7300-1) at about \$18.00 per copy [U.S. price].

- Send me these books to examine for 20 days without obligation.**

# KEEPING CURRENT

## ♦ ♦ ♦ is it important to you?

Three journals that guarantee you'll be told what's happening NOW in pharmacology, physiology, and biochemistry.

### PHARMACOLOGICAL REVIEWS

An Official Publication of the American Society for Pharmacology and Experimental Therapeutics, Inc.

Editor: Paul L. Munson, Ph.D., School of Medicine, University of North Carolina

*Pharmacological Reviews* is a showcase journal for ideas that would otherwise be buried in the mass of pharmacological literature. Important review papers on the current status of a given topic are allotted plenty of space (from 10 to 40 pages) to exhaustively cover that topic. A fine balance is achieved in these articles, which are written in a clear, simple and concise fashion so as to be intelligible to non-specialists, yet are precise and detailed enough to be of great interest to experts in the field.

At various times, *Pharmacological Reviews* has addressed such subjects as biochemical and cellular pharmacology, drug metabolism and disposition, renal pharmacology, neuropharmacology, behavioral pharmacology, clinical pharmacology, and toxicology. Designed specifically as a medium through which those interested in these topics can communicate directly, *Pharmacological Reviews* serves the entire pharmacological community and is vital reading for physiologists, pharmacologists, and biological chemists.

### THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS

An Official Publication of the American Society for Pharmacology and Experimental Therapeutics, Inc.

Editor: Eva King Killam, Ph.D., School of Medicine, University of California at Davis

Founded by John J. Abel in 1909, this is one of the oldest and most prestigious journals in scientific research. Publishing original articles on all aspects of the interactions of chemical and biological systems by some of the best known authors in the field, *The Journal of Pharmacology and Experimental Therapeutics* is practically a necessity for the specialist in either research or applied physiology.

You'll find full coverage of the biochemical and cellular aspects of pharmacology; renal, pulmonary, gastrointestinal, and cardiovascular pharmacology; drug metabolism and disposition, analgesia and drug abuse, and toxicology; autonomic pharmacology; behavioral effects; and, finally, chemotherapy and immunopharmacology. Each issue of this monthly periodical averages over 200 pages and presents the very best in research for the physiologist and pharmacologist.

### DRUG METABOLISM AND DISPOSITION: the biological fate of chemicals

An Official Publication of the American Society for Pharmacology and Experimental Therapeutics, Inc.

Editor: Kenneth C. Leibman, Ph.D., University of Florida Medical School

The clinical, academic, or research professional will find *Drug Metabolism and Disposition* an essential medium for the rapid communication of research findings in this field. The journal reports on the fate of drugs, toxicants, and environmental and industrial chemicals *in vivo* and *in vitro*. Specific areas of interest include pathways and mechanisms of absorption, distribution, metabolism, and excretion of foreign compounds; relationships between chemical and physical properties of compounds and their metabolism and disposition; biological and pharmacological control of these variables, and methodology for their study. Research reports and documentation, comments on current literature, and letters to the editor, previews, and announcements of interest to you round out this journal.

Please enter my new subscription to the journals checked below. (I understand that payment must be received before my subscription can begin.)

#### Pharmacological Reviews (quarterly)

- Personal: \$20.00/yr.
- Institutional: \$25.00/yr.
- In-training: \$14.00/yr.
- Foreign: add \$5.00/yr.

#### The Journal of Pharmacology and Experimental Therapeutics (monthly)

- Personal: \$100.00/yr.
- Institutional: \$120.00/yr.
- Foreign: add \$20.00/yr.

#### Drug Metabolism and Disposition: the biological fate of chemicals (bimonthly)

- Personal: \$40.00/yr.
- Institutional: \$58.00/yr.
- Foreign: add \$5.00/yr.

(In-training rates apply to residents, fellows, interns, and students. When requesting this rate, which is limited to three years, please give training status and name of institution.)

Members of the American Society for Pharmacology and Experimental Therapeutics should order subscriptions to the official society journals through the American Society for Pharmacology and Experimental Therapeutics, 9650 Rockville Pike, Bethesda, MD 20014
