

CONTENTS

Role of Dopamine in the Neurotoxic Effects of Methamphetamine. Christopher J. Schmidt, Joseph K. Ritter, Patricia K. Sonsalla, Glen R. Hanson and James W. Gibb	539
Chronic Stress, Aging and Morphine Analgesia: Chronic Stress Affects the Reactivity to Morphine in Young Mature but not Old Rats. Maria-Nadia Girardot and Frank A. Holloway	545
Behavioral Studies with Anxiolytic Drugs. I. Interactions of the Benzodiazepine Antagonist Ro 15-1788 with Chlordiazepoxide, Pentobarbital and Ethanol. James E. Barrett, Linda S. Brady and Jeffrey M. Witkin	554
Differences in Responsiveness of Intrapulmonary Artery and Vein to Arachidonic Acid: Mechanism of Arterial Relaxation Involves Cyclic Guanosine 3':5'-Monophosphate and Cyclic Adenosine 3':5'-Monophosphate. Louis J. Ignarro, Richard G. Harbison, Keith S. Wood, Michael S. Wolin, Dennis B. McNamara, Albert L. Hyman and Philip J. Kadowitz	560
Sympathetic Denervation Does Not Alter the Density or Properties of <i>Alpha</i>-1 Adrenergic Receptors in Rat Vas Deferens. Peter W. Abel, Ronald D. Johnson, Tracy J. Martin and Kenneth P. Minneman	570
Modification of Sympathetic Neuronal Function in the Rat Tail Artery by Dietary Lipid Treatment. Robert L. Panek, Walter R. Dixon and Charles O. Rutledge	578
Inheritance of Liver N-Acetyltransferase Activity in the Rapid and Slow Acetylator Inbred Hamster. David W. Hein, Ward G. Kirlin, Ronald J. Ferguson and Wendell W. Weber	584
Alcohol Effects on Luteinizing Hormone and Testosterone in Male Macaque Monkeys. Nancy K. Mello, Jack H. Mendelson, Mark P. Bree, James Ellingboe and Alice S. T. Skupny	588
<i>Sigma</i> Opioid Receptor: Characterization and Co-Identity with the Phencyclidine Receptor. Laurane G. Mendelsohn, Vin Kalra, Bryan G. Johnson and Gail A. Kerchner	597
Solubilization and Characterization of Putative <i>Alpha</i>-2 Adrenergic Isoceptors from the Human Platelet and the Rat Cerebral Cortex. Rodney S. Kawahara and David B. Bylund	603
Potent Enhancement of [³H]Nitrendipine Binding in Rat Cerebral Cortical and Cardiac Homogenates: A Putative Mechanism for the Action of MDL 12,330A. Howard R. Lee, Joseph A. Jaros, William R. Roeske, Norbert L. Wiech, Richard Ursillo and Henry I. Yamamura	611
Effects of Isoproterenol on Histamine Release Induced from Monodispersed Guinea-Pig Lung Cells by Different Secretagogues. B. J. Udem, F. M. Graziano and C. K. Buckner	617
Adenosine Receptors on Canine Parietal Cells Modulate Gastric Acid Secretion to Histamine. J. G. Gerber, A. S. Nies and N. Ann Payne	623
Relaxant and Contractile Responses to Prostaglandins in Premature, Newborn and Adult Baboon Cerebral Arteries. Shigehiro Hayashi, Myung K. Park and Thomas J. Kuehl	628
Calcium Entry Blockade by Nitrendipine and <i>Alpha</i> Adrenergic Responsiveness <i>in Vivo</i>. Comparison with Noncalcium Entry Blocker Vasodilators in Absence and Presence of Phenoxybenzamine Pretreatment. Roberto Pedrinelli and Robert C. Tarazi	636
Calcium Entry Blockade by Nitrendipine and <i>Alpha</i> Adrenergic Responsiveness <i>in Vivo</i>. Comparison of Systemic vs. Local Effects. Roberto Pedrinelli and Robert C. Tarazi	643
Glucocorticoid Modulation of Prostacyclin Production in Cultured Bovine Pulmonary Endothelial Cells. David J. Crutchley, Una S. Ryan and James W. Ryan	650
Inactivation of D₁ and D₂ Dopamine Receptors by N-Ethoxycarbonyl-2-Ethoxy-1,2-Dihydroquinoline <i>in Vivo</i>: Selective Protection by Neuroleptics. Emanuel Meller, Karen Bohmaker, Menek Goldstein and Arnold J. Friedhoff	656
GABAergic Inhibition of Hypertonic Saline-Induced Vasopressin-Dependent Hypertension. Timothy J. Brennan and Joseph R. Haywood	663
Hemodynamic Roles of Thromboxane A₂ and Prostaglandin E₂ in Glomerulonephritis. John E. Stork and Michael J. Dunn	672

