

The Journal of PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS

CONTENTS

| | |
|--|-----|
| Direct Effect of Parathyroid Hormone on Rat Uterine Contraction. Ronald L. Shew, John A. Yee and Peter K. T. Pang | 1 |
| Ethanol Suppresses Hepatic Glutathione Synthesis in Rats <i>in Vivo</i>. Bernhard H. Lauterburg, Stephen Davies and Jerry R. Mitchell | 7 |
| Efficacy and Mechanism of Action of Sodium Bicarbonate in the Treatment of Desipramine Toxicity in Rats. Paul Pentel and Neal Benowitz | 12 |
| Phencyclidine Analogs and Precursors: Rotarod and Lethal Dose Studies in the Mouse. D. B. Vaupel, Donald McCoun and Edward J. Cone | 20 |
| Stereoselective Metabolism and Pharmacogenetic Control of 5-Phenyl-5-Ethylhydantoin (Nirvanol) in Humans. A. Küpfer, R. Patwardhan, S. Ward, S. Schenker, R. Preisig and R. A. Branch | 28 |
| Endogenous GABAergic Mechanisms in the Medulla and the Regulation of Blood Pressure. Robert N. Willette, Peter P. Barcas, Abbott J. Krieger and Hreday N. Sapru | 34 |
| Comparison of the Effects of Naloxone and Picrotoxin on Schedule-Controlled Responding in the Pigeon: Possible GABA-Antagonistic Effects of Naloxone. Richard B. Carter and J. David Leander | 40 |
| Discriminative Stimulus Properties of Lergotrile. K. A. Cunningham, P. M. Callahan and J. B. Appel | 47 |
| Obligatory Role of Thyroid Hormones in Development of Peripheral Sympathetic and Central Nervous System Catecholaminergic Neurons: Effects of Propylthiouracil-Induced Hypothyroidism on Transmitter Levels, Turnover and Release. Theodore A. Slotkin and Ruta J. Slepetic | 53 |
| Effects of Enantiomers of Indacrinone (MK-196) on Cation Transport by the Loop of Henle and Distal Tubule Studied by Microperfusion <i>in Vivo</i>. Michael J. Field, Nicole Fowler and Gerhard H. Giebisch | 62 |
| Effects of Amine Pretreatment on Ketamine Catatonia in Pinealectomized or Hypophysectomized Animals. W. D. Winters, J. P. Petit, M. L. Lakin and C. H. Miller | 69 |
| Excitable Channel Currents and Gating Times in the Presence of Anticonvulsants Ethosuximide and Valproate. J. F. Fohlmeister, W. J. Adelman, Jr. and J. J. Brennan | 75 |
| Multiple Actions of Convulsant Barbiturates on Mouse Neurons in Cell Culture. John H. Skerritt and Robert L. Macdonald | 82 |
| Dose-Dependent Bioavailability and Metabolism of Salicylamide in Dogs. James A. Waschek, Gerald M. Rubin, Thomas N. Tozer, Robert M. Fielding, William R. Couet, David J. Effeney and Susan M. Pond | 89 |
| Antagonism by Antidepressants of Neurotransmitter Receptors of Normal Human Brain <i>in Vitro</i>. Elliott Richelson and Albert Nelson | 94 |
| Calcium Entry Blocker Activity of Cyproheptadine in Isolated Cardiovascular Preparation. Raymond J. Winquist, Peter K. S. Siegl, Elizabeth P. Baskin, Dennis L. Bohn, George Morgan and Audrey A. Wallace | 103 |
| <i>In Vivo</i> Evidence for Benzomorphan-Selective Receptors in Rats. Debra E. Gmerek and Alan Cowan | 110 |
| Specific Binding of a ¹²⁵I-Labeled Substance P Analog to Rat Submaxillary Gland. Suleiman W. Bahouth, John M. Stewart and José M. Musacchio | 116 |
| Molecular Basis for the Cardiovascular Activities of Amrinone and AR-L57. J. Scott Hayes, Nancy Bowling, George B. Boder and Raymond Kauffman | 124 |
| Concentration-Time Course of Niridazole and Six Metabolites in the Serum of Four Filipinos with <i>Schistosoma japonicum</i> Infection. Cynthia I. Valencia, Brian A. Catto, Edward H. Fairchild, S. Brian Wilson, Nelia C. Maramba and Leslie T. Webster, Jr. | 133 |
| Effects of Calcium Antagonists and Vasodilators on Arterial Myosin Phosphorylation and Actin-Myosin Interactions. Paul J. Silver, John Dachiw and Joan M. Ambrose | 141 |
| Alpha-2 Adrenoceptors Modulate [³H]Dopamine Release from Rabbit Retina. Margarita L. Dubocovich | 149 |

