What an inexpensive rat can turn out to be.

Compare our CD[®] rat to an inexpensive rat and we'll kick the stuffing out of it. Every time.

Sure you have to pay more for our rat, but you get more.

Choose from VAF/PLUS[™] or COBS[®] CD rats. Both are an International Standard[®] backed by Charles River personnel and facilities.

High-quality VAF/PLUS rats are reared under unique barrier condi-

tions, for a more uniform and consistent model. This, in turn, could mean using fewer animals as well as not contaminating other test animals.

Combined, our personnel, facilities and quality VAF/PLUS rats can save you time and money.

When the presence of specific viral antibodies is needed or if the testing environment dictates, COBS rats are the right choice. Both

VAF/PLUS and COBS offer the explicit, complete health and genetic documentation you should expect.

CD rats. Their quality and availability are the reasons why inexpensive rats are for the birds.