Contents Continued on iv

Blockade of Endothelium-Dependent and Glyceryl Trinitrate-Induced Relaxation of Rabbit Aorta by Certain Ferrous Hemoproteins. William Martin, Gina M. Villani, Desingaro Jothianandan and Robert F. Furchgott	679
Characterization of [³H]Leukotriene D₄ Binding Sites in Guinea-Pig Ventricular Myocardium. G. Kurt Hogaboom, Seymour Mong, Jeffrey M. Stadel and Stanley T. Crooke	686
Electroneutral Transport of Organic Cations in Canine Renal Brush Border Membrane Vesicles (BBMV). Paul P. Sokol, Peter D. Holohan and Charles R. Ross	694
Permissive Role of Prostaglandins in the Action of Bradykinin on the Pancreas of Anesthetized Dogs. K. Iwatsuki, T. Homma and K. U. Malik	700
Heterogeneity of Binding of Muscarinic Receptor Antagonists in Rat Brain Homogenates. Jong-Hwa Lee and Esam E. El-Fakahany	707
Aluminum and Gallium Arrest Formation of Cerebrospinal Fluid by the Mechanism of OH⁻ Depletion. Betty P. Vogh, David R. Godman and Thomas H. Maren	715
Opioid Binding to Rat and Guinea-Pig Neural Membranes in the Presence of Physiological Cations at 37°C. Linda L. Werling, Gary D. Zarr, Stephen R. Brown and Brian M. Cox	722
Alpha-1 Adrenergic Control of the Venous Circulation in Intact Dogs. Christopher Appleton, Marcey Olajos, Eugene Morkin and Steven Goldman	729
In Vivo Receptor Binding of Opioid Drugs at the Mu Site. Jan S. Rosenbaum, Nicholas H. G. Holford and Wolfgang Sadée	735
Mechanism of Oxmetidine (SK&F 92994) Cytotoxicity in Isolated Rat Hepatocytes. Glenn F. Rush, Mary Ripple and Richard Chenery	741
Pharmacological Differences between the D-2 Autoreceptor and the D-1 Dopamine Receptor in Rabbit Retina. Margarita L. Dubocovich and Norman Weiner	747
Cardiovascular Effects of Spinal Cord Substance P: Studies with a Stable Receptor Agonist. Jill R. Keeler, Clivel G. Charlton and Cinda J. Helke	755
5-Hydroxytryptamine Receptor in Isolated Rabbit Aorta: Characterization with Tryptamine Analogs. Brian M. Clancy and Saul Maayani	761
Correlation between Antipyrine Metabolite Formation and Theophylline Metabolism in Humans after Simultaneous Single-Dose Administration and at Steady State. M. W. E. Teunissen, L. G. J. De Leede, J. K. Boeijinga and D. D. Breimer	770
Transport of p-Aminohippurate, Tetraethylammonium and D-Glucose in Renal Brush Border Membranes from Rats with Acute Renal Failure. Ryohei Hori, Mikihiisa Takano, Tomonobu Okano and Ken-Ichi Inui	776
Inhibitory Effects of Norepinephrine, Methoxamine and Phenylephrine on Renin Release from Rat Kidney Cortical Slices. Yasuo Matsumura, Nobuaki Miyawaki, Yasuto Sasaki and Shiro Morimoto	782
Disposition of Enalapril in the Perfused Rat Intestine-Liver Preparation: Absorption, Metabolism and First-Pass Effect. K. Sandy Pang, Wendy F. Cherry and Edgar H. Ulm	788
Adrenergic and Possible Nonadrenergic Sources of Adenosine 5'-Triphosphate Release from Nerve Varicosities Isolated from Ileal Myenteric Plexus. Mohammad Al-Humayyd and Thomas D. White	796
Effects of Tertatolol on Post- and Prejunctional Beta Adrenoceptors. Tony J. Verbeuren, Gert Laekeman, Bernard B. Majchrowicz, François H. Jordaens, Ludo L. Zonnekeyn and Arnold G. Herman	801
Possible Inhibitory Role of Endogenous γ-Aminobutyric Acid in the Nonnicotinic Functions of the Dog Cardiac Sympathetic Ganglia. Kazushi Kushiku and Tatsuo Furukawa	810
A Comparison of Two Radioimmunoassays for 7-Hydroxychlorpromazine: Rabbit Polyclonal Antibodies vs. Mouse Monoclonal Antibodies. P. K. F. Yeung, G. McKay, I. A. Ramshaw, J. W. Hubbard and K. K. Midha	816
Renal Tubular Action of Prostaglandin E₂ on Water and Electrolyte Excretion in the Nonanesthetized Chicken. Kamel Besseghir	823
Do D 600 and Diltiazem Interact with Serotonin Receptors in Rabbit Vascular Tissues? Mitsuo Ohashi, Reiko Kanai and Issei Takayanagi	830
CM 40907: A Structurally Novel Anticonvulsant in Mice, Rats and Baboons. Jean-Pierre Chambon, Joëlle Brochard, André Hallot, Michel Heulme, Roger Brodin, Romeo Roncucci and Kathleen Biziere	836
Effects of Nifedipine on Coronary Vasculature in Canine Models of Dynamic and Fixed Coronary Stenoses. Mitsuhiro Yokoyama, Susumu Sakamoto, Akiko Kusui, Hozuka Akita, Kishio Maekawa and Hisashi Fukuzaki	845
Neurotoxic and Antihypertensive Effects of Phenytoin in Turkeys. Charles F. Simpson and W. Jape Taylor	853
Immunological Studies on the Mechanism of Halothane-Induced Hepatotoxicity: Immunohistochemical Evidence of Trifluoroacetylated Hepatocytes. Hiroko Satoh, Yuh Fukuda, David K. Anderson, Victor J. Ferrans, James R. Gillette and Lance R. Pohl	857
Plasma Corticosterone Changes in Response to Central or Peripheral Administration of Kappa and Sigma Opiate Agonists. Richard M. Eisenberg	863
Index, Volume 233, April-June, 1985	871