Contents Continued on iv

| | |
|---|-----|
| Determination of the Active Form of Phenytoin. Robert S. Morello, Ted Begenisich and Jay Z. Yeh | 156 |
| Kinetic Characterization of the Rabbit Aorta Contractile Response to an <i>Alpha</i> Adrenergic Agonist. Robert N. Cory, Roman Osman and Saul Maayani | 162 |
| Inhibition of Catecholamine Transport into Chromaffin Granule "Ghosts" Isolated from Bovine Adrenal Glands by Phenytoin. Jean D. Deupree, David A. Downs, James E. Laposky and Jeri J. Hitchcock | 171 |
| Inhibition of Immunoglobulin, But Not Polypeptide Base-Stimulated Release of Histamine and Arachidonic Acid by Anti-Inflammatory Steroids. Ann S. Heiman and Fulton T. Crews | 175 |
| Beta Adrenoceptor Mediation of the Enhancing Effect of Norepinephrine on the Murine Primary Antibody Response <i>in Vitro</i>. Virginia M. Sanders and Albert E. Munson | 183 |
| Agonist and Antagonist Effects of Prototype Opiate Drugs in Rats Discriminating Fentanyl from Saline: Characteristics of Partial Generalization. Francis C. Colpaert and Paul A. J. Janssen | 193 |
| Receptor Preference of Dynorphin A Fragments in the Mouse Vas Deferens Determined by Different Techniques. Rüdiger Schulz, Michael Wüster and Albert Herz | 200 |
| Interaction of Atenolol with the Systemic and Regional Hemodynamic Effects of Hydralazine in Conscious Renal Hypertensive Rabbits. Gert R. Bolt and Pramod R. Saxena | 205 |
| Decreased Nutrient Blood Flow During Dopamine- and Epinephrine-Induced Intestinal Vasodilation. G. D. Giraud and K. L. MacCannell | 214 |
| Effect of Erythrosin B on Hyperpolarizing Responses to Catecholamines in Amphibian Sympathetic Ganglia. Peter A. Smith, Kochu-Rani Dombro and Jeffrey Zidichouski | 221 |
| Interplay of <i>Alpha</i>-2 and <i>Beta</i> Adrenoceptors in the Control of Free Fatty Acid Release from Bone Marrow Adipose Tissue. Marie-Antoinette Tran, Dang Tran Lac, Michel Berlan and Max Lafontan | 228 |
| Central Cardiovascular Effects of <i>Alpha</i> Adrenergic Drugs: Differences between Catecholamines and Imidazolines. P. Bousquet, J. Feldman and J. Schwartz | 232 |
| Diisopropylfluorophosphate Increases Clofibrilic Acid Clearance: Supporting Evidence for a Futile Cycle. B. J. Rowe and P. J. Meffin | 237 |
| Cardiac Autonomic Receptors: Effect of Long-Term Experimental Diabetes. Jamshid Latifpour and John H. McNeill .. | 242 |
| Kinetics of ¹¹C-Labeled Opiates in the Brain of Rhesus Monkeys. Per Hartvig, Kjell Bergström, Bo Lindberg, Per Olov Lundberg, Hans Lundqvist, Bengt Långström, Hans Svärd and Anders Rane | 250 |
| Separate Influences of Insulin and Hyperglycemia on Hepatic Drug Metabolism in Mice with Genetic and Chemically Induced Diabetes Mellitus. R. G. Knodell, B. S. Handwerger, J. E. Morley, A. S. Levine and D. M. Brown | 256 |
