INFORMATION TO SUBSCRIBERS

THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS is issued monthly. Four volumes are published each year. Each volume contains three numbers.

Correspondence concerning business matters should be addressed to Williams & Wilkins, Publishers of Books and Periodicals in Medicine and the Allied Sciences, 428 East Preston St., Baltimore, Maryland 21202 U.S.A.

Annual Subscription Rates—U. S. A. AND POSSESSIONS: personal, \$140.00; institutional, \$220.00; single copy, \$16.00. FOREIGN: personal, \$170.00; institutional, \$250.00; single copy, \$19.00. (Prices subject to change.) Institutional (multiple reader) rate applies to libraries, schools, hospitals, clinics, group practices, and federal, commercial, and private institutions and organizations.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the January or July issue.

To avoid a break in your series, subscriptions should be renewed promptly. The publisher cannot guarantee to supply back issues on belated renewals.

Reprints of individual articles are available *only* from authors.

Microfilm. For availability, inquire of Williams & Wilkins.

Japanese Yen price is available from our sole agent: USACO Corporation, 13-12 Shimbashi 1-Chome, Minato-Ku, Tokyo 105, Japan, telephone 03-502-6471.

OUR SHR RAT IS TAKING THE PRESSURE OFF MILLIONS OF PEOPLE.

In this fast-paced world of ours, it takes a special breed to handle the pressures. For the millions of people afflicted with hypertension and the researchers working to resolve its mysteries, the Charles River COBS® SHR hypertensive inbred albino rat is precisely that: specially bred to provide the consistently high pressures vital to successful hypertension research.

And consistency is the key. Indirect systolic pressures of 180-220 mm Hg are recorded regularly in our 8-10 week old male breeding stock. Our SHR's are continuously brother-sister mated and monitored to assure you a constant supply of spontaneously hypertensive rats. And to further eliminate

variables which may affect the accuracy of your findings, Charles River SHR rats are also available Virus Antibody Free (VAF®), which offers you the valuable certainty that all of our VAF® animals have received continuous genetic and health monitoring and have been found free of adventitious virus infection. All that adds up to lower blood pressure for the researcher too.

When your efforts to control hypertension demand the highest defined quality research animals available in the world today, specify Charles River COBS/VAF® SHR hypertensive inbred albino rats. Relax. And let us help take the pressure off. Call 1-800-LAB-RATS.

Or write Charles River Laboratories, Inc.,
251 Ballardvale Street, Wilmington, MA 01887.
