Manual Of Clinical Pharmacology

Edited by **David Robertson, MD**, and
Craig R. Smith, MD

It is well known that a core armamentarium of several dozen key drugs will suffice for the vast majority of clinical situations. This handy new manual gives you the most thorough understanding possible of the drugs commonly used in clinical practice, and supplies an annotated bibliography on these drugs as a point of access to the more detailed pharmacological literature. The discussion sections are not intended to be complete reviews. They are provided to quickly identify drugs which are *practical, difficult, or new*. You have to have some knowledge of all of the thousands of drugs on the market . . . but you should have a very thorough understanding of the few dozen drugs that are most frequently used. This little book highlights those areas that are truly most important to you.

Contents: Antibiotics. Antihypertensives. Antiarrhythmics and cardiovascular drugs. Diuretics. Drugs affecting neurotransmission. Anticoagulants. Analgesics. Drugs affecting the central nervous system. Oncologic agents. Drugs affecting the endocrine system. Miscellaneous. Index.

Practical Clinical Psychopharmacology Second Edition

William S. Appleton, MD and **John M. Davis, MD**

"The authors, who possess impeccable credentials, have put together a handbook that is reliable, responsible, judicious, careful, and practical."

— from a review of the *First Edition* in
Modern Medicine

The authors call their book "a practical guide based on solid science." You will find it to be an indispensable manual of the latest clinical applications of psychopharmacology.

This new *Second Edition* distills the essential information from more than 15,000 published articles. It succinctly covers the diverse aspects of psychopharmacology and deals with the major categories of useful pharmacotherapeutic agents. **Practical Clinical Psychopharmacology** will provide you with all the latest information so you can prescribe psychotropic drugs rationally and counter side-effects efficiently.

Contents: Before drug therapy begins. Choosing an antipsychotic. Principles of prescribing antipsychotics. Pharmacological treatment for mood (affective) disorders. Anti-anxiety agents: adjuncts to psychotherapy. Medical emergency: overdose. Index.
