

The Journal of PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS

VOLUME 224
JANUARY 1983
NUMBER 1

CONTENTS

Decreased <i>Beta</i> Adrenergic Receptor Density on Human Lymphocytes after Chronic Treatment with Agonists. Ralph D. Aarons, Alan S. Nies, John G. Gerber and Perry B. Molinoff	1
U-50,488: A Selective and Structurally Novel Non-Mu (<i>Kappa</i>) Opioid Agonist. P. F. VonVoigtlander, R. A. Lahti and J. H. Ludens	7
Withdrawal Tolerance and Unidirectional Non-Cross-Tolerance in Narcotic Pellet-Implanted Mice. David G. Lange, Sandra C. Roerig, James M. Fujimoto and Louis W. Busse	13
Effect of Yohimbine on Rat Prolactin Secretion. Herbert Y. Meltzer, Miljana Simonovic and Gary A. Gudelsky	21
Single-Pass Removal of [¹⁴ C]-5-Hydroxytryptamine and [³ H]Norepinephrine by Rabbit Lung, <i>in Vivo</i> : Kinetics and Sites of Removal. John D. Catravas and C. Norman Gillis	28
Tolerance to <i>d</i> -Amphetamine and Lack of Cross-Tolerance to Other Drugs in Rats under a Multiple Schedule of Food Presentation. M. J. Brocco and D. E. McMillan	34
Pharmacological Characterization of Purinergic Receptors in the Rat Vas Deferens. David A. Taylor, Sylvia Wiese, Elizabeth P. Faison and George G. Yarbrough	40
Vascular Effects of the Stereoisomers of Dobutamine. Robert R. Ruffolo, Jr. and Emily L. Yaden	46
Inhibition of Tail-Flick and Shaking Responses by Intrathecal and Intraventricular D-Ala ² -D-Leu ⁵ -Enkephalin and β -Endorphin in Anesthetized Rats. Liang-Fu Tseng, Stephen S. Cheng and James M. Fujimoto	51
Interactions of Phenobarbital with Propranolol in the Dog: 2. Bioavailability, Metabolism and Pharmacokinetics. Van T. Vu, Stephen A. Bai and Fred P. Abramson	55
Interaction of Phenobarbital with Propranolol in the Dog: 3. <i>Beta</i> Blockade. Stephen A. Bai and Fred P. Abramson	62
Effects of Trifluoperazine on Renin Secretion of Rat Kidney Slices. Paul C. Churchill and Monique C. Churchill	68
Role of Protein Binding in Cocaine-Induced Hepatic Necrosis. Michael A. Evans	73
Differential-Reinforcement of Low-Rate 72-Second Schedule: Selective Effects of Antidepressant Drugs. James M. O'Donnell and Lewis S. Seiden	80
A <i>Kappa</i> Opioid Effect: Increased Urination in the Rat. J. David Leander	89
Further Characterization of the Three-Choice Morphine, Cyclazocine and Saline Discrimination Paradigm: Opioids with Agonist and Antagonist Properties. Jason M. White and Stephen G. Holtzman	95
Effects of Nitroprusside and 8-Bromo-cyclic GMP on the Contractile Activity of the Rat Aorta. Thomas M. Lincoln	100
⁴⁵ Ca Fluxes in Isolated Toad Bladder Epithelial Cells: Effects of Agents which Alter Water or Sodium Transport. Ronald M. Burch and Perry V. Halushka	108
N-Ethylmaleimide-Induced Alteration in the Interaction of Agonists with Muscarinic Cholinergic Receptors of Rat Brain. Stephen J. Korn, Michael W. Martin and T. Kendall Harden	118
Behavioral Effects of Clozapine: Comparison with Thioridazine, Chlorpromazine, Haloperidol and Chlordiazepoxide in Squirrel Monkeys. R. D. Spealman, R. T. Kelleher, S. R. Goldberg, J. DeWeese and D. M. Goldberg	127
Botulinum Neurotoxin Type E: Studies on Mechanism of Action and on Structure-Activity Relationships. Lance L. Simpson and Bibhuti R. DasGupta	135
Factors Influencing the Efflux of Hepatic Glutathione into Bile in Rats. Neil Kaplowitz, David E. Eberle, John Petrini, James Touloukian, Morrow C. Corvasce and John Kuhlenkamp	141
Pharmacological Analysis of Shaking Behavior Induced by Enkephalins, Thyrotropin-Releasing Hormone or Serotonin in Rats: Evidence for Different Mechanisms. Eugene G. Drust and John D. Connor	148

