O₂ CONSUMPTION MONITOR

Simultaneously Monitors Oxygen Consumption of 1 to 8 Animals

FEATURES

- One controller for 1 to 8 animal cages
- Continuous measurement of Oxygen Consumption over a 24 hour period in ml oxygen/kg of body weight/hour in STP units.
- Printer prints results every four (4) minutes for each of 1 to 8 animals as well as oxygen percent level in each animal cage
- System adaptable to small or large animals
- Continuous airflow through system with oxygen level measurements at the output and input
- High accuracy, >98% of full measuring range e.g. typical error ± 30 ml oxygen/kg/hour in 3000 ml oxygen/kg/hour range
- User adjustable alarm warns user of possible hypoxia
- Reuseable absorbants
- Auto reference assures high accuracy, system periodically measures ambient air and corrects itself
- Optional RS-232 interface for communication with other computers
- Insensitive to temperature variations in the animal cage.

Columbus Instruments also supplies monitors for: Animal Activity, Cardiac Output, Drinking and Feeding, Respiration Rate and Startle Response.

For more information, call or write to:

COLUMBUS INSTRUMENTS INTERNATIONAL CORPORATION

Supplier of individual instruments and total measuring systems

950 N. HAGUE AVE., COLUMBUS, OHIO 43204 U.S.A.

PHONE: (614) 488-6178

TELEX: 248514

RATS!!! CARDIAC OUTPUT BY THERMODILUTION

"CARDIOMAX-II-R" is the only computer which can measure cardiac output of rats (also guinea pigs, rabbits, dogs, chickens, horses and humans). For rats, it uses unique Columbus Instruments thermodilution microprobes 1/3 mm in size!

It also measures systolic, diastolic and mean blood pressures and heart rate up to 1000 beats per minute. Stroke volume is also automatically computed.

Why Measure Cardiac Output of Rats?

Development of salt sensitive and salt resistive strains of rats provided inexpensive models for studying hypertension. Dynamics of rat circulatory system is similar to dogs or humans. Studies on rats cost only a fraction of studies using dogs.

Automatic Measurements Without Supervision

All parameters (cardiac output, stroke volume, three blood pressures, blood temperature, heart rate, time of day) can automatically be measured periodically and printed when using "Cardiomax-II-R" with Columbus Instruments Automatic Injector and Printer.

For more information, call or write to:
