

“Already required reading for anybody who seriously considers [himself] to be a neuroscientist.”

Nature

THE JOURNAL OF NEUROSCIENCE

The Official Journal of the Society for Neuroscience

Editor-in-Chief:

W. Maxwell Cowan, MD, PhD

Neuroscience is the most rapidly growing branch of biological science. And you'll find this dynamic energy reflected in **The Journal of Neuroscience**... a dependable source for the latest trends and discoveries within your field.

The Journal is interdisciplinary, bringing together findings in all areas of neuroscience, molecular to clinical. So it mirrors the objectives and scope of the Society for Neuroscience and the societies in Europe and Japan. The five areas covered by **The Journal** are molecular neuroscience, cellular neuroscience, developmental neuroscience, behavioral neuroscience, and neural systems.

Published monthly

Nature gave **The Journal of Neuroscience** high marks for its quality and stature in the field:

“Although the number of new journals one encounters in the library each year seems staggering, it is fair to say that many of these never amount to much. JN is an exception. It has rapidly become a major publication in neurobiology, one to rival the established *Brain Research* and *Neuroscience*...”

“High scientific standards have been ensured by having an editorial advisory board that reads like a *Who's Who* in neurobiology.

“It is quite clear from an examination of the journal over the past year that major workers in each of these fields are using the journal for the publication of their best work.

“JN is highly recommended; I am sure it will flourish.”

ORDER FREE BY PHONE.... Just call 1-800-638-6423 from anywhere in the US except AK and HI. In MD call 528-4105 collect.

In Japan, please contact USACO to start your subscription: USACO; 13-12, Shimbashi 1-chome, Minato-ku, Tokyo, 105, JAPAN.

An important resource for everyone
involved in research on the
metabolism of drugs and chemicals

DRUG METABOLISM AND DISPOSITION

The Biological Fate of Chemicals

Editor: **Vincent G. Zannoni, PhD**, University of Michigan,
Ann Arbor, Michigan

DRUG METABOLISM AND DISPOSITION publishes *in vitro*
and *in vivo* experimental results that bring readers significant
and original information on xenobiotic metabolism and
disposition, including metabolism of all pharmacologic agents
or drugs and environmental chemicals, reactants, and preser-
vatives. All papers are referred to ensure a high standard of
publication. The areas covered are:

- pharmacokinetics
- pharmacodynamics
- genetic, nutritional, and hormonal factors affecting the
biological fate of chemicals
- toxicological consequences of xenobiotic metabolism

This journal should be a standard reference in all pharmacology
and toxicology departments. It is also a valuable resource for all
medicinal chemists involved in designing drugs and all bio-
chemists involved with drug metabolism.