Contents Continued on iv

The Effects of Photoperiod on the Responses of the Hamster Vas Deferens to Nerve Stimulation. A. Johns, R. W. Steger and A. Bartke	155
RDS-127 (2-di-n-Propylamino-4,7-Dimethoxyindane): Central Effects of a New Dopamine Receptor Agonist. Stephen P. Arnerić, John P. Long, Michael Williams, David B. Goodale, James Mott, Joan M. Lakoski and Gerald F. Gebhart	161
A Comparison of Some of the Pharmacological Properties of Etintidine, a New Histamine H₂-Receptor Antagonist, with Those of Cimetidine, Ranitidine and Tiotidine. Robert L. Cavanagh, Jeffrey J. Usakewicz and Joseph P. Buyniski	171
Disposition of Caffeine and Its Metabolites in Man. D. Dan-Shya Tang-Liu, Roger L. Williams and Sidney Riegelman	180
Characterization of Adrenergic Receptor Binding in Rat Lung: Physiological Regulation. Jamshid Latifpour and David B. Bylund	186
Interactions of Salsolinol and Its Mono-O-Methylated Analogs with Adrenergic and Dopaminergic Receptors in the Rabbit Ear Artery. Sharon Herbert Nelson and Odd S. Steinsland	193
Relative Potency of Dopamine Agonists on Autoreceptor Function in Various Brain Regions of the Rat. Thomas C. Westfall, Linda Naes and Carol Paul	199
Antihypertensive Activity of LY141865, a Selective Presynaptic Dopamine Receptor Agonist. Richard A. Hahn, Brian R. MacDonald and Marilyn A. Martin	206
Use of Selective Antagonists for Determining the Types of Receptors Mediating the Actions of 5-Hydroxytryptamine and Tryptamine in the Isolated Rabbit Aorta. Jay S. Stollak and Robert F. Furchgott	215
Alpha and Beta Adrenoceptor Blockade in Normotensive and Deoxycorticosterone (DOC)-Hypertensive Rats; Plasma Vasopressin and Vasopressin Pressor Effect. M. Burnier, J. Biollaz, D. B. Brunner, H. Gavras and H. R. Brunner	222
The Effects of a Beta-2 Selective Adrenergic Receptor Antagonist (ICI 118,551) on Twitch Tension in Cat Soleus Muscle. Howard J. Smith, Sharon E. Halliday and William Rouse	228
Postjunctional Supersensitivity of the Smooth Muscle of the Rat Vas Deferens Induced by Calmodulin-Antagonizing Drugs Applied Locally to the Hypogastric Plexus. Katsutoshi Goto	231
Inhibition of Ouabain-Induced Increase in Na Content of Cultured Myocardial Cells by Quinidine and Procainamide. Kiyota Goshima and Shigeo Wakabayashi	239
Baroreflex Sensitivity as a Determinant of Responses to Hydralazine in Dogs. Horacio Vidrio	247
Covalent Binding of Metabolites of 4-Ipomeanol to Rabbit Pulmonary and Hepatic Microsomal Proteins and to the Enzymes of the Pulmonary Cytochrome P-450-Dependent Monooxygenase System. Shelley R. Slaughter, Charles N. Statham, Richard M. Philpot and Michael R. Boyd	252

AUTHOR INDEX

Aarons, R. D., 1	Evans, M. A., 73	Lange, D. G., 13	Simonovic, M., 21
Abramson, F. P., 55, 62	Faison, E. P., 40	Latifpour, J., 186	Simpson, L. L., 135
Arnerić, S. P., 161	Fujimoto, J. M., 13, 51	Leander, J. D., 89	Slaughter, S. R., 252
Bai, S. A., 55, 62	Furchgott, R. F., 215	Lincoln, T. M., 100	Smith, H. J., 228
Bartke, A., 155	Gavras, H., 222	Long, J. P., 161	Spealman, R. D., 127
Biollaz, J., 222	Gebhart, G. F., 161	Ludens, J. H., 7	Statham, C. N., 252
Boyd, M. R., 252	Gerber, J. G., 1	MacDonald, B. R., 206	Steger, R. W., 155
Brocco, M. J., 34	Gillis, C. N., 28	Martin, M. A., 206	Steinsland, O. S., 193
Brunner, D. B., 222	Goldberg, D. M., 127	Martin, M. W., 118	Stollak, J. S., 215
Brunner, H. R., 222	Goldberg, S. R., 127	McMillan, D. E., 34	Tang-Liu, D. D.-S., 180
Burch, R. M., 108	Goodale, D. B., 161	Meltzer, H. Y., 21	Taylor, D. A., 40
Burnier, M., 222	Goshima, K., 239	Molinoff, P. B., 1	Touloukian, J., 141
Busse, L. W., 13	Goto, K., 231	Mott, J., 161	Tseng, L.-F., 51
Buyniski, J. P., 171	Gudelsky, G. A., 21	Naes, L., 199	Usakewicz, J. J., 171
Bylund, D. B., 186	Hahn, R. A., 206	Nelson, S. H., 193	Vidrio, H., 247
Catrasvas, J. D., 28	Halliday, S. E., 228	Nies, A. S., 1	Vu, V. T., 55
