INFORMATION TO SUBSCRIBERS

THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS is issued monthly. Four volumes are published each year. Each volume contains three numbers.

Correspondence concerning business matters should be addressed to The Williams & Wilkins Company, Publishers of Books and Periodicals in Medicine and the Allied Sciences, 428 East Preston St., Baltimore, Maryland 21202 U.S.A.

Annual Subscription Rates—U. S. A. AND POSSESSIONS: personal, \$140.00; institutional, \$185.00; single copy, \$14.00. FOREIGN: personal, \$165.00; institutional, \$210.00; single copy, \$17.00. Institutional (multiple reader) rate applies to libraries, schools, hospitals, clinics, group practices, and federal, commercial, and private institutions and organizations.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the January or July issue.

To avoid a break in your series, subscriptions should be renewed promptly. The publisher cannot guarantee to supply back issues on belated renewals.

Reprints of individual articles are available *only* from authors.

Microfilm. For availability, inquire of The Williams & Wilkins Company.

Japanese Yen price is available from our sole agent: U.S.-Asiatic Co. Ltd., 13-12 Shimbashi 1-Chome, Minato-Ku, Tokyo 105, Japan, telephone 03-502-6471.

IT TOOK US 20 YEARS TO GET THE DIAGNOSTIC RESULTS WE WANTED. IT'LL ONLY TAKE YOU 10 DAYS.

Waiting up to 4 weeks for diagnostic results could be the end of your experiment. Fortunately, you have an alternative.

It's Charles River Biotechnical Services, Inc.

A newly formed subsidiary of Charles River Breeding Laboratories, Inc., CRBS functions independently and professionally in its diagnostic operations, servicing the biomedical research community at large as well as its parent company.

FAST RESULTS CAN'T HAPPEN OVERNIGHT.

It took 20 years of supporting the world's leading breeder of laboratory animals to get where we are today. But it's this experience that now allows us to guarantee we'll put the written results from your samples in the mail to you within 10 working days of receipt.

Or phone results within 5 working days, if you use our priority service.

UNCOVERING THE MEANING BEHIND THE RESULTS.

Getting accurate results is every researcher's prime concern. However, it's equally important for researchers to understand the results they get.

CRBS is in a unique position to provide this important information when required. First of all, we have the laboratory experience. Each year we perform over 250,000 serological

and bacteriological tests with unmatched accuracy.

Whether you require our Assessment Profile or Tracking Profiles, we'll execute them for you. Fast and accurately.

But most significantly, only CRBS goes well beyond laboratory procedures. Our unequaled staff of professionals can assist you with interpretation and evaluation of results as well. In virology, immunology, bacteriology, parasitology, pathology and laboratory animal medicine.

PROTECTING YOUR EXPERIMENT'S FUTURE WITH GENETIC MONITORING.

At CRBS, we believe it's vital to learn the genetic integrity of your mice both before and during your experiment. That's why we also offer you genetic monitoring of inbred, hybrid, and congenic mice.

Through use of electrophoretic technology, we can determine the appropriate biochemical markers of the strains used today.

In addition to this, we provide genetic monitoring with immunogenetic markers, including H-2, Lyb-2, Lyt-1, Lyt-2, Thy-1 and Tla.

So if you're looking for results with complete accuracy and without unnecessary waiting, come to CRBS. Because we don't think you should have to experiment with providers of diagnostic services.
